

HPE Standard Series Racks

Looking to protect your back-office equipment and your infrastructure budget?

Then it's time to take a look at the new HPE Standard Series Racks. This fully assembled, 19-inch industry-standard server rack supports a static load capacity up to 2000 lb (907.18 kg). It is designed to fit all HPE servers, networking, and storage products. A true entry-level product that fits your IT budget without compromising the quality you expect.

Get more with less

HPE Standard Racks offer a low-cost solution to housing, protecting, and organizing your servers, storage devices, and networking equipment. They provide significant cost savings and come fully assembled with all industry-standard racking requirements. These full-featured racks can help grow your business with less initial investment.

Key features and benefits

Fits your server room, and your budget

The HPE Standard Series Racks can house HPE ProLiant, Integrity, BladeSystem, NonStop servers, and StorageWorks products, as well as networking applications. The rack also supports zero-U (0U) mounting, which doesn't take up any front-panel rackmounting space.

A solid choice

With an industry-standard 19" rack, **HPE Standard Racks** can hold up to 2000 pounds of static load. At 42U, it's ideal for new and relatively low-density data centers so you can grow into it. Full-featured, low-cost **HPE Standard Racks** are made for startups and emerging markets, where stretching infrastructure budgets is essential. Get the features you want and the storage capabilities you need at a price you like.

Design and innovation

The perforated front door offers ideal air flow. Front and rear doors include handles and locks for added security. The side panels assemble in two parts for easy mounting and manageability. And **HPE Standard Racks** are compatible with cable management solutions, as well as light kits, stability and support ballasts, anti-tip stabilizers, and more HPE rack accessories. Solid technology with the ability to grow and adapt with your changing needs.

You're covered

HPE Racks are covered by your HPE Server Care Pack warranty. HPE Racks carry a standard 3-year warranty. And, for greater protection purchase a Care Pack for your Server and your rack is covered at no additional cost.

Data sheet

HPE Financial Services provides innovative financing and financial asset management programs to help you cost-effectively acquire, manage, and ultimately retire your HPE solutions. For more information on these services, please contact your HPE sales representative or visit:

When technology works, business works

To streamline installation and enhance ongoing support of your rack solution, HPE recommends the following service offerings:

Installation and startup services

HPE Services offers complete installation support—including global rollout capabilities—to get your rack solution up and running rapidly, with minimal business disruption.

Hardware support

Now you can cover all the options installed in your rack with a single convenient service package. HPE Care Pack services for rack-mounted servers and storage systems installed in HPE 100 rack enclosures provide support for all HPE-branded hardware options qualified for inclusion in your server or storage devices at the time of purchase or after purchase. The 22-inch and smaller external monitors, tower units, UPS options (not exceeding 12 kVA), KVM switch, console PDU, and additional HPE-qualified rack options installed within the same rack, are covered at the same service level and for the same period as the server. Coverage of UPS batteries is not included.

HPE Care Pack Services increase uptime and productivity with rapid-response support solutions.
