Certain HPE server options require the purchase of support services on the individual option in order to receive support services (beyond warranty) for that product. These services are purchased separately from support services that are made available for purchase with the main product. The HPE options for ProLiant and BladeSystem servers listed below have support services available for purchase for the specific option. For a full listing of support services available for these options, please visit [hp.com/go/cpc](http://hp.com/go/cpc).
