

Achieve compliance

HPE Compliance & Risk Management

HPE Compliance & Risk Management Solution is a customized global service that allows you to use centralized logging to cost-effectively demonstrate your ability to automate manual reporting processes and alert oncompliance exceptions, which support audits and demonstrate compliance to Sarbanes-Oxley (Act of 2002) (SOX), Payment Card Industry (PCI), Federal Information Security Management Act (FISMA), Health Insurance Portability and Accountability Act (HIPAA), and other critical regulations.

Intelligence that exceeds guidelines

The Compliance & Risk Management Solution provides a more cost-effective means of driving process efficiencies and reducing risk, while enabling you to achieve the following:

 Identify and reduce threats and compliance exceptions

- Quickly help minimize the impact of adverse events that do occur
- Achieve rapid situational awareness of current threats and compliance statutes
- Automate manual reporting processes
- Expedite remediation and incident response times
- Continually measure and improve the effectiveness of security and compliance processes
- Automate monitoring and enforcement of security controls

Uncover actionable events

HPE Enterprise Security Products (ESP) Global Services provides a comprehensive library of compliance use cases and corresponding content to verify that your security-monitoring program accurately identifies actionable events.

Establishing the right skills

Proper training is an ongoing process that is essential to both the short- and long-term success of any compliance program. HPE ESP Global Services approaches training holistically, addressing roles and responsibilities, processes and procedures, and appropriate HPE ESP technologies.

Processes and procedures

Establishing a formal log management business process allows you to accomplish the following:

- Formalize a framework where critical audit logs are collected and available as needed to support compliance initiatives
- Continually measure and improve the efficiency and effectiveness of the compliance reporting process
- Automate manual reporting

Advisory, performance, and managed services

HPE ESP Global Services provides the following ideal mix of services based on your budget, business requirements, and desire to maximize the value of your HPE ESP Solution:

Advisory Services

Architecture and design, business requirements mapping, security operations primer, maturity assessment, and analyst training

Performance Services

Jump-start and implementation, upgrades and tuning, health checks, content design, and HPE ArcSight FlexConnector development

Managed Services

Security operations and intelligence consulting, perimeter and network security monitoring, insider threat monitoring, compliance and risk management reporting, universal log management, advanced persistent threat monitoring, data loss and privacy monitoring, breach response, application and transaction monitoring, and secure software assurance.

Project phases and solution levels

Project phases and solution levels for implementing compliance reporting focus on all aspects of your company's people, processes, and technology to create a definitive roadmap that is unique to your business environment. Phases can be implemented individually or in combination based on your business needs—reporting only, alerting (virtual security operations center), or real-time monitoring and analysis (full security operations center).
