Big Data training

Put Your Data to Work

Data is the most valuable currency in the idea economy, where ideas that hit the market the fastest—win. Big Data done right extracts value immediately to make customers happy and influence big decisions quickly while identifying any waste and risk that should be eliminated. When Big Data becomes business practice, the experiment ends and the experience wins. The data-driven organization best accomplishes continuous improvement and is most capable of planning for success with predictive power.

With the HPE Haven platform, Hewlett Packard Enterprise innovates in software, services and Big Data infrastructure to make data tangible for your business, right now.

Get control with information management

HPE offers intelligent information ecosystems to manage, secure, govern, and leverage information seamlessly across the enterprise. With innovative technologies such as HPE AppSystem for Hadoop, enterprises can deploy reliable and cost-effective Big Data solutions.

Get efficient with information infrastructure

Harnessing the power of Big Data requires an intelligent data center—one that starts with an infrastructure that can capture, store, replicate, and scale information at speeds required by the business. Technologies such as HPE ConvergedSystems, HPE 3PAR and HPE Networking are at the heart of our HPE Big Data information infrastructure.

Better Business Results Through Big Data Training

Knowing what you can do with Big Data is step one. Step two is knowing how to do it.

HPE Education Services offers a broad range of in-depth training courses to address your information management and information infrastructure needs. HPE Education Services provides comprehensive training support for HPE's ConvergedSystem 500 and ConvergedSystem 900 SAP HANA infrastructure solutions. HPE also partners with Hortonworks to offer dedicated deliveries of the Hortonworks course suite. We combine business insight, hands-on experience, and technical expertise to equip your team and fine tune your Big Data solution.

HPE Autonomy, HPE Vertica, and HPE Hadoop

To create an end-to-end Big Data management platform and deeper, time-critical analytics, Hadoop can be integrated with HPE solutions for low-cost data warehousing or batch-oriented analysis. The HPE Hadoop-based solution is complementary with HPE Vertica and HPE Autonomy. HPE Autonomy is the market leader in meaning-based computing technology. HPE Vertica is proven to deliver outstanding results in the most demanding business intelligence and analytic environments.

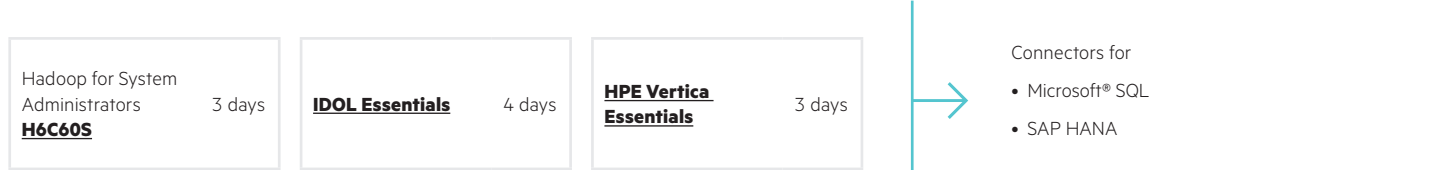

For more information on HPE Training Credits, visit us [online](#). For assistance with your Training Credits quote please contact your HPE Sales Representative.

Simplify your training purchase with the HPE Training Credits for Big Data Services (SKU H9P13E/H9P13A1)

Be sure **HPE Training Credits** for Big Data Services (H9P13E or H9P13A1) is included with your HPE reference architecture or AppSystem quote. Since one HPE Training Credit unit equates to one day of training, it is easy to adjust your order to cover all your training needs. Training Credits offer:

- Convenience: Purchase prepaid, discounted training credits now. Choose classes, dates, locations, and who to send later (Training credits are valid for 12 months).
- Flexibility: Use Training credits for any course offered by HPE Education Services, whether delivered face to face, onsite, or via VILT—virtual instructor led training.
- Ease of use: Redeem one HPE Training Credit unit for one day of Big Data training (per student) in a public class.

Why HPE Education Services?

- IDC MarketScape leader 4 years running for IT education and training¹
- IDC MarketScape Leader Big Data Training²
- Recognized by IDC for leading with global coverage, unmatched technical expertise, and targeted education consulting services¹
- Organizations perceive that Technology Vendors such as HPE provide better training than dedicated training firms in terms of quality, breadth and depth of offering, certification, delivery, and IT process training in addition to technical training³
- Key partnerships with industry leaders OpenStack®, VMware®, Linux®, Microsoft, ITIL, PMI, CSA, and (ISC)²
- Complete continuum of training delivery options—self-paced eLearning, custom education consulting, traditional classroom, video on-demand instruction, live virtual instructor-led with hands-on lab, dedicated on-site training
- Simplified purchase option with Training Credits
