HPE Smart Array controllers for HPE ProLiant servers and Synergy Compute Modules

HPE Smart Storage product family

HPE Smart Array Controllers

The HPE Smart Array 12 Gb/s SAS RAID controllers provide enterprise-class storage performance, increased internal storage scalability, and data protection for HPE ProLiant Rack, Tower, BladeSystem, and Apollo servers and Synergy Compute Modules. Smart Array controllers deliver increased server uptime by providing advanced storage functionality, including online RAID level migration between any RAID levels with flash-backed write cache (FBWC), global online spare, and pre-failure warnings.

HPE Smart Host Bus Adapters

Perfect for environments that require fast access, HPE Smart Host Bus Adapters (HBAs) provide cost-effective and reliable high-performance SAS connectivity to direct attached storage, shared storage, and tape drives for HPE ProLiant servers running Hadoop, Database Availability Group, VMware vSAN, and Microsoft Storage Spaces. Smart Host Bus Adapters are a perfect conduit for deploying software-defined storage as a means to manage the IT storage pool. For greater flexibility, HPE Smart Host Bus Adapters are capable of running in either HBA or simple RAID mode.

HPE Dynamic Smart Array Software RAID

HPE Dynamic Smart Array provides an embedded SATA software RAID solution for HPE ProLiant Gen9 servers. The common metadata format on the drives allows disks to migrate from Dynamic Smart Array to Smart Array controller or Smart Host Bus Adapter (when running in RAID mode) if needed, to achieve higher performance, capacity, and availability. This controller is ideal for supporting boot device and applications that do not require a significant I/O workload.
