

Accelerate to exceptional

Propel your potential with Education Services

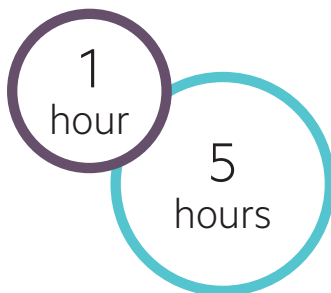

80%

of IT managers recognize training as critical to project success.¹

24%

higher profit margin at companies with comprehensive training.

One hour of training saves five hours of lost productivity.

Realize technology value with training

In our digital world, today's idea becomes tomorrow's new service or better experience. Companies need focus on four main areas in order to survive and thrive in this idea economy: they must transform to a hybrid infrastructure, protect the digital enterprise, empower the data-driven organization, and enable workplace productivity.

Hewlett Packard Enterprise Education Services helps accelerate IT transformation and positions your team for success. Our training and education consulting services deliver the workforce skills to optimize systems and overcome technology challenges.

Education Services provides solutions to propel your technology potential with education and training in support of the four IT Transformation Areas.

Enterprise transformation training

1. Transform to a hybrid infrastructure

Your people are a key factor in the transition

from traditional IT infrastructure to cloud-and mobility-based solutions. With the right training, your workforce will adapt to these new technologies, optimize multi-supplier architectures, drive better business decisions, and reduce risks.

2. Protect your digital enterprise

Training is vital to the protection of digital assets. Combine infrastructure security training with a cyber-aware workforce to protect your organization's data, applications, and infrastructure.

3. Empower the data-driven enterprise

In-depth IT training helps accelerate the return on your Big Data investment. Harness 100 percent of your data and empower your organization with actionable insight.

4. Enable workplace productivity

We offer an end-to-end approach for workforce training and transformation, including analysis, planning, delivery, and Management of Change. Ensure your workforce is trained on the tools, technology, and infrastructure needed to succeed in today's hyper-connected workplace.

Training and certification

Technical and IT management training

- **Build skills:** We offer technical training for a broad range of HPE products and technologies. Our training also covers industry partner technologies and IT service management.
- **Learn from the best:** Our expert, certified instructors offer relevant industry and technical qualifications.
- **Gain in-depth expertise and real-world experience:** Our courses balance technical expertise, business insight, and hands-on experience to accelerate the learning process.
- **Achieve certification goals:** We combine extensive exam preparation options with skills-based training to support industry certification programs (including ITIL®, VMware®, Microsoft®, Linux®, EXIN®, (ISC)², ISACA, CompTIA, RESILIA, CSA, AXELOS), as well as Partner Ready Certification and Learning programs.

Management of Change

Hewlett Packard Enterprise understands the importance of the human element with any successful IT-enabled business change. HPE supports the plans of many global clients' and delivers sustainable benefits through a Management of Change (MoC) program. MoC is an approach to transitioning individuals, teams, and organizations to a desired future state and guide them through the transformation stages. It supports –

- Individuals within the IT organization who need to be appropriately skilled and certified.
- Collaboration and communication within and across teams during and post transition stage.
- Organizational change to enable leaders and employees to embrace the new roles and responsibilities.

Organizations are unlikely to realize the full benefits of technology transformation, if the workforce and leadership do not receive adequate focus and attention. HPE facilitates an integration of PEOPLE, TECHNOLOGY & PROCESSES to ensure that the workforce is fully competent, well informed, culturally prepared to adopt changes and leadership is aligned to play its guiding and mentoring role in the change process.

Collaboration tools

HPE MyRoom

- Attend virtual meetings or training
- Collaborate globally in 18 different languages
- Stay in touch using IM chat or voice
- See what they see with screen sharing
- Find and connect with the right person at the right time with Community Collaboration

HPE MyRoom Visual Remote Guidance

HPE MyRoom Visual Remote Guidance leverages wearable devices to provide live, visually guided collaboration between remote personnel and your experts. VRG allows experts to “see through remote eyes” to facilitate problem solving, increase productivity, and deliver bottom-line savings.

HPE MyRoom VRG lets you innovate the way you conduct business. Consider this small sample of potential applications:

- Remote field support
- Manufacturing line support
- Education and training
