

# Focus on SAP HANA outcomes, not management

## Hewlett Packard Enterprise Managed Services for SAP HANA

Let HPE manage your SAP HANA infrastructure so you can focus on maximizing it's value

- Focus on SAP Applications instead of managing your IT environment, freeing your resources to innovate.
- Let HPE manage your total SAP HANA environment—including the SAP HANA database and applications.
- Leverage our long-term relationship with SAP, in-depth knowledge of SAP products, global team of HPE SAP professionals, and HPE Delivery Centers.

Data is exploding from the surge in social media and mobile technologies. And its volume, velocity, and variety of information is overwhelming—particularly when you consider the potential value of the intelligence contained in all of that data.

### Use SAP HANA— the simple way

The benefits of SAP HANA are clear: speed, agility, any data anywhere, insight, and simplicity. SAP/HANA is central to moving to SAP S/4HANA, your future SAP solution.

### Get these benefits with minimal risks

Did you know that when you let HPE manage your SAP HANA IT environment, you can expect to maximize your benefits?

- **Speed**—An HPE-managed IT environment provides a foundation that lets you process massive amounts of data into real-time reporting and analytics.
- **Agility**—An HPE-managed environment lets you add new servers, software, applications, and services quickly. You can also scale up, down, or out, as needed.

- **Data (and assets) anywhere**—HPE can host your SAP HANA environment in your choice of data center locations: yours, ours, or your partner's.
- **Insight**—We bring more than 50 years of solving complex IT problems for clients. Combine this with our team of HPE SAP professionals, and you can be confident we have the insight and knowledge to solve your problems.
- **Simplicity**—HPE is your single point of contact for all your service issues and needs.

### Get business value

Get access to SAP HANA applications and servers, HPE-as-a-Service Solution for SAP HANA, and managed services for SAP HANA— whatever meets your needs. We can integrate it with other SAP applications and administer the required services and support, or manage your entire IT environment. You can focus on running your business instead of the complexities of your IT environment.

### Get complete support

We manage your environment just like we do our own. We deliver smooth and seamless operations. Our skilled global workforce and operational best practices provide high-value

## At-a-glance

services for the complete administration, management, and support of your SAP HANA environment including:

### Hosting

- Hosting your SAP HANA appliance and other SAP applications in a choice of data centers— yours, ours, your partner's, or even within the Hewlett Packard Enterprise Cloud Services–Virtual Private Cloud
- Providing services to SAP HANA and/or other SAP applications, platforms, and/or hardware and infrastructure, including:
  - Developing, testing, fine-tuning, and optimizing applications
  - Managing applications, operating systems, system configurations, and more
  - Setting up security, backup and recovery, storage, and more
  - Managing, monitoring, and testing servers, storage, networks, and databases
  - Delivering the latest hardware, operating systems, software updates and patches, among others
- Providing management and run services

### Performance

- Sizing servers to handle the required volume of data and number of users
- Determining the network throughput capacity to support SAP HANA environments
- Ensuring high availability of systems plus disaster recovery
- Delivering to service levels

### Enterprise-class security

- Improving availability and protection of networks, systems, software, and database systems
- Protecting data at rest, in transit, and in motion
- Maintaining a secure audit trail

### Certified systems

- Offering seven single-node configurations based on HPE ProLiant DL580 and DL980 servers; the portfolio includes:
  - Virtualization for SAP HANA, enabling you to quickly deploy up to 15 test and development HANA instances on a single physical server
  - Two new configurations exclusively for use with SAP Business Suite powered by SAP HANA; configurations are built on the HPE ProLiant DL980 G7 server platform with 2TB or 4TB of memory on a physical server
- Featuring a scale-out configuration that supports very large data volumes on SAP HANA; the first enterprise-class real-time analytics solution optimized to run SAP business application workloads while offering a completely automated failover mechanism for high availability; it includes:
  - HPE ProLiant BladeSystem BL680c servers and is supported by two storage offerings: HPE 3PAR StoreServ 7400 and HPE Virtual Array 6550

### Delivery

- Providing flexible delivery models
- Using a single point of contact

### Additional services

- Getting a fast path to upgrade to SAP HANA with minimal risk through Business Warehouse and Business Suite with migration services
- Covering a wide range of industry and business use cases with rapid-deployment solutions

- Leveraging HPE RunSAP certifications and business outcomes-based service-level agreements for applications running on SAP HANA with Application Management Industry services
- Meeting your specific requirements for SAP HANA with application development services

## Benefit from our SAP experience

When HPE manages your SAP HANA environment, you can rely on:

- Some 9,200 HPE SAP professionals across the globe
- Our 13 worldwide HEP Delivery Centers with specialized SAP knowledge and expertise
- Our expertise as a global SAP Hosting Partner, with more than 1,000 clients, supporting 2 million users, using more than 10 languages

HPE and SAP share 25+ years of delivering co-innovation and joint solutions together— more than any other IT service provider. HPE invests over \$40 million USD a year in SAP related solutions.

- Forty-six percent of SAP instances run on HPE.
- HPE has delivered more than 1,000 SAP projects for its clients, from global to regional.
- We win awards for SAP delivery excellence and leadership.
- With 20,000+ users, HPE IT is one of SAP's top 10 customers and recently completed one of the world's largest SAP HANA transformation programs.
