

# Continuous education for the new style of business

Hewlett Packard Enterprise Adoption Readiness Tool (ART) lets your organization move from point-in-time training to ongoing enablement. It supports the application lifecycle from inception to launch and beyond, streamlining content creation, boosting adoption, and accelerating ROI.

## Get ahead

HPE ART is a fully customizable development platform for IT education, documentation, and performance support content. HPE expert content makes your life easier from day one.

## Stay ahead

HPE ART is designed to address different learning styles, so total training time can be reduced by up to 50%\*. As a result, your users become proficient sooner and ROI is faster.

## Extend and update

HPE ART helps you play a key role in proactively managing the rapid pace of change. You can track users' comprehension and target areas for improvement. When business processes change, all documentation can be updated quickly.

## But don't just take our word for it...

BSkyB used HPE ART to enable 10,000 employees

“Modern technology demands efficient, flexible and collaborative knowledge management solutions. The content and the audience will be continually evolving and never predictable. For large, dynamic, IT organisations — HPE ART is the obvious choice.”

Head of Performance Engineering, BSkyB

Results from a Fortune 500 company using HPE ART

86% lower content development cost

10% fewer support desk “how to” calls

ROI in 3-6 months

50-75% reduction in content creation time

Try HPE ART and see what it can do for your organization
