

# Don't be a wallflower

## HPE Flex Solutions for VMware vSphere

You're invited to the virtualization party. Don't sit this one out.

# 91%

of businesses that have virtualized believe it provides a key competitive advantage over those that haven't.<sup>1</sup>

### Just Right IT—just for you

HPE Flex Solutions are part of HPE Just Right IT, helping you achieve your business goals with simple, reliable, and affordable products, solutions, and services.

### Get ready to rock and roll

Today, everyone is virtualizing. If you haven't virtualized at least some workloads yet, you're kind of like the kid who got invited to the party but decided he'd rather stay home and play video games. What's keeping you from going to the virtualization party?

"While most businesses are aware that virtualization can result in significant savings, some are reluctant to virtualize due to a lack of tools needed to proactively manage environments with unpredictable peaks," says Terri Postlewait, AMS VMware Alliance and Category Manager.

HPE Flex Solutions for VMware vSphere® solve this problem by providing a preconfigured virtualization solution that is easy to install, operationalize and manage. Operational and performance monitoring enhancements provide higher service levels and maximize savings through consolidation in an easy-to-use package.

As your business grows, continuing to expand and optimize your virtual environment just adds to your business agility and cost savings, as proactive management of virtualized applications further increases consolidation and gives you more capacity. By accelerating your adoption of virtualization for business-critical applications, you'll continue to enhance service levels and maximize hardware savings.

## Solution brief

### Virtualization by the numbers

Proactive management of virtual server environments gives you:<sup>2</sup>

- 30% reduction in application downtime
- 30% increase in hardware savings
- 34% increase in capacity utilization
- 36% increase in consolidation ratios
- 26% decrease in troubleshooting time

## The host with the most

HPE Flex Solutions for VMware vSphere are predefined, yet flexible solutions based on the needs of businesses like yours.

### HPE ProLiant Gen9 servers

Intel®-powered HPE ProLiant Gen9 servers include user-inspired innovations that reduce time spent on IT tasks, so you can focus on your business. Your solution also features Aruba Instant Wi-Fi, delivering business-grade performance, security, and resiliency, with zero-touch deployment.

You have the option of adding HPE VM Explorer software for fast, flexible backup and recovery of virtual environments.

### VMware vSphere

VMware vSphere runs applications at high service levels and maximizes hardware savings with more capacity utilization and better consolidation ratios. Integrations with HPE OneView enable automated control via a single pane of glass to simplify management.

HPE Flex Solutions are delivered with HPE Partner support to simplify sizing and accelerate provisioning. You can purchase what you need today and grow IT easily, along with your business.

You also benefit from HPE Support Services combined with HPE Get Connected for problem prevention and faster issue resolution, resulting in a significant reduction in downtime.
