

HPE Altoline 6920 Switch Series

Key features

- High 10GbE port density and low latency for demanding applications
- ONIE boot loader for choice of network OS and easy installation
- OCP-certified, open-networking, and disaggregated solution for customer choice
- VXLAN for efficient network virtualization overlay solutions
- x86 CPU controller, redundant fans, and power supplies for data center deployments

Product overview

The HPE Altoline 6920 Switch is a leaf top-of-rack (ToR) switch for high-performance data centers. In a compact 1RU form factor, the switch provides line-rate L2 and L3 switching across up to 48 x SFP+ ports, with 6 x 40GbE QSFP+ uplink connections.

The HPE Altoline 6920 Switch can be deployed as a leaf ToR switch supporting 10GbE server connections.

The HPE Altoline 6920 is a bare-metal switch loaded with the Open Network Install Environment (ONIE), which supports the installation of compatible independent switch network operating system (NOS) offerings.

Features and benefits

Data center optimized

- Flexible high port density

The HPE Altoline 6920 Switch Series enables scaling of the server edge with 10GbE server connection, with 40GbE uplinks, to new heights with high density delivered in a 1RU design

- High-performance switching

Cut-through and non-blocking architecture delivers low latency (600–720 nanoseconds for 40GbE) for very demanding enterprise applications; the switch delivers high-performance switching capacity and wire speed packet forwarding

- Hot or cold aisle support

Models available with front-to-back (port-to-power) or back-to-front (power-to-port) airflow

- Redundant fans and power supplies

1+1 internal redundant and hot-pluggable power supplies and N+1 redundant fan trays enhance reliability and availability

- VXLAN hardware support

Supports VXLAN VTEP overlay technologies

Manageability

- Out-of-band interface

Isolates management traffic from user data plane traffic for complete isolation and total reachability, no matter what happens in the data plane

- ONIE boot loader

Switch is loaded with ONIE software installer

- Intel® x86 CPU

Provides high performance support of widely available, industry-standard software and utilities

Layer 2 switching

- VLAN support

Provides support for 4,096 VLAN IDs

Additional information

- Low power consumption

Typical operation uses just 267 W of AC power

Warranty and support

- 1-year warranty

See [hpe.com/networking/warrantysummary](https://www.hpe.com/networking/warrantysummary) for warranty and support information included with your product purchase.

Notes

Idle power is the actual power consumption of the device with no ports connected. Maximum power rating and maximum heat dissipation are the worst-case theoretical maximum numbers provided for planning the infrastructure with fully loaded PoE (if equipped), 100% traffic, all ports plugged in, and all modules populated. PSU Efficiency: Up to 93% for AC PSUs
