

Delivering Hybrid IT

CenturyLink solutions powered by HPE

CenturyLink brings together the technology, services, and expertise that power some of the largest brands in the world and make businesses more agile, secure, and sustainable with end-to-end solutions. Powered by HPE, CenturyLink delivers flexible hybrid IT hosting services including Managed Hosting, Private and Dedicated Cloud, Storage and Managed Services to optimize your business critical workloads such as Big Data, disaster recovery/business continuity, eCommerce, advanced analytics, managed hadoop and SAP.

Complement your current infrastructure with on-demand compute services for special projects or longer-term needs in a dedicated, or hybrid environment. HPE and CenturyLink offer you unparalleled choices to enhance security and cost-effectively manage your business.

CenturyLink Cloud Services

Private Cloud (DCC—Dedicated Cloud)

Eliminate complexity, reduce capital spend, customize your environment, and meet compliance and security requirements with dedicated private cloud services. Combine virtualization technology from VMware® with dedicated and multi-tenant hosting platforms. Features include:

- Dedicated, private cloud infrastructure providing secure and compliance-sensitive virtualized hosting
- On-demand instance and storage provisioning
- Full capacity management and customizable monitoring
- High availability instance failover with 99.9 percent service-level agreement (SLA)
- Multi-OS environment

CenturyLink Managed Hosting Services

Dedicated Server Hosting

Remove the burden of managing infrastructure. CenturyLink Dedicated Server Hosting reside in over 30 Uptime Institute M&O certified data centers across 4 continents.

- Enterprise-class HPE ProLiant DL series servers and HPE BladeSystem c-Class servers, providing improved economies of scale
- Simplified OS administration through Integrated Lights-Out (iLO) portal or manage your own OS
- Access to the CenturyLink Hosted Area Network (HAN)
- Highly secure, locked cage
- Lower services cost

Managed SAP HANA®

CenturyLink's comprehensive end-to-end SAP® solutions from strategy to design and infrastructure to analytics are designed to optimize your applications and data analytics. Our secure infrastructure and expert managed services enable rapid and reliable access to business-critical SAP applications and data to your global workforce.

- SAP-certified infrastructure for hybrid deployments via cloud, managed, colocation or on-premises
- Expert SAP application and SAP HANA® migration, management, and development services from CenturyLink compliment and expand your IT organization's resources and expertise
- Expert Data Scientists and Big Data Architects with extensive industry experience and proven methodologies consistently deliver high quality data science and predictive analytics results in an accelerated manner.

Big Data & Advanced Analytics Solutions

Expedite time-to-decision with CenturyLink's Big Data services built on HPE Converged Infrastructure. Leverage a fully hosted managed hardware and software solution and expert advanced analytics services to fully leverage the business insights within your data. Features include:

- Managed services, from Big Data environment planning and implementation services to complete management of your Cloudera Hadoop distribution.
- Dedicated team of experienced Data Scientists and Big Data Architects to facilitate each engagement from concept through implementation and data analytics.
- Flexibility to integrate analytics capabilities and Big Data application development as part of a custom solution.

Solution brief

Storage

Many CenturyLink data centers worldwide provide storage agility with HPE storage built into our solutions.

Now you can control the data explosion and associated storage costs while maintaining availability for broad organizational 24x7 demand. While maintaining agility, control, and access, you'll get the security, power, compliance, and return on investment (ROI) your business needs. Features include:

- Choose from block or file storage
- Shared or dedicated options
- Quick management-portal provisioning for Storage
- Area Networks (SANs)
- Snapshot and replication options

- 99.99% uptime SLA for business applications
- Scalability from gigabytes to petabytes
- Advanced reporting and alerts

High-Performance Grid Computing

Grid computing solutions from CenturyLink provide one of the fastest, most scalable, and lowest-cost high-performance computing (HPC) platforms for critical applications.

Features include:

- Powered by HPE, with over 150,000 cores under management in our data centers
- An outsourced, on-demand grid to deliver massive computational power
- Hyperscale cloud instances for a roadmap to build HPC applications in a true, scalable cloud for ephemeral workloads
