

# **Business Acceleration through IT Balance**

Symmetry's Enterprise Application  
Cloud-Hosted Solutions powered by HPE

## **How is your balance?**

As a leading firm, you require on-demand capability to optimally manage your core business systems. Outsourcing data center services in a hosted or cloud environment is becoming a widely accepted method for businesses to manage their rapidly evolving enterprise resource planning (ERP) software and hardware needs.

Together, Symmetry and Hewlett Packard Enterprise give customers access to the world's cutting-edge technology, surrounded by expert and certified support. This includes hosting and cloud services, technical administration, implementation, and upgrades and migrations, as well as project-based services and multiple layers of security to uphold data integrity. Solutions can include data recovery services to keep businesses fully operational in the event of a disaster.

By allowing a partner to provide their data centers for them, organizations can use the latest technology, expertly hosted

and managed offsite, eliminating the need to support the technology internally. All licensing and updates are handled by a service provider and partner without delay, enabling quick and ongoing access to one of the most advanced IT solutions and support systems available, including in-memory, high-performing database solutions.

## **The right choice**

Symmetry can help you reduce your total cost of operations and achieve unparalleled business agility by combining enterprise-level services and consulting with state-of-the-art data center facilities designed specifically for cloud hosting. Powered by a trusted HPE platform, Symmetry delivers the reliability and performance of HPE technology with the added benefits of the cloud, producing an environment that ensures your enterprise applications perform more efficiently, with improved security and stability, while providing flexibility and scalability to meet the needs of changing workloads.

## Solution brief

As the premier hosting and managed services provider, Symmetry's large data center network with enterprise-class hosting and cloud services provides our customers with the flexibility to host and manage entire data center operations, encompassing multiple platforms such as core business systems, and integrating third-party applications.

## Enterprise cloud solutions overview

Symmetry's enterprise cloud-hosted solutions have security, quality, and affordability built in. Symmetry designed these solutions to provide confidence for our customers. Our integrated, single-source hosted solution draws on high-performing HPE technology and Symmetry's customer-centric approach to deliver an affordable cloud option with 24x7 support from certified experts.

### Enterprise Cloud for SAP

- **Private Managed Cloud**—Your own dedicated cloud infrastructure managed by Symmetry to ensure that everything runs smoothly.
- **Hybrid Cloud**—A customized combination of public and private clouds designed just for your needs.

## SAP HANA cloud solutions

Symmetry is the recognized leader in emerging SAP HANA technology. Symmetry's SAP HANA world-leading cloud solution is powered by two of the world's leading HPE CS900 hardware solutions. This flexible cloud model eliminates the need to commit to a hardware footprint. Symmetry is the only SAP HANA-certified vendor able to offer flexible solutions from 64 GB to 12+ TB. Symmetry's SAP HANA cloud infrastructure was built and supported by industry-leading

networking and security team engineers with security best practices in place. Powered by HPE technologies, Symmetry's cloud solution is a safe, secure, and reliable cloud infrastructure with disaster recovery options built in.

### Symmetry's complete SAP HANA services include:

- Rapid deployment proof of concept
- SAP HANA business assessment
- Migrations/implementation
- Hardware
- Ongoing, steady state support

## Weigh your options

The cloud should be easy. Symmetry tailors every element of its enterprise application cloud solutions to fit the customer's current requirements. This eliminates the commitment to a specific hardware footprint for a long period of time, but allows access to leading-edge technology.

Symmetry's expert, certified engineers will provide you with strategic guidance and technical support from your initial migration to ongoing system management.

Symmetry delivers turnkey hosted solutions catered to your business environment and ERP system. Symmetry helped pioneer SAP technical-administration best practices, and by partnering with HPE, we help our customers join the nearly 50 percent of SAP installations that run on reliable HPE hardware.

### The flexibility and scalability of the Symmetry and HPE cloud solution help you:

- Reduce your total cost of operations with lowered maintenance costs and data center overheads.
- Reduce capital expenditures by paying only for required resources.

- Reduce the complexity of your core ERP environments.
- Implement project cycles quickly and easily by setting up testing systems, sandbox environments, and production environments.
- Utilize built-in disaster recovery options.

Symmetry is a premier application cloud hosting and managed services provider and a certified SAP partner in hosting, cloud services, SAP HANA operations-services, and a local source for HPE CloudAgile hosting services.

## Find your balance

Symmetry is more than a vendor. It is a right-sized service partner with deeply rooted ERP application hosting management and SAP-certified experience since its start in 1996. We deliver cost-effective services with the highest customer quality, with U.S.-based consultants for 24x7x365 access.
