

Hewlett Packard Enterprise

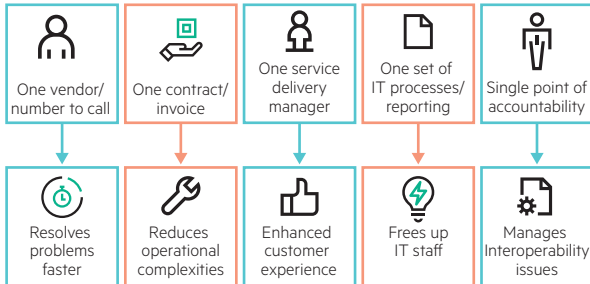

Flexible Support for Heterogeneous IT environments

The HPE Datacenter Care for Multivendor experience

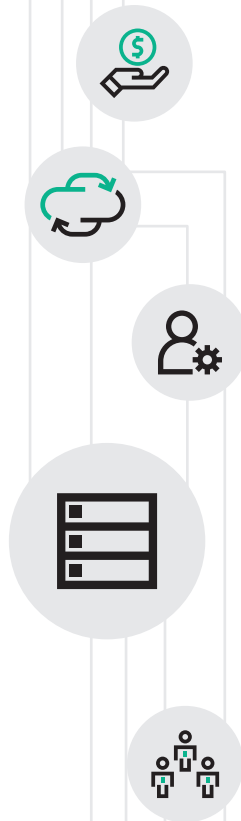

HPE Datacenter Care for Multivendor is built and integrated with Datacenter Care. It offers the ability to consolidate and simplify multiple contracts you may have with your vendors. This service allows you to have a single point of accountability to resolve complex interoperability issues often associated with virtualized and cloud IT. It gives you a simplified approach to your IT operation needs with the Power of One.

HPE Datacenter Care for Multivendor: The Power of One

Simplify your IT operations

HPE Datacenter Care for Multivendor: ROI

HPE Datacenter Care for Multivendor helps Virgin Media consolidate several support contracts to just one vendor, cut costs, improve accountability and lift service availability.

“It is literally just one single engagement. HPE takes full accountability. They're running support from start to finish and giving us updates from across our multivendor platform.”

- Colin Miles, IT director Technical Services, Virgin Media

HPE Datacenter Care for Multivendor helps Adecco aggregate all existing agreements into a single contract, with a single point of contact and uniform standard terms, billing and processes.

“With the HPE Datacenter Care for Multivendor contract, we placed our support services in the hands of a reliable and trustworthy provider, cutting overhead costs and reducing the time we spend managing vendors.”

- Felix Wiebel, IT specialist, Adecco
