

Conflict Minerals Declaration (CMD) Manager

Helping meet reporting requirements of the Dodd-Frank Act

CMD Manager supports all Conflict Free Smelter Initiative CMR template versions and assists you in the declaration process under section 1502.

Complying with section 1502 of the Dodd-Frank Act

The Wall Street Reform Bill requires companies that use tin, tungsten, tantalum or gold (3TG) in their products (see figure 1), or in the production of their products, to file an annual disclosure report with the Securities and Exchange Commission. The origins of

these minerals must be reported when they are from the Democratic Republic of Congo or its adjoining countries (see figure 2). Even if your company is not subject to the Dodd-Frank Act, if your clients or their clients are subject to the act, you are likely to be required to provide a Conflict Minerals Declaration. Additionally, there are similar legislations in review in the EU and Asia.

CMD Manager within CDX

- Import and export in Excel format
- Based on CMR templates
- Create, send, receive, roll up, and validate CMDs
- Comprehensive analysis tools
- Quality control
- Sort and group smelters
- Automatic email invitation of your suppliers (single and bulk request)
- Service based on fixed price per calendar year
- Centralized database and web-based application
- Backup and security
- Multilingual help desk
- Continuously updated smelter list from CFSI
- Capability to interface with your in-house systems
- 24/7 availability and global operations

Analysis tools

CMD Manager provides the analysis tools to help you to validate your conflict minerals data.

CMD202

- Gold (Au) - 2ndGoldMine - Aruba
- Gold (Au) - OtherGold - Angola
- Tin (Sn) - PT BilliTin Makmur Lestari - Indonesia
- Tantalum (Ta) - Solikamsk Metal Works, Solikamsk, Russia -
- Tantalum (Ta) - Tantalite Resources, Modderfontein, Gauteng - South Africa
- Tungsten (W) - ATI Tungsten Materials - United States

Legend

- Conflict-free smelters specified by CFSI
- Standard smelters defined in CFSI CMRT
- Registered smelter companies in CDX
- Alleged smelters defined by users in CDX
- Invalid smelters representing distributors or other supplies not actually involved in smelting

Figure 2: Smelter types are shown by color.

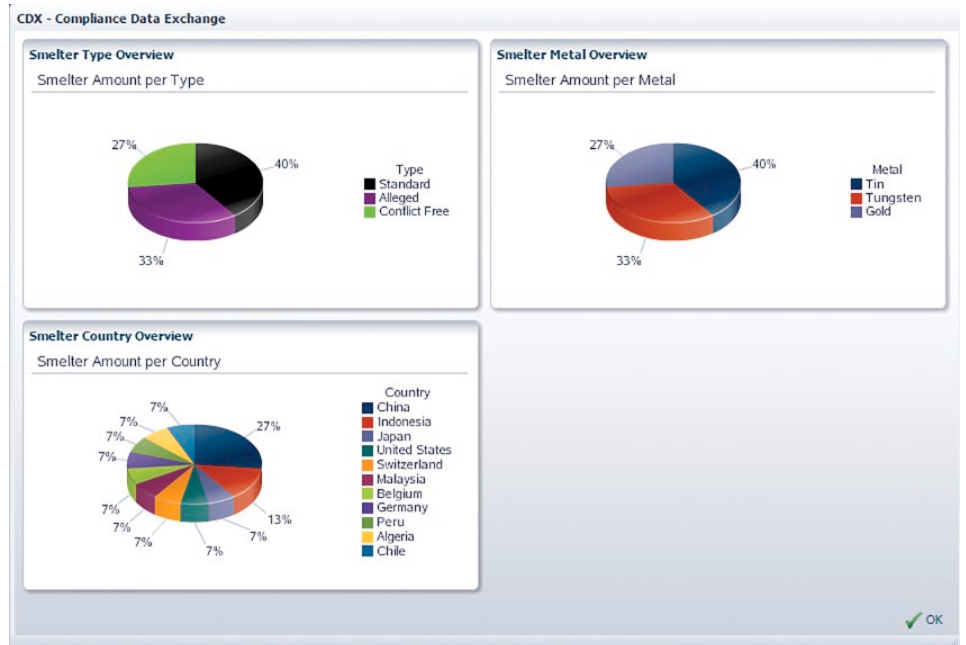

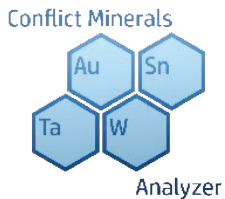

Figure 3: Graphical information about the smelters reported in your own or your suppliers' CMD.

IMDS Conflict Minerals Analyzer

The Conflict Minerals Analyzer (CMA) allows all users of the International Material Data System (IMDS) to send their conflict minerals information to the CMD Manager within CDX for free. It provides you with quick and easy examination of existing material data sheets for conflict

minerals, after which you send the results to CDX. And then CDX automates creation of email requests asking your suppliers to submit a Conflict Minerals Declaration.
