

# Enable workforce productivity

## HPE Converged and Hyper Converged Systems with VMware Horizon 7

Give users access to virtual desktops, applications, and online services through a single digital workspace.

### Fully integrated, pre-tested client virtualization solutions

VMware Horizon 7 transforms client virtualization, with unprecedented simplicity, security, speed, and scale—along with lower costs.

With VMware Horizon 7, you can get up and running up to 30X faster while cutting costs by as much as 50 percent compared to traditional solutions.<sup>1</sup>

### Empower productivity

In the idea economy, you need to empower workers to be as productive as possible. In the past, inadequate support and poor experiences on mobile devices stifled productivity and prompted user workarounds that created corporate risk. But a new day is dawning for client virtualization, one where you can deliver unfettered access to apps and information, with a superior user experience that empowers workplace productivity.

### Build a single, digital workspace

VMware® Horizon® 7 lets you extend the power of virtualization to all the devices your workforce wants to use, giving them the power to access Windows® and Linux® apps alongside iOS or Android applications.

With VMware Horizon running on HPE Converged and Hyper Converged Systems with VMware, you can deliver desktops and applications through a single platform. Your workforce becomes unfettered, and their productivity and job satisfaction soars as they gain the ability to access desktop and application services from one digital workspace, across devices, locations, media, and connections.

With complete workspace environment management and software-defined data center (SDDC) optimization, VMware Horizon 7 helps you control, manage, and protect all of the resources users want, with the performance they demand, and the speed and cost efficiency the business requires.

## Harness the power of convergence

HPE Converged and Hyper Converged Systems with VMware address the new requirements of the idea economy with tightly integrated, workload-optimized systems, preconfigured to meet a range of business needs. HPE engineering has done all the testing and validation so that HPE Converged System offerings can be deployed easily and rapidly to support a variety of virtualized application environments—and IT professionals can focus their time on critical activities. These systems also include specific technologies that address business objectives such as lower costs, increased performance, and high availability.

### Expertise at every turn

Accelerate implementation and adoption of HPE client virtualization solutions with our consulting, integration, and education services.

### Mobility and workplace services

### HPE Hyper Converged 250 System

If you're looking for a simple, agile, and highly available virtualization system, the HPE Hyper Converged 250 family eliminates complex solution stacks. It combines a powerful HPE Apollo server platform and mature HPE StoreVirtual data services into a single building block to simplify the delivery of virtualized servers and desktops. HPE Hyper Converged 250 family with VMware Horizon provides a turnkey virtualization solution for medium-sized businesses, enterprises, and IaaS providers.

### HPE Hyper Converged 380 System

The HPE Hyper Converged 380 System with VMware Horizon is ideally suited for the performance and scalability requirements of client virtualization deployments. It delivers architectural flexibility, extreme performance, and rapid, simple scaling to meet both IT and business needs. With its simplified management and linear scaling, you can start with as few as two nodes and scale up to thousands of users, one node at a time. This flexibility significantly reduces your initial deployment and expansion costs.

### HPE ConvergedSystem 700

Purpose-built HPE ConvergedSystem 700 is optimized to meet your virtualization needs. Delivered as an integrated system,

HPE ConvergedSystem 700 with VMware Horizon is an ideal infrastructure for deploying a workplace productivity solution or supporting any other virtualized workloads in your environment. Each open, flexible, and scalable system ships with server, storage, networking, and management components—all preconfigured, tested, and validated in the HPE factory—allowing you to deploy your new system in weeks, not months.

### HPE Converged Architecture 700

While a pre-built system is the right choice for many organizations, others want more flexibility when selecting hardware components. If greater flexibility is a must for your virtualized, cloud, or workplace productivity environment, HPE Converged Architecture 700 enables you to deploy VMware Horizon on your own terms. You can work with the qualified HPE channel partner of your choice to deploy this flexible solution, which protects the investments you've already made in HPE components and integrates them into your existing IT environment.
