

Overview

HP CloudSystem Matrix (Retired)

Starter Kit

Starter Kit - Front

1. Onsite CloudSystem Matrix Starter Kit Implementation
2. Central Management Server (CMS)
HP ProLiant DL360p Gen8 server (recommended CMS)
3. Complete Matrix OE (including Insight Control) and Virtual Connect Enterprise Manager.
4. 16 half-height device bays available for populating with server blades
5. HP BladeSystem c7000 enclosure, single phase

Starter Kit - Rear

1. HP Intelligent Series rack, and rack and power options
NOTE: Rack is not included with the Matrix Starter Kit
2. Shown above with HP 3PAR StoreServ 7200 Storage. HP Fibre Channels SAN supported include HP EVA, 3PAR F-Series, T-Series, P10000 and 3PAR StoreServ 7200 , 7400 & 10000
3. Interconnect bays 3 & 4 available for additional HP Virtual Connect FlexFabric modules (redundant pair)
OR (not shown) HP Virtual Connect 8Gb 24-Port FC modules (redundant pair)
4. HP Virtual Connect FlexFabric modules (redundant pair)
OR (not shown) HP Virtual Connect Flex-10 10-Gb Ethernet modules (redundant pair), OR HP Virtual Connect Flex-10/10D Module

Overview

Expansion Kit

Expansion Kit - Front

1. Onsite CloudSystem Matrix Expansion Kit Implementation Service (for Expansion Kit orders purchased after an initial Matrix environment is implemented)
2. 16 half-height device bays available for populating with server blades
3. Complete Matrix OE (including Insight Control) and Virtual Connect Enterprise Manager
4. HP BladeSystem c7000 enclosure

Expansion Kit - Rear

1. HP Virtual Connect FlexFabric modules (redundant pair) OR (not shown) HP Virtual Connect Flex-10 10-Gb Ethernet modules (redundant pair), OR (not shown) HP Virtual Connect Flex-10/10D Module
2. Interconnect bays 3 & 4 available for additional HP Virtual Connect FlexFabric modules (redundant pair) OR (not shown) HP Virtual Connect 8Gb 24-Port FC modules (redundant pair), OR (not shown) HP Virtual Connect Flex-10/10D Module

NOTE: All HP CloudSystem Matrix infrastructure ships with licensed disaster protection for both physical and virtual servers, in coordination with data replication provided by EVA, XP Continuous Access software, or 3PAR. Disaster recovery protection can be achieved by implementing a secondary infrastructure at a remote location, and enabling storage replication between the two sites.

What's New

Updates for version 7.4 include:

- Support for recently released HP ProLiant Gen9 servers (including BL460c blade for CloudSystem solutions)
- Hyper-V enhancements (Generation 2 VMs, logical switches, RDM for HA VMs)
- Ability to add/remove networks from physical servers
- Ability to change disk size and user-defined properties at time of service creation

Overview

- GUI customizations and organization enhancements
 - Storage support enhancements
-

Standard Features

Product Features

HP CloudSystem Matrix is Infrastructure-as-a-Service (IaaS) for private and hybrid cloud environments, allowing users to provision infrastructure in minutes for physical and virtual. This offering includes a self-service infrastructure portal for quick auto-provisioning, along with built-in lifecycle management to optimize infrastructure, manage the resource pools, and help ensure uptime. Matrix is integrated by design with broad support of heterogeneous environments including cloud-bursting to a variety of public cloud providers including HP Cloud Services.

- Provision infrastructure and applications in minutes for physical and virtual.
- Reduce TCO up to 56% with built-in infrastructure life-cycle management.
- Integrated by design; includes support of heterogeneous environments.

HP Cloud Maps accelerate automation of cloud service deployments and ensure consistency and reliability of the implementation of service catalogs.

HP CloudSystem Matrix is optimized for HP ProLiant and HP Integrity servers as well as HP storage and HP networking, but also supports 3rd party x86 servers, networking, and storage. Supported operating systems are Windows, Linux and HP-UX. Supported hypervisors include VMware, Microsoft HyperV, Red Hat KVM, and Integrity VMs.

<http://www.hp.com/go/csa4matrix>

HP CloudSystem Matrix

How to order HP CloudSystem Matrix

Ordering HP CloudSystem Matrix

The method for purchasing HP CloudSystem Matrix is simple. Start by ordering a HP CloudSystem Matrix Kit for ProLiant, which contains the infrastructure needed for a fully-working environment supporting up to 16 HP ProLiant half-height server blades. Add additional kits now or in the future to expand your HP CloudSystem Matrix infrastructure with additional infrastructure and blades. The central management server (CMS) host implemented with the first kit simply extends its domain to manage additional infrastructure that might be added with additional Matrix kits.

NOTE: Additional expansion kits may also be purchased separately. Expansion kits ordered separately will come with the Matrix Expansion Kit Integration Implementation Service.

NOTE: Additional expansion kits purchased must be co-located with the initial kit to which they are connecting to.

NOTE: For detailed ordering information please see the Configuration Information Factory Integrated Models section of this QuickSpecs.

With all HP CloudSystem Matrix kit orders, the following services are included:

- Factory services to default configure, rack, and cable the infrastructure in a rack,
- Verify and update firmware for the entire solution being purchased (the CloudSystem Matrix kits and the supported blades and options purchased with those kits) to the latest current CloudSystem Matrix firmware release set. This ensures that the CloudSystem Matrix solution will leave the factory with the right levels of firmware needed for the end to end solution to be successful. (For specific version numbers supported and required, please refer to the HP CloudSystem Matrix Compatibility Chart on <http://www.hp.com/go/matrixcompatibility>)
- Coordinate hand-off to Technology Services (TS) or authorized partner. A TS or partner project manager is assigned for managing pre-engagement and assigning a team of engineers to perform the implementation service at the customer's site.

Factory Express custom configuration services should be added to the order if an EVA configuration is also purchased in the same rack with Matrix kits, or if any other custom factory services are needed. Factory Express uses its standard processes for capturing customer intent and requirements, as well as providing order verification services.

While Factory Integration/Factory Express are building the CloudSystem Matrix environment for a given customer, an assigned project manager from Technology Services (TS) will begin managing a team of TS engineers to start planning the rollout of the implementation service, including engaging with the customer on environmental requirements and related details. TS engineers will start the actual implementation on the Matrix equipment as soon as possible after its arrival date at the customer site.

NOTE: The account team must initiate contact with a Factory Express Engagement Project Manager (EPM) to initiate the Factory Express processes, including communication of the Customer Intent Document (CID).

The Technology Services CloudSystem Matrix Starter Kit Implementation Service is detailed in a section below.

HP CloudSystem Matrix

HP Matrix Operating Environment

The HP Matrix Operating Environment is cloud management software for infrastructure as a service (IaaS) that enables you to:

- Design and provision infrastructure services in minutes via a self-service portal
- Optimize infrastructure for capacity planning and showback/chargeback
- Protect service continuity with automated cost-effective failover

The HP Matrix Operating Environment, which includes HP Insight Control, is at the core of the HP CloudSystem Matrix, an infrastructure as a service (IaaS) solution for private and hybrid cloud deployments, built on proven HP Converged Infrastructure technologies. It is available for both HP ProLiant and HP Integrity servers as well as for provisioning third party x86 virtual machine environments.

NOTE: See the [HP Matrix Operating Environment for ProLiant QuickSpecs](http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html) for more details http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html (Worldwide)

HP CloudSystem Matrix Starter Kit Implementation Service (onsite), plus additional services

In addition to the CloudSystem Matrix Implementation Service, HP highly recommends HP Education Services (for customer training and education) and additional Technical Services, as well as in-depth installation or implementation services as needed. These recommended services are listed in the "HP Care Pack services" section later in this document. The onsite CloudSystem Matrix Implementation Service for the starter kit consists of these steps:

- Upon delivery to customers site, unpack and inspect for damages
- Integrate kits (included in the initial kit order, maximum of 5 total Matrix kits. Additional Matrix expansion kits on same order require Matrix Expansion Kit Implementation Service) hardware in to customers environment, power, network cabling
- Installation and configuration of the central management server (CMS)
 - Installation and configuration of the software required for management
- Deployment of operating systems to configured LUNs on the optionally purchased EVA P6000, 3PAR or other HP SAN or an existing SAN
 - 1 HP server blade running a native OS of the customer's choice (Windows, Linux) on a boot LUN
 - 2 HP server blades each running a single hypervisor of the customer's choice (VMware ESX, Microsoft Hyper-V or KVM), each on their own boot LUN (hypervisor licenses are customer provided unless purchased from HP as part of the order)
NOTE: Installation and deployment of KVM requires additional service credits. See [section on Ordering CloudSystem Matrix](#).
 - Configuration of up to 2 VMs
 - 1 HP server blade installed and configured to be a target for a blade move
- Configure up to two physical target server operating systems to boot from SAN
 - Orientation of the CloudSystem Matrix solution
 - Navigation through installed components and all management software
 - Review of the configured hardware components and their configuration
 - Review of the completed system topology
 - How to call HP for support
 - Availability of additional services, educational services, etc. See: <http://www.hp.com/services/insight> and <http://www.hp.com/learn/proliant>

HP CloudSystem Matrix

- CloudSystem Matrix demonstrations. See: <http://www.hp.com/go/matrix>

HP CloudSystem Matrix Expansion Kit Integration Implementation Service (onsite) Ordering additional CloudSystem Matrix expansion kits after the initial CloudSystem Matrix kit order or installing more than 5 total kits during the initial installation, includes the CloudSystem Matrix Expansion Kit Integration Implementation Service. Each CloudSystem Matrix Expansion Kit Implementation Service will integrate up to four Matrix expansion kits to an existing Matrix customer environment (single Matrix CMS server). The onsite CloudSystem Matrix Expansion Kit Integration Implementation Service for the Expansion Kits consists of these steps:

- Upon delivery to customer's site, unpack and inspect for damages
- Integrate Matrix Expansion Kits hardware in to customer's environment, power, network cabling
 - Change the firmware versions to be compatible with the version requirements of the existing CloudSystem Matrix customer environment
- Configure up to one physical target server operating systems to boot from SAN
- Perform one of the CloudSystem Matrix demonstrations to verify the Expansion Kits integration is completed successfully.

HP CloudSystem Matrix Conversion Services HP CloudSystem Matrix Conversion Services convert your existing HP BladeSystem equipment into a fully operational CloudSystem Matrix solution. Converting your existing equipment allows you to build on the investment in your BladeSystem infrastructure and benefit from the advantages that a CloudSystem Matrix solution provides. These services apply to both BladeSystem and BladeSystem-based HP VirtualSystem infrastructures.

CloudSystem Matrix Conversion Services can be used in different combinations to create and/or expand a CloudSystem Matrix, allowing you to:

- Convert a single BladeSystem enclosure and BladeSystem equipment into an initial CloudSystem Matrix configuration
- Include additional enclosures during the conversion process
- Expand your existing CloudSystem at any time by converting and incorporating your BladeSystem enclosures

NOTE: For additional information, see: <http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA3-9863ENw.pdf>

Warranty services

The support provided for CloudSystem Matrix uplifts the standard BladeSystem warranty to include 24x7 4hr onsite response for Matrix hardware and 2 hr response for software. Matrix customers will have a system identifier for CloudSystem Matrix that, when provided to the call center by the customer, routes the call to a specially trained team that can expertly support CloudSystem Matrix specifically as well as the necessary software and firmware revisions to support it.

The HP CloudSystem Matrix infrastructure is covered by a global limited warranty and supported by HP Services and a worldwide network of HP Authorized Channel Partners. Hardware diagnostic support and repair is available for three years from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Additional support may be covered under the warranty or

HP CloudSystem Matrix

available for an additional fee.

- Offered for CloudSystem Matrix are "uplift" HP Care Pack Services options that extend warranty service period up to 4-, or 5- years across the entire hardware and software infrastructure from the following default included levels of warranty support:
 - Enclosure: Three-year, 24x7 (4 hour response) parts and labor, on-site limited global warranty. Certain restrictions and exclusions apply
 - Enclosure options: fans, power supplies, Onboard Administrator, covered with the enclosure warranty
 - HP Virtual Connect interconnects: 3 Year parts and labor, on-site regardless of the warranty period for the system in which they are installed
 - HP Insight software: 3 Year 24 x 7 Technical Support and Update Service
 - HP Storage Fibre Channel switches have a maximum warranty period of one (1) year regardless of the warranty period for the system in which they are installed

NOTE: For additional information, see: <http://www.hp.com/go/bladestystem> and <http://www.hp.com/services/insight>.

HP Matrix Operating Environment Support

HP Matrix Operating Environment includes three years of 24 x 7 HP Software Technical Support and Update Service. This service provides access to HP technical resources for help in resolving software implementation or operations problems. The service also provides access to software updates and reference manuals either in electronic form or on physical media as they are made available from HP.

With this service, HP CloudSystem Matrix users benefit from expedited problem resolution and proactive notification and delivery of software updates.

As part of your implementation service, HP services personnel or your authorized provider will activate your HP Software Technical Support and Update Service for Matrix OE at: <http://www.hp.com/services/insight>.

Your Service Agreement Identifier (SAID) will be delivered to you after registration. After you have received your SAID, you can go to the software update manager (SUM) web page to view your contract online and elect electronic delivery (in addition to standard media-based updates). For more information about this service, see: <http://www.hp.com/services/insight>.

HP offers a number of software support services, many of which are provided to customers at no additional charge.

Join the Discussion at: <http://www.itrc.hp.com>

The HP Support Forum is a community-based, user supported tool for HP customers to participate in discussions amongst the customer community about HP products. For discussions related to HP Insight software, see the "Management Software and System Tools" area.

HP Worldwide Customer Service contact numbers are available at: <http://www.hp.com/country/us/en/wwcontact.html>.

HP CloudSystem Matrix -- Extended Infrastructure -- HP Matrix Operating Environment extends its software functionality beyond HP CloudSystem Matrix across all HP ProLiant and HP Integrity servers as well as any x86 3rd party servers which are

HP CloudSystem Matrix

supported by VMware, Microsoft HyperV and Red Hat KVM.

CloudSystem Matrix support for this extended infrastructure includes key capabilities of HP Matrix Operating Environment such as designing, self-service portal with auto-provisioning for virtual environments and capacity planning, i.e. physical server deployment is not supported (**NOTE:** recovery management for virtual only is supported on HP rackmount servers and HP blade servers without Virtual Connect). All capabilities of HP Matrix Operating Environment are supported for HP BladeSystem servers with Virtual Connect.

NOTE: See the [HP Matrix Operating Environment for ProLiant QuickSpecs](http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html) for additional information: http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html (Worldwide)

CloudSystem Matrix for supported extended virtual machine managed nodes is listed in the HP Insight Software Support Matrix document for Matrix Operating Environment.

Customer support for Matrix extended infrastructure servers is handled the same way as HP Matrix Operating Environment standalone software. Matrix extended infrastructure is subject to the same software licensing requirements as Matrix Operating Environment.

NOTE: See the [HP Matrix Operating Environment for ProLiant QuickSpecs](http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html) for more details http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html (Worldwide)

HP Financial Services

To support customers' transition, HP Financial Services (HPFS) can help in a way that you may not have considered. HPFS can help you invest in your business while preserving precious capital.

For more information, contact your local HP Financial Services Representative. In the United States, call 1-888-277-5942. In Canada, dial 1-800-HP-LEASE. For more information please visit: <http://www.hp.com/hpfinancialservices> for links to HP Financial Services around the world.

HP ProLiant Instant Capacity Program (U.S. only)

The ProLiant Instant Capacity program (U.S. only) provides cost-effective "just in time" inventory protection. ProLiant iCAP is designed to provide "ready to run" servers for immediate activation, while avoiding up-front costs.

- Supported servers include BladeSystem ProLiant (and ML/DL) servers deployed via Direct fulfillment
- Uses HP Systems Insight Manager, automated, billing and tracking process upon activation and consumption
- Servers can be pre-racked, pre-imaged, and tested in preparation of activation
- Amortize total blade infrastructure (rack, enclosure, power, interconnects) over the total number of blades
- Warranty commences once customer has been invoiced (title exchanges)
- Price captured at time of shipment
- Ability to reset target inventory levels in real time

HP Utility Ready Computing on Matrix

HP Utility Ready Computing blades (URB) are pay-for-use infrastructure that resides at your site, billed monthly by HP based on metered power-on time, and transfers cost of blade servers and associated infrastructure from CapEx to OpEx in an alternative way from a traditional lease.

HP CloudSystem Matrix

The URB Advantage:

- Aligning costs with utilization
- Reduce upfront expenses
- React instantly to changing demands
- Effective Chargeback mechanism
- And it's at your site, you maintain control!

With CloudSystem Matrix, customers can add Utility Ready Computing blades to their Matrix enclosures and leverage the benefits offered by utility ready computing.

NOTE: Customers cannot mix non-URC blades with URC blades same in same enclosure, they should be housed in separate enclosures.

NOTE: For additional information, please see:

http://h18000.www1.hp.com/products/blades/components/utility.html?jumpid=reg_R1002_USEN

Factory Express Portfolio for Servers and Storage For HP CloudSystem Matrix, HP Factory Express services are added if the EVA P6000 SAN or 3PAR is purchased with the CloudSystem Matrix Starter Kit. If other custom requirements or intents are required for a given customer's CloudSystem Matrix order, Factory Express capabilities may also be called upon. HP Factory Express offers configuration, customization, integration and deployment services for HP servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed.

Factory Express offers service packages for simple configuration, racking, installation, complex configuration and design services as well as individual factory services, such as image loading, asset tagging and custom packaging. HP products supported through Factory Express include: a wide array of servers and storage: HP Integrity servers, HP ProLiant servers, HP ProLiant & Integrity c-Class BladeSystem server blades, HP 9000 servers as well as the MSAxxxx, VA7xxx, EVA, and XP storage products, rackable tape libraries and configurable network switches.

For more information on Factory Express services please contact your sales representative or go to:

<http://www.hp.com/go/factory-express>

HP Simple Configurator SCE is a guided self service tool to help sales and non technical people provide customers with initial configurations in 3 to 5 minutes. You may then send the configuration on for configuration help, or use in your existing ordering processes. If you require "custom" rack configuration or configuration for products not available in SCE, please contact HP's Customer Business Center or an Authorized Partner for assistance. <http://www.hp.com/products/configurator>

Rack Airflow Requirements

HP rack cabinets

The increasing power of new high-performance processor technology requires increased cooling efficiency for rack-mounted servers. The HP 10000 G2 Series racks provide enhanced airflow for maximum cooling, allowing these racks to be fully loaded with servers using the latest processors.

NOTE: For operation with the DC Input Module the HP 1200mm deep rack is required to allow DC power cabling to be installed

CAUTION: CloudSystem Matrix infrastructures are best fulfilled with HP racks. However, if a third-party

HP CloudSystem Matrix

rack is used, observe the following additional requirements to ensure adequate airflow and to prevent damage to the equipment:

- Front and rear doors: If your 42U server rack includes closing front and rear doors, you must allow 830 square inches (5,350 sq cm) of holes evenly distributed from top to bottom to permit adequate airflow (equivalent to a required 64 percent open area for ventilation).
- The clearance from face of rack to inside of the front door needs to be a minimum of 1.75".
- Side: The clearance between the installed rack component and the side panels of the rack needs to be a minimum of 2.75 inches (7 cm).
- Depth: a minimum of 39.4 inches (1000mm) for AC power, 47 inches (1200mm) for DC power input
- Adjustable rack rails are shipped with each enclosure:
 - Minimum rail length: 25 inches (635mm)
 - Maximum rail length: 34 inches (864mm)

CAUTION: Always use blanking panels to fill all remaining empty front panel U-spaces in the rack. This arrangement ensures proper airflow. Using a rack without blanking panels will result in improper cooling that can lead to thermal damage.

Ordering CloudSystem Matrix

Configuration Information Factory Integrated Models - HP CloudSystem Matrix - Starter Kit

NOTE: This section lists the required steps for ordering a HP CloudSystem Matrix.

NOTE: All HP CloudSystem Matrix infrastructure ships with licensed disaster recovery protection for both physical and virtual servers, in coordination with data replication provided by EVA or XP Continuous Access software. Disaster recovery protection can be achieved by implementing a secondary infrastructure at a remote location, and enabling storage replication between the two sites.

NOTE: To ensure only valid configurations are ordered, HP recommends the use of an HP approved configurator or contact your local sales representative for additional information on product offerings and requirements.

NOTE: FIO indicates that this option is a Factory Integrated Option.

Step 1: Select HP Intelligent Series Rack (Recommended, per notes immediately below)

NOTE: For additional HP Rack information please visit:

<http://h18004.www1.hp.com/products/servers/proliantstorage/racks/intelligentseries/index.html>

NOTE: For additional Rack Options please see the "Additional Options" section of this QuickSpecs.

NOTE: The Starter Kit is recommended to be ordered with an HP rack. When not ordering with a rack, it is necessary for the customer to rack any CloudSystem Matrix enclosures in a rack prior to HP arriving onsite to complete the CloudSystem Matrix Implementation Service. You may purchase the HP Install c7000 Enclosure and Server Build Service to assist with onsite racking and cabling of CloudSystem Matrix enclosures into a rack. See the "HP Care Pack services" section later in this document for the part numbers.

HP Rack Series

HP Intelligent Series racks

HP 642 1075mm Shock Intelligent Series Rack	BW904A
HP 642 1075mm Pallet Intelligent Series Rack	BW903A
HP 642 1200mm Shock Intelligent Series Rack	BW908A
HP 647 1075mm Shock Intelligent Series Rack	BW912A
HP 647 1200mm Shock Intelligent Series Rack	BW914A
HP 642 1200mm Pallet Intelligent Series Rack	BW907A
HP 647 1075mm Pallet Intelligent Series Rack	BW911A
HP 647 1200mm Pallet Intelligent Series Rack	BW913A

NOTE: Please see the QuickSpecs for Technical Specifications and additional information:

http://h18004.www1.hp.com/products/quickspecs/14223_div/14223_div.html
(Worldwide)

NOTE: For additional information regarding Rack Cabinets, please see the following URL: <http://www.hp.com/go/rackandpower>.

Step 2: Select Required Configurable HP CloudSystem Matrix Starter Kit (Choose one of the following from each list unless otherwise noted)

HP CloudSystem Matrix Starter Kit

NOTE: Starter Kit default components means HP ordering systems will default these selections when any unique HP CloudSystem Matrix part number is entered. The default selections can be changed to meet customer needs.

NOTE: The Starter Kit does not include a central management server or CMS (see BladeSystem c-Class server blades section below for CMS server).

Hardware Components

HP CloudSystem Matrix for ProLiant v2 Kit	708919-B21
---	------------

Ordering CloudSystem Matrix

NOTE: The configurable starter kit can be defined as either Starter or Expansion Kit with applicable services applied appropriately when configured.

HP CloudSystem Matrix Modular Kit (Hardware Components) includes:

- HP BladeSystem c7000 enclosure and 10 fans
- HP BladeSystem c7000 Onboard Administrator with KVM (keyboard, video, mouse) option, redundant pair

HP Virtual Connect Option (required choice of one):

- HP Virtual Connect FlexFabric 10Gb 24-port Module, redundant pair
- HP Virtual Connect Flex-10 10GB 24-port Module, redundant pair with HP Virtual Connect 8Gb 24-port Fibre Channel Module, redundant pair
- HP Virtual Connect Flex-10/10D 30-port Module, redundant pair with HP Virtual Connect 8Gb 24-port Fibre Channel Module, redundant pair

c7000 Power Option (required choice of one):

- Single phase (QTY of 6)
- 3-Phase (QTY of 6)
- DC Power (QTY of 6)

HP Matrix OE Software (required choice of one)

- Matrix Operating Environment 16-server license, 3 year 24/7 support and updates
- Matrix Operating Environment 8-server license, 3 year 24/7 support and updates

NOTE: Additional Matrix OE licenses may be purchased separately.,

NOTE: See the HP Matrix Operating Environment for ProLiant QuickSpecs for additional information:

http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html
(Worldwide)

NOTE: Following are the VC FlexFabric transceiver/SFP options.

HP BladeSystem c-Class 10Gb SFP+ SR Transceiver	455883-B21
HP BladeSystem c-Class 10Gb SFP+ LR Transceiver	455886-B21
HP BladeSystem c-Class 10Gb SFP+ LRM Transceiver	455889-B21
HP BladeSystem c-Class Virtual Connect 1G SFP SX Transceiver	453151-B21
HP BladeSystem c-Class Virtual Connect 1G SFP RJ-45 Transceiver	453154-B21
HP 8Gb Shortwave B-series Fibre Channel 1 Pack SFP+ Transceiver	AJ716B
HP 8Gb Long Wave B-series 10km Fibre Channel 1 Pack SFP+ Transceiver	AJ717A
HP 8Gb Short Wave Fibre Channel SFP+ 1 Pack	AJ718A

NOTE: Following are the VC Flex-10 10Gb Ethernet module transceiver/SFP options.

Software Licenses and media

Ordering CloudSystem Matrix

HP Matrix Operating Environment SW for 16 Server and VCEM for c7000 Enclosure with 3yr 24x7 Support BD683B

HP Matrix Operating Environment SW for 8 Server and VCEM for c7000 Enclosure with 3yr 24x7 Support BD578B

NOTE: One (1) entitlement order number is provided.

NOTE: If the ordering system default of 3 years Technical Support and Update Service is rejected or not selected, the basic 1 year Technical Support and Update Service will apply.

NOTE: The management software licenses packaged with HP CloudSystem Matrix provide licensing to manage HP ProLiant c-Class server blades only, except for Virtual Connect Enterprise Manager software (VCEM) as this is licensed to the actual BladeSystem c7000 enclosure. HP Integrity c-Class server blades require separate licensing. HP-UX customers should order licenses for the HP-UX 11i v3 Virtual Server Environment OE (VSE-OE) or HP-UX 11i v3 Data Center OE (DC-OE) (see: <http://www.hp.com/go/hpux>).

Implementation Service

HP Implementation service for the CloudSystem Matrix Starter Kit UK831E

HP CloudSystem Matrix Starter Kit - Implementation Service, Flexible HA115A1-5NL

NOTE: Includes the installation & configuration of any Matrix Expansion Kit included in the order.

Central Management Server

HP CloudSystem Central Management Kit (DL360p Gen8 128G 2P Server 3y 24x7 Support G6X20A

NOTE: This is the default part number for the Matrix central management server (CMS), to host the management software. It may be substituted with another server configured per notes below and per CMS sizing, scalability, and redundancy preferences.

HP ProLiant DL360p Gen8 CMS server (PN G6X20A) is configured as follows:

- Dual processors - Intel® Xeon® E5-2650v2 processor
- 128 GB (8 x 16GB) 16GB 2Rx4 PC3-14900R-13 Kit Registered DIMMs
- HP 2GB FBWC for P-Series Smart Array
- FlexFabric 10Gb 2P 554FLR-SFP+ Adapter Ethernet 1Gb 4-port 331T Adapter
- 8x HP 300GB 6G SAS 15K 2.5in SC ENT HDD
- HP 82Q 8Gb Dual Port PCI-e Fibre Channel Host Bus Adapter
- HP 9.5mm SATA JB DVDRW Optical Drive
- HP DL360 3 Year, 24x7 4 Hour Response Hardware support

NOTE: Considerations for Central Management Server (CMS) - choice of rack-mount or blade server: HP offers a choice of rack-mounted ProLiant server (DL or ML) as central management server host for HP CloudSystem Matrix. HP recommends the rack-mounted ProLiant DL360p Gen8 as the CMS host (see configuration below) for those customers who desire to use all available and licensed enclosure blade bays for managed target blades and workloads. When multiple management server hosts are required for scalability and high availability or hosting partner management software, multiple ProLiant DL/ML servers or server blades (or even a combination of blade or rack-mounted servers) can be installed and configured to work together to manage the CloudSystem Matrix environment.

This CMS will be devoted to running the CloudSystem Matrix management software; other management software such as VMware vCenter Server should be installed on a

Ordering CloudSystem Matrix

separate server.

NOTE: Larger environments may warrant having multiple CMS servers for these reasons: scalability, high availability of the management server and data, and separation of database or management components for performance or security access reasons.

NOTE: If the recommended HP ProLiant DL360p Gen8 configuration above is not purchased, the customer agrees to supply or purchase other HP ProLiant rack-mount server(s) or HP ProLiant server blade(s) that meet the requirements. See also the CMS requirements in this Insight Management Support Matrix Chapter 2 "Central Management Server Requirements" for more information:
<http://bizsupport2.austin.hp.com/bc/docs/support/SupportManual/c03341309/c03341309.pdf>

NOTE: This CMS should be implemented on a 64-bit Windows operating system. (See Matrix compatibility chart at <http://www.hp.com/go/matrixcompatibility>)

Target server blades

NOTE: It is highly recommended that at least four (4) additional HP ProLiant c-Class blades be ordered with each Starter Kit, because the Onsite Implementation Service includes provisioning of up to four (4) HP ProLiant blades, two of which are directly provisioned as physical servers and two of which are virtual machine hosts. See separate section on "CloudSystem Matrix Starter Kit Implementation Service" for details. All shipping HP ProLiant c-Class blades are supported except the HP ProLiant BL2x220c server blades and workstation blades.

NOTE: For server blade information, please visit:

<http://h18000.www1.hp.com/products/quickspecs/division/12534.html>

NOTE: HP ProLiant server blades should be configured to connect via the Virtual Connect modules included in the CloudSystem Matrix kits. See the sections below on FlexibleLOM and Mezzanine options for further details.

HP Integrity Servers

NOTE: All shipping HP Integrity c-Class blades are supported when configured with Integrity software products. For additional server blade information please visit:

<http://h18004.www1.hp.com/products/quickspecs/division/division.html#12391>.

NOTE: The management software licenses packaged with HP CloudSystem Matrix provide licensing to manage HP ProLiant c-Class server blades and Virtual Connect Enterprise Manager software (VCEM) which is licensed to the BladeSystem c7000 Enclosure. HP Integrity c-Class server blades require separate licensing (except for VCEM software). HP-UX customers should order licenses for the HP-UX 11i v3 Virtual Server Environment OE (VSE-OE) or HP-UX 11i v3 Data Center OE (DC-OE) For additional information, please visit: <http://www.hp.com/go/hpux>. Please refer to ordering information for Integrity Matrix at: www.hp.com/go/matrix.

KVM Management Server

To utilize management of KVM hosts and guests an additional, dedicated management server is required. This KVM management server will be connected to and managed by, via network, the Matrix Central Management Server (listed above). Installation and configuration of the KVM Management Server requires that an additional 3 Implementation days (HK928A1) to be added to the standard CloudSystem Matrix installation offering.

Ordering CloudSystem Matrix

NOTE: Specific hardware and software configuration guidelines for the KVM Management Server can be found within the HP Insight Management Support Matrix, which can be located within the document list at

http://h18013.www1.hp.com/products/servers/management/unified/infolibrary_ic.html

KVM Managed Hosts

CloudSystem Matrix supports KVM managed hosts on servers that are generally supported by Matrix. Specifically, they can be within Matrix enclosures or ProLiant DL or SL servers. ProLiant blades must be housed in either the Matrix Starter or Expansion Kit. The KVM managed hosts may be contained in the same enclosure as other non-KVM hypervisor hosts, or a separate enclosure. The supported KVM blade host must have the following minimum configuration:

NOTE: Specific hardware and software configuration guidelines for the KVM Managed Hosts can be found within the HP Insight Management Support Matrix, which can be located at

http://h18013.www1.hp.com/products/servers/management/unified/infolibrary_ic.html

Federated Central Management Servers for CloudSystem Matrix

To scale beyond a single CloudSystem central management server (CMS) server node limits (physical+virtual), a federated CMS model has been developed.

For more information on CloudSystem Matrix federated CMS implementations please refer to: <http://h20195.www2.hp.com/V2/GetDocument.aspx?docname=4AA3-4721ENW&cc=us&lc=en>

HP requires the following components when implementing a federated CMS solution:

- Additional CMS servers - HP recommends HP CloudSystem Matrix Central Mgmt Svr based on DL360p Gen8, 32GB, 2P Server (PN 66224-B21) as each CMS when adding additional CloudSystem Matrix management servers. See Central Management Server section in this document for more information about this configuration.
- HP Insight Control license on each CloudSystem Matrix CMS server. **NOTE:** The above server (PN 66224-B21) includes a license for Insight Control.
- CloudSystem Matrix Implementation and Startup services for each additional CMS. Please see the Services section below in this QuickSpecs for additional details.

NOTE: If installation is using KVM managed nodes in a federated CMS configuration, the KVM management server must be managed by the top-level Matrix CMS.

HP Interconnect Options

NOTE: The Virtual Connect interconnect modules that are built in to the Starter and Expansion kits are not removable. Interconnect bays 3 and 4 are available for additional Virtual Connect (VC) FlexFabric modules in HP CloudSystem Matrix with FlexFabric Starter and Expansion kits. Additional supported interconnected options may be added to the remaining available interconnect bays (bays 5/6 and 7/8).

NOTE: HP Virtual Connect FlexFabric 10Gb/24-port Modules should not be added to existing CloudSystem Matrix c7000 enclosures that are using HP Virtual Connect Flex-10 10Gb Ethernet modules and HP Virtual Connect 8Gb 24-Port FC Modules for BladeSystem c-Class. Mixing of Virtual Connect FlexFabric and non-FlexFabric legacy Virtual Connect modules is not permitted.

Ordering CloudSystem Matrix

NOTE: For supported CloudSystem Matrix interconnect options, see the Compatibility chart at: <http://www.hp.com/go/matrixcompatibility>.

NOTE: For HP BladeSystem c-Class Interconnect and Mezzanine Components please visit: <http://h18004.www1.hp.com/products/blades/components/c-class-interconnects.html>
<http://h18004.www1.hp.com/products/blades/components/c-class-adapters.html>

Step 3: Select HP CloudSystem Matrix Expansion Kits

HP CloudSystem Matrix Expansion Kit

NOTE: Add additional Expansion Kits as your CloudSystem Matrix environments requires or on an as-needed basis.

NOTE: Expansion Kits purchased must be co-located with the Starter Kit(s) to which they are connecting.

NOTE: Add HP server blades and other recommended options to the Expansion Kit as desired. Depending on quantity of Expansion Kits purchased, additional racks, storage arrays, and other options may also be warranted.

NOTE: Refer to the HP CloudSystem Matrix compatibility chart at: <http://www.hp.com/go/matrixcompatibility> for details on supported options, operating systems, etc.

Hardware plus software licenses

HP CloudSystem Matrix for ProLiant v2 Kit

708919-B21

NOTE: The configurable starter kit can be defined as either Starter or Expansion Kit with appropriate services applied appropriately when configured.

HP CloudSystem Matrix Modular Kit (Hardware Components) includes:

- HP BladeSystem c7000 enclosure and 10 fans
- HP BladeSystem c7000 Onboard Administrator with KVM option, redundant pair

HP Virtual Connect Option (required choice of one):

- HP Virtual Connect FlexFabric 10Gb 24-port Module, redundant pair
- HP Virtual Connect Flex-10 10GB 24-port Module, redundant pair with HP Virtual Connect 8Gb 24-port Fibre Channel Module, redundant pair
- HP Virtual Connect Flex-10/10D 30-port Module, redundant pair with HP Virtual Connect 8Gb 24-port Fibre Channel Module, redundant pair

c7000 Power Option (required choice of one):

- Single phase (QTY of 6)
- 3-Phase (QTY of 6)
- DC Power (QTY of 6)

HP Matrix OE Software (required choice of one)

- Matrix Operating Environment 16-server license, 3 year 24/7 support and updates
- Matrix Operating Environment 8-server license, 3 year 24/7 support and updates

Ordering CloudSystem Matrix

NOTE: Additional Matrix OE licenses may be purchased separately. ,
NOTE: See the HP Matrix Operating Environment for ProLiant QuickSpecs for additional information:
http://h18000.www1.hp.com/products/quickspecs/13050_div/13050_div.html
 (Worldwide)

NOTE: Following are the VC FlexFabric transceiver/SFP options.

HP BladeSystem c-Class 10Gb SFP+ SR Transceiver	455883-B21
HP BladeSystem c-Class 10Gb SFP+ LR Transceiver	455886-B21
HP BladeSystem c-Class 10Gb SFP+ LRM Transceiver	455889-B21
HP BladeSystem c-Class Virtual Connect 1G SFP SX Transceiver	453151-B21
HP BladeSystem c-Class Virtual Connect 1G SFP RJ-45 Transceiver	453154-B21
HP 8Gb Shortwave B-series Fibre Channel 1 Pack SFP+ Transceiver	AJ716B
HP 8Gb Long Wave B-series 10km Fibre Channel 1 Pack SFP+ Transceiver	AJ717A

NOTE: Following are the VC Flex-10 10Gb Ethernet module transceiver/SFP options.

HP BladeSystem c-Class 10Gb SFP+ SR Transceiver	455883-B21
HP BladeSystem c-Class 10Gb SFP+ LR Transceiver	455886-B21
HP BladeSystem c-Class 10Gb SFP+ LRM Transceiver	455889-B21
HP BladeSystem c-Class Virtual Connect 1G SFP SX Transceiver	453151-B21
HP BladeSystem c-Class Virtual Connect 1G SFP RJ-45 Transceiver	453154-B21

Implementation Service

HP Implementation service for the CloudSystem Matrix Expansion Kit	UU959E
HP CloudSystem Expansion Kit - Implementation Service, Flexible	HA115A1-5P9

NOTE: The Matrix Expansion Kit Integration Implementation Service is required for any purchased Expansion Kit being added to an existing Matrix environment. The Matrix Expansion Kit Integration Service supports the integration of up to four Matrix Expansion Kits into the existing Matrix environment.

Step 4: Select Recommended options for HP CloudSystem Matrix Kits

NOTE: Supported options may be added to the Starter or Expansion Kit as desired.

NOTE: For additional options, please refer to the "Additional Options" section below. For additional blade enclosures, interconnect options, and power subsystem options, please refer to the following QuickSpecs:

HP BladeSystem c7000 Enclosure QuickSpecs:

http://h18000.www1.hp.com/products/quickspecs/12810_div/12810_div.html

and HP BladeSystem c-Class Interconnect and Mezzanine Components:

<http://h18004.www1.hp.com/products/blades/components/c-class-interconnects.html>

<http://h18004.www1.hp.com/products/blades/components/c-class-adapters.html>

BladeSystem c-Class target server blades

HP ProLiant server blades

NOTE: All shipping HP ProLiant c-Class blades are supported except the HP ProLiant BL2x220c server blades and workstation blades. For server blade information, please visit: <http://h18000.www1.hp.com/products/quickspecs/division/12534.html>

NOTE: It is highly recommended that at least four (4) additional HP ProLiant c-Class blades be ordered with each Starter Kit, because the Onsite Implementation Service includes provisioning of up to four (4) HP ProLiant blades, two of which are directly provisioned as physical servers and two of which are virtual machine hosts. See

Ordering CloudSystem Matrix

separate section on "CloudSystem Matrix Starter Kit Implementation Service" for details.

NOTE: HP ProLiant server blades should be configured to connect via the Virtual Connect modules included in the CloudSystem Matrix kits. See the section below on Mezzanine options for further details.

NOTE: The HP BladeSystem c7000 Enclosure holds up to 16 half-height blades. Server blanks will be shipped in all empty bays.

HP Integrity Servers

NOTE: All shipping HP Integrity c-Class blades are supported when configured with Integrity software products. For additional server blade information please visit: <http://h18004.www1.hp.com/products/quickspecs/division/division.html#12391>.

NOTE: The management software licenses packaged with HP CloudSystem Matrix provide licensing to manage HP ProLiant c-Class server blades and Virtual Connect Enterprise Manager software (VCEM) which is licensed to the BladeSystem c7000 Enclosure. HP Integrity c-Class server blades require separate licensing (except for VCEM software). HP-UX customers should order licenses for the HP-UX 11i v3 Virtual Server Environment OE (VSE-OE) or HP-UX 11i v3 Data Center OE (DC-OE) For additional information, please visit: <http://www.hp.com/go/hpux>. Please refer to ordering information for Integrity Matrix at: www.hp.com/go/matrix.

Interconnect options

NOTE: The Virtual Connect interconnect modules that are built in to the Starter and Expansion kits are not removable. Interconnect bays 3 and 4 are available for additional Virtual Connect (VC) FlexFabric modules in HP CloudSystem Matrix with FlexFabric Starter and Expansion kits. Additional supported interconnected options may be added to the remaining available interconnect bays (bays 5/6 and 7/8).

NOTE: HP Virtual Connect FlexFabric 10Gb/24-port Modules should not be added to existing CloudSystem Matrix c7000 enclosures that are using HP Virtual Connect Flex-10 10Gb Ethernet modules and HP Virtual Connect 8Gb 24-Port FC Modules for BladeSystem c-Class. Mixing of Virtual Connect FlexFabric and non-FlexFabric legacy Virtual Connect modules is not permitted.

NOTE: For supported CloudSystem Matrix interconnect options, see the Compatibility Chart at: <http://www.hp.com/go/matrix>.

NOTE: For HP BladeSystem c-Class Interconnect and Mezzanine Components:

<http://h18004.www1.hp.com/products/blades/components/c-class-interconnects.html>

<http://h18004.www1.hp.com/products/blades/components/c-class-adapters.html>

HP Networking

NOTE: For servers that require one FlexibleLOM to be installed in the FlexibleLOM connector. All FlexibleLOMs are dual port: One port is routed to interconnect module bay 1 and the other to bay 2. For supported CloudSystem Matrix FlexibleLOM options, see the Compatibility chart at: <http://www.hp.com/go/matrixcompatibility>.

10Gb FlexibleLOM Adapters

HP FlexFabric 10Gb 2-port 554FLB FIO Adapter

684212-B21

HP Flex-10 10Gb 2-port 530FLB FIO Adapter

684211-B21

NOTE: Flex-10 adapters are compatible with FlexFabric, but are limited to Flex-10 functionality only. Do not configure Flex-10 adapters into c-Class server blades in any CloudSystem Matrix FlexFabric kit.

Mezzanine Options

NOTE: For supported CloudSystem Matrix mezzanine options, see the Compatibility chart at: <http://www.hp.com/go/matrixcompatibility>.

Ordering CloudSystem Matrix

8Gb Fibre Channel Mezzanines

HP LPe1205A 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class	659818-B21
HP QMH2572 8Gb Fibre Channel Host Bus Adapter for BladeSystem c-Class	651281-B21

HP Airflow Optimization

HP Rack Airflow Optimization Kit	AF090A
----------------------------------	--------

NOTE: The Airflow Optimization kit is designed to prevent hot and cold air from mixing thus optimizing the temperature at which the chilled air enters the racked servers.

NOTE: When configuring racks through Factory Express, a Rack Optimization kit will automatically ship with the rack. This kit is recommended for all other rack configurations also.

HP Matrix OE Public Cloud Managed Instance License	HP Matrix Operating Environment Public Cloud Managed Instance 1 year 24x7 Support License	BD580A
	HP Matrix Operating Environment Public Cloud Managed Instance 1 year 24x7 Support E-LTU	BD580AAE
	HP Matrix Operating Environment Public Cloud Managed Instance 1 year 24x7 Support Flexible License	BD581A

NOTE: Each traditional (node-based) Matrix OE license includes rights to also manage one public cloud instance. For example, a purchase of 16 Matrix OE server licenses entitles the buyer to also manage up to 16 instances concurrently across all public clouds. This built-in public cloud licensing may be sufficient to cover all bursting needs of some CloudSystem users. If more extensive bursting is required, a Matrix OE public cloud managed instance license (BD580A, BD580AAE, and BD581A) is required for each additional VM that will be managed concurrently on public cloud infrastructure.

NOTE: Customers purchasing "t" quantity of the traditional (node-based) Matrix OE license and "p" quantity of the Matrix OE Public Cloud Managed Instance License will be able to burst up to "t+p" virtual machine(s) concurrently. The total number of VMs in use simultaneously across all cloud service providers may not exceed "t+p".

NOTE: The Matrix OE Public Cloud Managed Instance License (BD580A, BD580AAE, and BD581A) will be valid for a period of one year from the date of purchase. To extend rights to manage a public cloud instance beyond the license term, customers must purchase another license when their current license expires.

NOTE: For each purchased fixed or flexible license, a printed license entitlement certificate will be delivered. For each purchased electronic license, a license entitlement certificate will be delivered electronically.

HP Care Pack services	NOTE: HP Care Pack services for the BladeSystem c7000 enclosure cover the enclosure, power supplies and fans. HP qualified rack options are covered by these
------------------------------	---

Additional Options

services when installed within the same rack. HP supported BladeSystem c-Class enclosure devices including pass thru, Ethernet interconnect and virtual connect modules are also covered by the BladeSystem c7000 enclosure Care Pack services.

NOTE: SAN/Fabric switches for the HP BladeSystem c-Class enclosure are not covered under the BladeSystem c7000 enclosure Care Packs, SAN/Fabric switches carry separate Care Packs. SAN/Fabric Switch Care Pack service level support should always be uplifted to match existing storage or server service level.

Hardware Services On-site Service

8. Device Bay 8

NOTE: Full-height servers should be populated from left to right.

Mixed Configuration - Full Height and Half-Height Population rules

The BladeSystem c7000 enclosure is divided into 4 zones by the vertical support metalwork. Within each zone a removable divider is used to support half height devices. To install a full-height blade in any zone this divider must be removed. As a consequence a zone can only contain either full-height server blades or half-height server blades.

NOTE: Storage blades and tape blades can be installed in the same zone as both full-height and half-height server blades, a bracket ships with each SB40c tape blade that allows a half-height blade to be mounted on top of the tape blade.

NOTE: The lower tape or storage blade cannot be removed without first removing the upper half-height blade.

HP BladeSystem c7000 enclosure	Dimensions	Height	17.4 in (442 mm)
		Width	17.6 in (447.04 mm)

Environmental-friendly products and approach

End-of-life management and recycling

Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.

NOTE: To review maximum system power ratings for facilities planning purposes use the Active Answers Power Calculator which is available via the online tool located at URL: <http://www.hp.com/go/bladesystem/powercalculator>

Summary of Changes

Date	Version History	Action	Description of Change:
24-Jun-2016	From Version 35 to 36	Retire	Document Retired
06-Mar-2015	From Version 34 to 35	Added	Added the new CMS
13-Oct-2014	From Version 33 to 34	Changed	Changed the What 's New Section and Update some SKU Descriptions.
16-May-2014	From Version 32 to 33	Changed	Product descriptions were revised throughout Ordering CloudSystem Matrix
20-Dec-2013	From Version 31 to 32	Changed	Changes made to What's New and in the Additional Options section.
28-Jun-2013	From Version 30 to 31	Changed	Two part numbers were changed in Step 2.
25-Mar-2013	From Version 29 to 30	Changed	Overview: Completely updated What's new section. Ordering CloudSystem Matrix: Updated KVM Management Sever and KVM Managed Host sections.
09-Nov-2012	From Version 27 to 28	Changed	Changes were made in Ordering CloudSystem Matrix section.
14-Sep-2012	From Version 26 to 27	Changed	Changes were made in Cloud System Matrix and Additional Options sections.
17-Aug-2012	From Version 25 to 26	Changed	Changes made in the Ordering CloudSystem Matrix and Additional Options sections.
13-Aug-2012	From Version 24 to 25	Changed	Changes made throughout the QuickSpec.
12-Jun-2012	From Version 23 to 24	Removed	Removed a bullet from the What's New section.
08-Jun-2012	From Version 22 to 23	Changed	Changes made within the Overview and Ordering CloudSystem Matrix sections.
04-Jun-2012	From Version 21 to 22	Changed	Changes made throughout the QuickSpec.
20-Apr-2012	From Version 20 to 21	Changed	Changes made in the CloudSystem System Matrix, Configuration Information and Additional Options sections.
06-Apr-2012	From Version 18 to 20	Changed	BladeSystem was changed to CloudSystem.
06-Mar-2012	From Version 17 to 18	Changed	Changes were made throughout the QuickSpec.
30-Aug-2011	From Version 16 to 17	Changed	Changes were made throughout Ordering Information and to HP Rack Options and HP Care Pack services in Additional Options Mentions of Cloud Service Automation for Matrix were added
20-Jun-2011	From Version 15 to 16	Changed	Revisions were made throughout changing BladeSystem to CloudSystem.
05-Apr-2011	From Version 14 to 15	Added	HP BladeSystem Matrix Conversion Services, HP BladeSystem Matrix - Extended Infrastructure and HP Utility Ready Computing on Matrix were added to HP BladeSystem Matrix HP NC553m 10Gb 2-port FlexFabric Adapter was added to HP Ethernet Mezzanine Options
		Changed	Updated to version 6.3 HP Uninterruptible Power Systems product descriptions were revised

Summary of Changes

14-Jan-2011	From Version 13 to 14	Changed	Changes made within the Ordering BladeSystem Matrix.
16-Nov-2010	From Version 12 to 13	Changed	<p>Edits were made within Ordering BladeSystem Matrix including revising product descriptions and updating HP Interconnects notes</p> <p>HP Rack Series was completely revised</p>
05-Oct-2010	From Version 11 to 12	Changed	<p>How to order HP BladeSystem Matrix and Warranty Services were revised in HP BladeSystem Matrix</p> <p>Virtual to physical was added to Availability and proactive support and Storage LUN configuration and presentation/zoning (with purchase of EVA4400) was removed from Orchestrated provisioning of services in HP BladeSystem Matrix Infrastructure Operating Environment</p> <p>Ordering BladeSystem Matrix and HP Care Pack Services were completely revised</p> <p>Part numbers were modified in HP Rack Series</p> <p>Matrix Starter Kit and Matrix Expansion Kits (included in the Starter Kit order) was added to HP BladeSystem Matrix Starter Kit Implementation Service</p> <p>HP BladeSystem Matrix Expansion Kit Integration Implementation Service was added to HP BladeSystem Matrix</p> <p>Tape Storage was removed from Additional Options</p>
12-Jul-2010	From Version 10 to 11	Removed	Removed duplicate text.
09-Jul-2010	From Version 9 to 10	Changed	<p>Descriptions for part numbers 500662-B21 and 418367-B21 were revised for BladeSystem c-Class server blades chart in Ordering BladeSystem Matrix</p> <p>HP BladeSystem c7000 enclosure descriptions were revised in Technical Specifications</p>
		Removed	<p>HP 16A 250V IRAM 2073/IEC320-C19 2.5m/8ft was removed from Power Cords</p> <p>2x1x16 and 4x1x16 IP Console Switches with Virtual Media and 2x16 Server Console Switch with Virtual Media were removed from HP Rack Options</p> <p>HP StorageWorks Virtual Library Systems were removed from Tape Storage</p>
30-Apr-2010	From Version 8 to 9	Changed	Revisions were made throughout Ordering BladeSystem Matrix.
29-Mar-2010	From Version 7 to 8	Changed	Part number for HP BladeSystem Matrix Starter Kit - HP Insight
