

Overview

HPE Client Virtualization with VMware Horizon

HPE Client Virtualization is an end-to-end client virtualization solution based on the best managed and virtualization-ready HPE ProLiant and BladeSystem servers, HPE storage, and HPE Thin Client access devices. It is a desktop replacement solution that delivers to IT teams the flexibility to quickly deploy and refresh desktops, the reduction of associated potential data loss or theft. It also lowers the complexity and cost of desktop management, while continuing to provide end-users with the functionality of a stand-alone desktop.

VMware Horizon 7 delivers virtualized or remote desktops and applications through a single platform to end users. These desktop and application services—including RDS hosted apps, packaged apps with VMware ThinApp, and SaaS apps— can all be accessed from one unified workspace across devices, locations, media and connections.

Leveraging closed loop management and optimized for the software - defined data center, Horizon 7 helps IT control, manage and protect all of the Windows resources end users want, at the speed they expect, with the efficiency business demands.

What's New

- Introduction of Horizon Standard, Standard Add-on, Advanced, and Enterprise editions with 1yr, 3yr and 5yr support, physical format.
- Introduction of Horizon Standard to Advanced Upgrade for Concurrent Users, Horizon Advanced to Enterprise Upgrade for Concurrent Users and Horizon Advanced to Horizon Enterprise for Named Users with 1yr, 3yr and 5yr support, electronic format.

At A Glance

- Hewlett Packard Enterprise offers VMware Horizon Standard, VMware Horizon Standard Add-on, VMware Horizon Advanced, VMware Horizon Enterprise, VMware vRealize Operations for Horizon (formerly vCenter Operations Manager for View) and VMware vSphere Desktop (100 VM Pack).
- All VMware Horizon products are available only in electronic delivery format.
- HPE Client Virtualization with VMware Horizon comes as an end-to--end solution leveraging integrated virtualization software, reliable ProLiant and BladeSystem server platforms, HPE Thin Clients portfolio and best in class manageability software for physical and virtual infrastructure.
- HPE serves as the single point of contact for HPE Client Virtualization with VMware Horizon offerings and provides 1/ 3 / 5 year 24x7 support services and software upgrade entitlements with every purchase.

For more information and complete list of VMware View features please visit: <http://www.vmware.com/products/horizon-view>

Models

HPE VMware Horizon Products

NOTE: VMware Horizon Standard is available in 10 quantity packs for Concurrent Users (CCU).

VMware Horizon Standard 10-pack 1yr Concurrent Users E-LTU	P9T48AAE
VMware Horizon Standard 10-pack 1yr Concurrent Users Software	P9T48A
VMware Horizon Standard 10-pack 3yr Concurrent Users E-LTU	P9T49AAE
VMware Horizon Standard 10-pack 3yr Concurrent Users Software	P9T49A
VMware Horizon Standard 10-pack 5yr Concurrent Users E-LTU	P9T50AAE
VMware Horizon Standard 10-pack 5yr Concurrent Users Software	P9T50A

NOTE: VMware Horizon Advanced is available in 10 quantity packs for Named Users. VMware Horizon Advanced includes VMware Identity Manager Std, Mirage, Virtual SAN, RDS hosted apps, ThinApp, vSphere Desktop, and vCenter Desktop for 10 named users.

VMware Horizon Advanced 10-pack 1yr Named Users E-LTU	P9T51AAE
VMware Horizon Advanced 10-pack 3yr Named Users E-LTU	P9T52AAE
VMware Horizon Advanced 10-pack 5yr Named Users E-LTU	P9T53AAE

NOTE: VMware Horizon Advanced is available in 10 quantity packs for Concurrent Users.

VMware Horizon Advanced 10-pack 1yr Concurrent Users E-LTU	P9T54AAE
VMware Horizon Advanced 10-pack 1yr Concurrent Users Software	P9T54A
VMware Horizon Advanced 10-pack 3yr Concurrent Users E-LTU	P9T55AAE
VMware Horizon Advanced 10-pack 3yr Concurrent Users Software	P9T55A
VMware Horizon Advanced 10-pack 5yr Concurrent Users E-LTU	P9T56AAE
VMware Horizon Advanced 10-pack 5yr Concurrent Users Software	P9T56A

NOTE: VMware Horizon Enterprise is available in 10 quantity packs for Named Users.

VMware Horizon Enterprise 10-pack 1yr Named Users E-LTU	P9T57AAE
VMware Horizon Enterprise 10-pack 3yr Named Users E-LTU	P9T58AAE
VMware Horizon Enterprise 10-pack 5yr Named Users E-LTU	P9T59AAE

NOTE: VMware Horizon Enterprise is available in 10 quantity packs for Concurrent Users.

VMware Horizon Enterprise 10-pack 1yr Concurrent Users E-LTU	P9T60AAE
VMware Horizon Enterprise 10-pack 1yr Concurrent Users Software	P9T60A
VMware Horizon Enterprise 10-pack 3yr Concurrent Users E-LTU	P9T61AAE
VMware Horizon Enterprise 10-pack 3yr Concurrent Users Software	P9T61A
VMware Horizon Enterprise 10-pack 5yr Concurrent Users E-LTU	P9T62AAE
VMware Horizon Enterprise 10-pack 5yr Concurrent Users Software	P9T62A

NOTE: VMware Horizon Standard Add-on is available in 10 quantity packs for Concurrent Users (CCU). VMware Horizon Standard Add-on is a desktop add-on to an existing VMware vSphere Desktop deployment.

VMware Horizon Standard Add-on 10-pack 1yr Concurrent Users E-LTU	P9T63AAE
VMware Horizon Standard Add-on 10-pack 1yr Concurrent Users Software	P9T63A
VMware Horizon Standard Add-on 10-pack 3yr Concurrent Users E-LTU	P9T64AAE
VMware Horizon Standard Add-on 10-pack 3yr Concurrent Users Software	P9T64A
VMware Horizon Standard Add-on 10-pack 5yr Concurrent Users E-LTU	P9T65AAE
VMware Horizon Standard Add-on 10-pack 5yr Concurrent Users Software	P9T65A

HPE VMware Horizon Upgrades

NOTE: VMware Horizon upgrades are available in 10 quantity packs for Concurrent Users (CCU) and Named Users.

NOTE: Upgrade commercial licenses cannot be sold to upgrade an Academic or Federal base license.

NOTE: Customer must have the initial/original base product on a current HPE services contract and must have registered for HPE support on the original base product so that upgrade can be added to an existing service contract. Upgrades are delta priced for license and service between base product and target upgrade. Base product service contract must remain in place when upgrade is applied.

VMware Horizon Standard to Horizon Advanced 10-pack Concurrent Users Upgrade 1yr E-LTU	Q0K31AAE
VMware Horizon Standard to Horizon Advanced 10-pack Concurrent Users Upgrade 3yr E-LTU	Q0K32AAE
VMware Horizon Standard to Horizon Advanced 10-pack Concurrent Users Upgrade 5yr E-LTU	Q0K33AAE
VMware Horizon Advanced to Horizon Enterprise 10-pack Concurrent Users Upgrade 1yr E-LTU	Q0K34AAE
VMware Horizon Advanced to Horizon Enterprise 10-pack Concurrent Users Upgrade 3yr E-LTU	Q0K35AAE
VMware Horizon Advanced to Horizon Enterprise 10-pack Concurrent Users Upgrade 5yr E-LTU	Q0K36AAE
VMware Horizon Advanced 10-pack Named Users to Horizon Enterprise 10-pack Named Users Upgr 1yr E-LTU	Q0K37AAE
VMware Horizon Advanced 10-pack Named Users to Horizon Enterprise 10-pack Named Users Upgr 3yr E-LTU	Q0K38AAE
VMware Horizon Advanced 10-pack Named Users to Horizon Enterprise 10-pack Named Users Upgr 5yr E-LTU	Q0K39AAE

VMware vRealize Operations for Horizon (formerly vCenter Operations for View)

NOTE: VMware vRealize Operations for Horizon (formerly vCenter Operations for View) is available in 10 quantity packs. VMware vCenter Operations helps you to proactively ensure service levels, optimum resource usage and configuration compliance in your virtual and cloud environments giving you the benefit of an integrated approach to performance, capacity and configuration management.

VMware vRealize Operations for Horizon 10 Concurrent User Pack 1yr E-LTU	D8A84AAE
VMware vRealize Operations for Horizon 10 Concurrent User Pack 3yr E-LTU	D8A85AAE
VMware vRealize Operations for Horizon 10 Concurrent User Pack 5yr E-LTU	D8A86AAE

VMware vSphere Desktop

VMware vSphere Desktop 100 Virtual Machines 1yr E-LTU	BD500AAE
VMware vSphere Desktop 100 Virtual Machines 3yr E-LTU	BD501AAE
VMware vSphere Desktop 100 Virtual Machines 5yr E-LTU	BD701AAE

Product Features

License Activation and Software Download Instructions

- Retrieve your 'Entitlement Order Number' from the Entitlement Certificate
 - If you have opted for physical delivery, your entitlement certificate will be part of your shipment
 - If you have opted for electronic delivery, you will receive an email from Hewlett Packard Enterprise with a link for retrieving your entitlement certificate
- Visit <http://webware.hp.com> and login with your Hewlett Packard Enterprise Passport to generate your 'Partner Activation Code' PAC. You will receive an email from Hewlett Packard Enterprise with various activation codes - Partner Activation Code (PAC)

For your VMware products

- Visit <http://vmware.com/code/hp> to 'Register your Partner Activation Code (PAC)' and generate your Serial Number
- Visit <http://downloads.vmware.com> to download your VMware software & follow the prompts to install your VMware product

Flexibility

- Customers can purchase the end-to-end solution from Hewlett Packard Enterprise in conjunction with the server and storage management software for physical and virtual infrastructure.
- The HPE Client Virtualization with VMware Horizon is available in complete bundles as well as a la carte versions for existing ESX or Horizon customers.
- HPE serves as the single point of support for the VMware Horizon solution with integrated Hewlett Packard Enterprise offerings.

Manageability

- Utilize the best run server infrastructure with the Insight Control Environment: time-smart management software that delivers total control, maximum flexibility, and tangible savings for your unified physical and virtual ProLiant and BladeSystem infrastructure. Based on HPE Systems Insight Manager and ProLiant Essentials software, the Insight Control suites deliver comprehensive system health, remote control, vulnerability scanning and patch management as well as flexible deployment and power management in one easy to install package.
- Integrated with HPE Systems Insight Manager, Virtual Machine Manager (VMM), provides unified management of virtual machines and supports HPE ProLiant host server resources:
 - Provides the ability to manage both physical and virtual resources from a single management console.
- Simplifies day-to-day management and operation of virtual machines.

Client Manageability

- Complement your server management software with HPs best in class client management solutions
 - Use HPE Device Manager, which is included in the price of all HPE Thin clients, to manage, report on and automate the usage and deployment of all HPE Thin Clients.
 - Use HPE Client Automation to manage HPE thin clients, PCs, mobile devices and virtual machines.
 - Or select HPs supported 3rd party solutions
 - Symantec Altiris Deployment Solution to manage Thin Clients and PCs
- Microsoft System Center Configuration Management to manage Windows based clients

HPE ProLiant Server Support

- HPE ProLiant server support software is available for download.
- The VMware HCL has been updated to include all certified HPE ProLiant servers.
- For more information on the HPE Certified and Supported ProLiant servers please visit the VMware Server Support Matrix at: <http://www.hpe.com/servers/vmwarecert>

Product Features

Hewlett Packard Enterprise web sites

- VMware from HPE: <http://www.hp.com/go/vmware>
- Available from: <http://www.hp.com/go/vmware>:
 - HPE & VMware white papers and planning tools
 - VMware online sizing tool
 - HPE & VMware news and information
- Download Software: <http://downloads.vmware.com>

Supported Product

- VMware ESX software is supported and certified on a broad range of HPE ProLiant Servers including BL, DL, and ML server series products.
- Hewlett Packard Enterprise provides the best in class unified management of physical and virtual servers, storage, virtual devices and clients.

Component	Description
vSphere	VMware vSphere, the industry's first cloud operating system, dramatically reduces capital and operating costs and maximizes IT efficiency-with the freedom to choose any application, OS, or hardware. The VMware View solution leverages the proven VMware vSphere virtualization software to consolidate desktop environments on to servers in the data center. Support for VI 3 ends with View 5.0
vCenter Server	vCenter is virtual infrastructure management software that centrally manages VMware vSphere environments providing IT administrators improved control over the virtual environment compared to other management platforms. It provides centralized control and visibility at every level of virtual infrastructure. VMware View makes the testing, provisioning and support of applications and desktops much easier and less costly. From a central location you can deliver, manage and update all of your Windows desktops and applications in minutes.
VMware View Manager	View Manager is an enterprise class desktop management solution, which streamlines the management, provisioning and deployment of virtual desktops. Users securely and easily access virtual desktops hosted on vSphere, Terminal Servers, Blade PCs or even remote physical PCs through View Manager. Virtual desktop upgrading and patching are done centrally from a single console so you can efficiently manage hundreds or even thousands of desktops-saving time and resources.
ThinApp	ThinApp application virtualization software decouples applications from operating systems and packages them into an isolated and encapsulated file. This allows you to run multiple versions of applications on a single desktop without conflict, or the same version of an application on multiple operating systems without modification. Reduce storage needs for virtual desktops and simplify application management by streaming applications packaged with ThinApp from a centralized server or a shared network drive.
View Composer	View Composer uses VMware Linked Clone technology to rapidly create desktop images that share virtual disks with a master image to conserve disk space and streamline management. User data and settings are separated from the desktop image, so they can be administered independently. All desktops that are linked to a master image can be patched or updated simply by updating the master image, without affecting users' settings, data or applications. This reduces storage needs and costs by up to 70% while simplifying desktop management.
View Personal Management	View Persona Management enables customers to enable a dedicated desktop experience while deploying floating desktops by preserving the user persona between sessions. View Persona Management is different than Roaming Profiles and has no dependence on roaming profiles but works seamlessly with existing roaming profiles deployments at customer sites.
Local Mode	The VMware View Client with Local Mode allows end-users to run managed virtual desktops locally without a network connection. Offline users can synchronize desktop changes back to the datacenter when they return to the network. The entire contents of the desktop are secure within an encrypted desktop image while all existing IT security policies for that virtual desktop continue to be applied and enforced regardless of network connection.
Insight Control (IC)	Based on HPE Systems Insight Manager and ProLiant Essentials software, the Insight Control suites deliver comprehensive system health, remote control, vulnerability scanning and patch management as well as flexible deployment and power management in one easy to install package for a unified virtual and physical

Supported Product

infrastructure. HPE Insight Control provides comprehensive management for ProLiant ML/DL customers, while HPE Insight Control for BladeSystem provides delivers additional functionality targeted at specifically at HPE BladeSystem environments.
