

QuickSpecs

HP SL2500 Scalable System

Overview

HP SL2500 Scalable System

Is server space becoming a problem in your data center?

The HP ProLiant SL2500 Scalable System offers a very dense solution with up to 4 independent HP ProLiant SL210t Gen8 hot-pluggable server nodes in a standard 2U chassis. Each SL210t Gen8 Server node can be serviced individually without impacting the operation of other nodes sharing the same chassis, to provide increased server uptime. Each server node harnesses the performance of 1866 MHz memory and dual Intel® Xeon® E5-2600 v2 processors in a very efficient package that shares both power and cooling.

The ProLiant SL2500 provides all the features expected in an enterprise server, with the added benefit of being optimized for efficiency, density and flexibility. The ProLiant SL2500 doubles the density, as compared to standard rack servers, to increase available data center floor space, improve performance while lowering energy consumption, and provide flexible configurations that fit into existing industry standard racks.

What's New

- Support for the SL210t Gen8 2U server

Standard Features

NOTE: For the Standard Features shipped in the Factory Integrated Models, please see the "Configuration Information - Factory Integrated Models" section.

Processor

One of the following depending on Model

E5-2600 v2 series Processors**Entry Processors**

NOTE: All support up to 1333MHz DDR3 memory speeds.

Intel® Xeon® E5-2609 v2 (2.5GHz/4-core/10MB/6.4GT-s QPI/80W)

Base Processors

NOTE: All support up to 1600MHz DDR3 memory speeds.

Intel® Xeon® E5-2640 v2 (2.0GHz/8-core/20MB/7.2GT-s QPI/95W, DDR3-1600, HT, Turbo2-3/3/3/3/3/3/4/5)

Intel® Xeon® E5-2630 v2 (2.6GHz/6-core/15MB/7.2GT-s QPI/80W, DDR3-1600, HT, Turbo2-3/3/3/3/4/5)

Intel® Xeon® E5-2620 v2 (2.1GHz/6-core/15MB/7.2GT-s QPI/80W, DDR3-1600, HT, Turbo2-3/3/3/3/4/5)

Intel® Xeon® E5-2650L v2 (1.7GHz/10-core/25MB/8.0GT-s QPI/70W, DDR3-1600, HT, Turbo2-2/2/2/2/2/2/2/3/4)

Intel® Xeon® E5-2630L v2 (2.4GHz/6-core/15MB/7.2GT-s QPI/60W, DDR3-1600, HT, Turbo2-2/2/2/2/3/4)

Performance Processors

NOTE: All support up to 1866MHz DDR3 memory speeds.

Intel® Xeon® E5-2697 v2 (2.7GHz/12-core/30MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2-3/3/3/3/3/3/4/5/6/7/8)

Intel® Xeon® E5-2695 v2 (2.4GHz/12-core/30MB/8.0GT-s QPI/115W, DDR3-1866, HT, Turbo2-4/4/4/4/4/4/4/5/6/7/8)

Intel® Xeon® E5-2690 v2 (3.0GHz/10-core/25MB/8.0GT-s QPI/130W, DDR3-1866, HT, Turbo2-3/3/3/3/3/3/4/5/6)

Intel® Xeon® E5-2680 v2 (2.8GHz/10-core/25MB/8.0GT-s QPI/115W, DDR3-1866, HT, Turbo2-3/3/3/3/3/4/5/6/7/8)

Intel® Xeon® E5-2660 v2 (2.2GHz/10-core/25MB/8.0GT-s QPI/95W, DDR3-1866, HT, Turbo2-4/4/4/4/4/4/5/6/7/8)

Intel® Xeon® E5-2650 v2 (2.6GHz/8-core/20MB/8.0GT-s QPI/95W, DDR3-1866, HT, Turbo2-4/4/4/4/5/6/7/8)

NOTE: HT indicates that the processor model supports Intel® Hyper-Threading Technology.

NOTE: Turbo indicates the maximum potential frequency increment when using Intel® Turbo Boost Technology, with 8, 7, 6, 5, 4, 3, 2 or 1 core(s) active.

NOTE: DDR3 speed is the maximum memory speed of the processor. Actual memory speed may depend on the quantity and type of DIMMs installed.

NOTE: Up to 2 processors supported. Mixing different processor models is not supported.

NOTE: For the Intel® C600 Chipset E5-2600 Series, the letter preceding the model number indicates the Product Line (E3, E5, E7); 2600x, 2 = number of CPUs in a Node, 6 is socket/segment designation, 00 = Processor SKU, and x = L for low power SKUs.

Cache Memory

30MB (1x30MB) Level 3

NOTE: For Twelve-core processors.

25MB (1x25MB) Level 3

NOTE: For Ten-core processors.

20MB (1x20MB) Level 3

NOTE: For Eight-core processors.

15MB (1x15MB) Level 3

QuickSpecs

HP SL2500 Scalable System

Standard Features

NOTE: For Six-core processors.

10MB (1x10MB) Level 3

NOTE: For Quad-core processors.

Chipset	Patsburg C600 NOTE: For more information regarding Intel chipsets, please see the following URL: http://www.intel.com/products/server/chipsets/						
Upgradeability	Upgradeable to two processors (12 cores)						
Memory Protection	Advanced ECC (multi-bit error protection) Mirroring mode Lock-step mode						
Memory	Type	HP SmartMemory DDR3 Load Reduced (LRDIMM), Registered (RDIMM) or Unbuffered (UDIMM)					
	DIMM Slots Available	16					
	Maximum (RDIMM) (per server node)	256GB (16 x 16GB) PC3-14900R (DDR3-1866)					
	Maximum (UDIMM) (per server node)	128GB (16 x 8GB) PC3-14900E (DDR3-1866)					
	Maximum (LRDIMM) (per server node)	512GB (16 x 32GB) PC3-14900L (DDR3-1866)					
	NOTE: HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at: http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html						
	NOTE: LRDIMM, RDIMM, and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support RDIMM, UDIMM and LRDIMM.						
	NOTE: Depending on the memory configuration and processor model, the memory speed may run at 1866MHz, 1600MHz, 1333MHz, or 1066MHz. Please see Memory Population Table or the Online Memory Configuration Tool at: www.hp.com/go/ddr3memory-configurator .						
Network Controller	HP NC361i Dual Port Gigabit Server Adapter						
Expansion Slots	Half Height Nodes (1U): One available PCI Express Gen 3.0 slots, one available for Flexible LOM PCI-Express 3.0						
	<ul style="list-style-type: none"> Slot 1: Low profile PCI-Express 3.0 x24 Slot 2: Flexible LOM PCI-Express 3.0 x16 						
Flexible LOM (Standard with half-height 1U nodes)	Expansion Slots #	Technology	Bus Width**	Connector Width*	Bus Number	Form Factor	Notes
	1	3.0	X16	X16	4	Flexible LOM	3.3 volts
Half-height PCIe Riser (Standard with half-height 1U nodes)	Expansion Slots #	Technology	Bus Width**	Connector Width*	Bus Number	Form Factor	Notes
	1	PCI-Express 3.0	x16	x16	4	Low Profile	3.3 volts

Standard Features

* Default bus assignment. Inserting cards with PCI bridges may alter the actual bus assignment number.

** Indicates the number of physical electrical lanes running to the connector.

Storage Controller	Hot Plug SATA Models	HP Dynamic Smart Array B120i Controller (RAID 0, 1, 10) NOTE: Transfer rate: up to 6Gb/s SATA NOTE: The HP Dynamic Smart Array B120i Controller provides RAID 0, 1, and 10 support for up to 6 SATA drives (with Windows, Linux, and VMware) with a maximum of eight (8) logical drives. An optional Smart Array P-series controller is required for Ubuntu, Solaris, or Citrix XenServer installations. For additional details www.hp.com/go/smartarray NOTE: The Embedded HP Dynamic Smart Array B120i controller provides SATA support and does not support SAS drives. An optional HP Smart Array P-series Controller is required when using SAS drives.	
Internal Storage Devices	Diskette Drives	Via USB only	
	Optical Drives	DVD drive via USB only (External support only)	
	Hard Drives	None ship standard	
	Drive Bays	Up to 12 Hot plug SAS/SATA 3.5" drives	
	One of the following depending on Model	Up to 24 Hot plug SAS/SATA 2.5" drives NOTE: Max Ambient Temperature supported for the product is 30C for all configurations up to 8 LFF or 24 SFF. For customers who requires >8 LFF support, the max ambient temperature supported will be 25C. NOTE: Support for 12 LFF hard drives is available for special large volume configurations. Please contact your HP representative for details.	
Maximum Internal Storage	LFF 3.5" Hot Plug SATA	48.0TB	12 x 4TB
	LFF 3.5" Hot Plug SAS	48.0TB	12 x 4TB
	SFF 2.5" Hot Plug SATA	24.0TB	24 x 1TB
	SFF 2.5" Hot Plug SAS	24.0TB	24 x 1TB
	NOTE: To support HP hard drives exceeding 2.2 TB, a HP Smart Array Controller is required. NOTE: Max Ambient Temperature supported for the product is 30C for all configurations up to 8 LFF or 24 SFF. For customers who requires >8 LFF support, the max ambient temperature supported will be 25C. NOTE: Support for 12 LFF hard drives is available for special large volume configurations. Please contact your HP representative for details.		
Interfaces	Serial	2	
	Network RJ-45 (Ethernet)	2 10/100/1000 NIC ports (1 NIC shared for the HP ProLiant iLO4)	
	Graphics	1	
	Management	1 HP ProLiant iLO4	
	Health LED	2 (1 front and 1 rear) per server node	
	Power	2 (1 front and 1 rear) per server node	
	UID	1 rear per server node and 1 upfront system UID	
	USB	2 at rear	
Industry Standard Compliance	ACPI V2.0 Compliant		
	PCI 2.2 Compliant		
	PXE Support		

Standard Features

WOL Support
 Microsoft® Logo certifications
 IPMI 2.0, DCMI 1.0. SMASH CLP compliant

Graphics

Integrated Matrox Graphics G200e, 32MB Standard

- 16 bit color: maximum resolution of 1600 x 1200
 - 32 bit color: maximum resolution of 1280 x 1024
-

Server Power Cords

One 6' Highline (IEC-IEC) power cord ships standard

NOTE: The HP ProLiant SL2500 Scalable System server is primarily connected to PDU's in data center racks so they ship standard with only a PDU power cord (416151-B21).

NOTE: Japan CTO configurations get the 6' 416151-291 power cord in addition. China CTO configurations get the 6' 416151-AA1 power cord in addition.

NOTE: If customers require a local power cord, they can check the power cord matrix for the appropriate cord. Please see the following power cord matrix:

<http://www.hp.com/go/powercordmatrix>

Power Management Controller

The SL2500 chassis and SL210t server contain the embedded Power Management Controller (PMC) with SL Chassis Firmware which is able to monitor power consumption and throttle the speed of the processors and memory in each node within the chassis in order to maintain a pre-set power budget.

HP provides a command-line utility, called HP ProLiant Power Interface Control (PPIC) Utility, for reading and configuring the chassis power management modes.

The following Power Management modes are standard and are configurable in the controller

- Mode 0: Power control disabled. No power throttling will occur.
 - Mode-1: (DEFAULT) This mode allows all nodes to share both power supplies and run at maximum performance. Power control logic will only throttle the performance of each node when the power draw by the chassis attempts to exceed the load supported by the power supplies. In this mode, the box is expected to survive an unexpected AC Power loss to one of the power supplies.
 - Mode-2: AC/DC Redundancy N+1 - power control logic will maintain a power cap value for the chassis at the DC rating of a single power supply (750W, or 1200W), such that if one power supply experiences a DC or AC failure, the chassis should remain on-line and operational. Note: The SL PS redundancy is not appeared in HP iLO and SMH (System Manage Homepage) web page.
 - Mode-3: User Power Capping - User specifies the power envelope within the capabilities of the hardware installed. Users run SL-APM or PPIC utility to calibrate the minimum and maximum power consumption envelope for the chassis. In order to avoid any impact to performance due to throttling, a User selectable Power Cap value should not be set below the minimum power value provided by the utility. Power Capping is included with the iLO Advanced or Scale-Out license.
-

Common Slot Power Supply

HP's Common Slot (CS) power supplies allow for commonality of power supplies across a wide range of ProLiant and Integrity servers, as well as HP Storage solutions, and are designed to provide the highest power supply efficiency without degrading system performance. HP CS power supplies are tested by the Electric Power Research Institute (EPRI) and certified through the Ecova 80 Plus power supply program. HP CS power supply options provide efficiency ratings of up to 96% (80 Plus Titanium) and are available with multiple power input and output options allowing the customer to "right-size" a

Standard Features

power supply for their specific server configuration. All HP Common Slot power sources are UL, CE Mark Compliant, hot-plug and support redundant configurations.

NOTE: The 80 PLUS program is a unique forum that unites electric utilities, the computer industry, and consumers in an effort to bring energy efficient technology solutions to the marketplace. 80 Plus independently tests power supply efficiency and publicly posts the results at www.80Plus.org.

It is highly recommended that you use the HP Power Advisor in defining the "Right-Size" power supply for your needs. HP Power Advisor can be accessed at: www.hp.com/go/hppoweradvisor.

NOTE: Mixing of power supplies in the same chassis is not supported. All power supplies must be of the same type, all, 750W 94%, all 1200W 94%, or all 1200W 90%. If non-matched power supplies are inserted you will get errors and operation will fail.

Redundant Power: Optional (1+ 1 or n+n redundant) power supplies can be purchased through power supply option kits (see Power Supplies for part numbers).

NOTE: Power Specification and Technical Content for supported power supplies can be found at: http://h18000.www1.hp.com/products/quickspecs/14209_div/14209_div.html

System Fans

4 x 80mm system fans ship standard; Non-hot plug, Non-redundant.

Operating Systems and Virtualization Software Support for ProLiant Servers

[Microsoft Windows Server](#)
[Canonical Ubuntu](#)
[Red Hat Enterprise Linux \(RHEL\)](#)
[SUSE Linux Enterprise Server \(SLES\)](#)
[VMware](#)

NOTE: The embedded HP Dynamic Smart Array B120i Controller supports Windows, Linux and VMware only. A HP Smart Array P-series controller is required to support Ubuntu, Solaris or Citrix XenServer. For more information on HP's Certified and Supported ProLiant Servers for OS and Virtualization Software and latest listing of software drivers available for your server including how to purchase from HP, please visit our OS Support Site at: <http://www.hp.com/go/ossupport> and our driver download page: <http://www.hp.com/support/SL2500Gen8>

Form Factor

HP ProLiant t2500 Gen8 Chassis - 2U Chassis can support up to four SL210t 1U server nodes or two SL210t 2U server nodes in the 2U chassis.

HP ProLiant SL210t Gen8 Server - Half-width system board. Half-height (1U) or Full-height (2U)

HP offers two different drive cages for the 2U HP ProLiant t2500 Gen8 Chassis

- 12 LFF HDD Cage
- 24 SFF HDD Cage

Server Node Blanks

If a server node is removed for a period, a blank must be installed to maintain the thermal environment in the chassis. It is okay to leave a node in the chassis powered off to be serviced in the future. But once a SL210t Gen8 node is removed for servicing, a HP SL2500 Server Node Blank Kit is required. The blank is a 1U blank.

Embedded Manageability HP Integrated Lights-Out HP Integrated Lights-Out - iLO 4

Standard Features:

- IPMI 2.0, DCMI 1.0, and SMASH CLP support

Standard Features

- Configuration via ROM Setup Utility or LO100cfg utility
- USB 2.0 support for virtual media for much faster transfer speeds
- Enhanced browser interface and embedded KVM over IP provides OS-independent remote graphical console
- 24x7 Technical Support and Update (TSU) 1 year support and license upgrades included in iLO Advanced license

For more information, see: www.hp.com/go/lo100.

On System Management HP iLO Management Engine

- HP iLO Management Engine is a comprehensive set of embedded management features supporting the complete lifecycle of the server, from initial deployment, through ongoing management, to service alerting and remote support. HP iLO Management Engine comes standard on all HP ProLiant Gen8 servers. The HP iLO Management Engine portfolio includes:
 - **HP iLO:** The HP iLO (Integrated Lights-Out) management processor is the core foundation for the HP iLO Management Engine
 - **HP Agentless Management:** Provides built in server health monitoring and alerting capability without OS agents, that starts working the moment a power cord and an Ethernet cable are connected.
 - **HP Active Health System:** Always on, continuous monitoring for increased stability and shorter downtimes; 100% configuration history; Health and service alerts and easy export and upload to Service and Support.
 - **HP Intelligent Provisioning:** Lets customers provision and configure a single server without any separate media. No more SmartStart CDs or Smart Update Firmware DVD are needed.
 - To start Intelligent Provisioning:
 - Press the F10 key during the ProLiant Gen8 server boot process (also known as power on self test or POST).
 - Please go to the Intelligent Provisioning website at www.hp.com/go/intelligentprovisioning for additional information and to view usage videos.
 - Use the Service Pack for ProLiant (SPP) at www.hp.com/go/spp to get firmware and software updates.
 - **HP iLO Mobile App:** Enables the ability to access, deploy, and manage your server anytime from anywhere from select smartphones and mobile devices. For additional information please visit: www.hp.com/go/ilo/mobileapp

NOTE: For more information, visit: <http://www.hp.com/go/ilo> or HP iLO Management Engine technologies whitepaper

HP Insight management HP Service Pack for ProLiant (SPP)

HP Service Pack for ProLiant (SPP) and HP Smart Update Manager (HP SUM) version 5 provide a new, comprehensive approach to firmware and system software maintenance. Together they provide better operating stability and ensure maximum uptime. The SPP will be updated at a predictable

Standard Features

cadence, typically coinciding with new HP server hardware launches. By enabling all firmware to be updated online and integrating firmware and system software updates in one operation HP SUM and the SPP offer faster updates of individual servers and dramatically faster updates of entire BladeSystem enclosures. Further improving system uptime and stability is the fact that HP provides 12 months of support on each Service Pack for ProLiant.

The user experience around HP SUM and the SPP has been improved in several ways, starting with the web download. A single web page provides access to a single download containing both the latest version of HP SUM version 5 and the latest SPP. Optional smaller subsets with only specific types of servers or specific operating systems are offered to save on download time. The HP SUM application has been re-written to provide a more straightforward, intuitive user interface that guides the user through the steps of discovery, analyses and update, providing comprehensive information on available updates, criticality and interdependencies. This information is also available in reports. By providing the option of multiple local or shared repositories which can be easily updated from hp.com, HP SUM provides the tools to optimize stability and consistency throughout the company. While HP SUM and the SPP will recommend the combinations of firmware and system software that HP has found to be the best practice, the application gives customers the flexibility to set their own specific baseline.

The Service Pack for ProLiant has been rigorously tested with specific attention for interaction between firmware, drivers and agents both within the server as well as in interaction with the BladeSystem enclosure components (Onboard Administrator and Virtual Connect). This testing ensures the highest quality as well as providing the input for HP SUM to deploy updates taking into account all interdependencies, when determining the correct updates and order of update deployment.

NOTE: The Service Pack for ProLiant (which includes HP SUM 5) can be downloaded from www.hp.com/go/spp/download. More information can be found: www.hp.com/go/spp and <http://www.hp.com/go/hpsum>

Security

Secure Shell (SSH)

Warranty

This product is covered by a global limited warranty and supported by HP Services and a worldwide network of HP Authorized Channel Partners. Hardware diagnostic support and repair is available for one year from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Enhancements to warranty services are available through HP Care Pack services or customized service agreements. Hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.

NOTE: For Americas, APJ, and EMEA, Server Warranty includes 1 year Parts, 1 year Labor, 1-year on-site support with next business day response. Warranty repairs may be accomplished through the use of Customer Self Repair (CSR) parts. These parts fall into two categories: 1) Mandatory CSR parts are designed for easy replacement. A travel and labor charge will result when customers decline to replace

Standard Features

a Mandatory CSR part; 2) Optional CSR parts are also designed for easy replacement but may involve added complexity. Customers may choose to have HP replace Optional CSR parts at no charge. Additional information regarding worldwide limited warranty and technical support is available at: <http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html>.

Optional Features

Core Infrastructure Management

HP Systems Insight Manager

HP Systems Insight Manager (HP SIM) provides a unified, secure and extensible standards-based environment to centrally manage servers, storage and other infrastructure devices, (both HP and non-HP) across multiple operating system platforms.

Insight Management Agents

HP Insight Management Agents and Insight Management Providers are available for HP Systems Insight Manager (SIM) Integration.

The following capabilities are enabled on the 100-series G6 servers by the SNMP agents:

- Health monitoring capabilities, including monitoring for drives, fans, network, power supplies, and temperature
- Alerting capabilities, including basic alert notification for Smart Array drive pre-failure only
- Performance monitoring capabilities providing information on processor, memory, disk free space, network utilization

Easy Set-up

For additional information, please see: <http://www.hp.com/go/insight>

Easy Set-up is available for this platform as an ISO image web download. HP ProLiant Easy Set-up provides easy, step-by-step, single and multi-server server utilities to streamline server setup. The user experience is consistent with SmartStart and offers the following capabilities:

- Boot environment and GUI
- Assisted Installation: Windows 2008 Server drivers
- Manual installation:, Windows 2008 Server, and Linux drivers (specific OS support varies by server. Refer to each server's QuickSpecs for supported versions)
- HP Insight Diagnostics
- AutoRun
- HP Smart Storage Administrator (SSA) offers configuration of array controllers and storage devices and testing of array controller hardware
- SmartStart Scripting Toolkit (SSSTK) and Smart Components for software and drivers

NOTE: OS and SW available for Manual Installation are listed on each servers' QuickSpecs.

SmartStart Scripting Toolkit (SSSTK)

The SmartStart Scripting Toolkit is a server deployment product that delivers an unattended automated installation for high-volume server deployments. The SmartStart Scripting Toolkit includes a set of utilities for configuring and deploying servers in a customized, predictable, and unattended manner. These utilities enable you to duplicate the configuration of a source server on target servers with minimum user interaction.

The Toolkit is designed for IT experts with experience in scripting operating system installations and configuring ProLiant server hardware.

For additional information, please see:

<http://h18004.www1.hp.com/products/servers/management/toolkit/index.html>

Optional Features

Subscriber's Choice	Subscriber's Choice Driver and Support Alerts/Notifications is a web-based email subscription service that provides software and driver change notifications for ProLiant products. Sign up at: http://www.hp.com/go/subscriberschoice and customize your profile to receive various new alerts as they become available, on a weekly or monthly basis.
ROMPaq, software and latest drivers	The latest software, drivers, and firmware fully optimized and tested for your ProLiant server and options; downloaded from Software and Drivers download pages website at: http://www.hp.com/go/support and from www.hp.com/servers/easysetup . Contains the following: <ul style="list-style-type: none"> • HP Insight Management Agents for Systems Insight Manager (SIM) Integration • HP Systems Management Homepage • HP Smart Storage Administrator (HP SSA) • HP Insight Diagnostics

Storage Software

Whether you need to solve a specific data protection, archiving, or storage command and control challenge, or deliver on strategic consolidation, compliance, or continuity initiatives, look no further than HP storage software. Our storage software helps you reduce costs, simplify storage infrastructure, protect vital assets and respond faster to business opportunities. Storage software that gets the job done:

- **Data Protection and Recovery Software**
Whether you're a large enterprise or a smaller business, HP data protection and recovery software will cost-effectively protect you against disaster and ensure business continuity.
- **Data Archive and Migration Software**
HP's storage software enables you to comply with data retention and retrieval requirements, improve application performance, and reduce costs by efficiently migrating infrequently accessed or less valuable data to lower cost storage.
- **Storage Resource Management Software (SRM)**
HP's storage resource management software reduces operational costs and provides the command and control foundation you need to efficiently manage and visualize your physical and virtual environments.
- **Data Replication Software**
HP offers array-based and host-based replication software for use in disaster recovery, testing, application development and reporting.
- **Storage Device Management Software**
Maximize your investment in HP storage and networking with software that enables hardware-specific configuration, performance tuning and connectivity management.
- **HP StoreVirtual VSA**
With HP StoreVirtual VSA you can use the power of virtualization to turn a set of heterogeneous and disconnected physical disk drives in your servers and storage devices into a single pool of logical storage capacity.

NOTE: For more information available Storage Software including QuickSpecs, please see: www.hp.com/go/storage/software.

Factory Express Portfolio for Servers and Storage HP Factory Express offers configuration, customization, integration and deployment services for HP servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed.

Factory Express offers service packages for simple configuration, racking, installation, complex

Optional Features

configuration and design services as well as individual factory services, such as image loading, asset tagging, and custom packaging. HP products supported through Factory Express include a wide array of servers and storage: HP Integrity, HP ProLiant, HP ProLiant Server Blades, HP BladeSystem, HP 9000 servers as well as the MSAxxxx, VA7xxx, EVA, XP, rackable tape libraries and configurable network switches.

For more information on Factory Express services for your specific server model please contact your sales representative or go to: <http://www.hp.com/go/factory-express>.

HP Simple Configurator

SCE is a guided self service tool to help sales and non technical people provide customers with initial configurations in 3 to 5 minutes. You may then send the configuration on for configuration help, or use in your existing ordering processes. If you require "custom" rack configuration or configuration for products not available in SCE, please contact HP's Customer Business Center or an Authorized Partner for assistance. <http://www.hp.com/products/configurator>

HP Computation and Graphics Accelerators

Each SL210t server will accommodate up to one NVIDIA Quadro GPU PCIe card for high-end QUADRO® graphics.

Service and Support

Service and Support **HP Technology Services for Industry Standard Servers**

HP Technology Services delivers confidence, reduces risk and helps customers realize agility and stability. Connect to HP to help prevent problems and solve issues faster. Our support technology lets you to tap into the knowledge of millions of devices and thousands of experts to stay informed and in control, anywhere, any time.

Protect your business beyond warranty with HP Care Pack Services

HP Care Pack Services enable you to order the right service level, length of coverage and response time as you purchase your new server, giving you full entitlement for the term you select.

Optimized Care **Supports maintaining servers at optimum performance availability****HP Proactive Care with 24x7 coverage, three year Care Pack Service**

HP Proactive Care helps prevent problems and stabilize IT by utilizing secure, real-time, predictive analytics and proactive consultations when your products are connected to HP. This Care Pack Service combines three years' proactive reporting and advice with our 24x7 coverage and enhanced escalation management, four hour hardware response time and two hour call back for software questions on leading industry standard software running on your HP ProLiant server.
<http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>

Standard Care **Package that maintains high level of server availability****Foundation Care 24x7, three-year Care Pack Service**

HP Foundation Care 24x7 connects you to HP 24 hours a day, seven days a week for assistance on resolving issues. Hardware onsite response within four hours if needed; collaborative software included in this Care Pack service provides troubleshooting assistance on industry leading software running on your HP server. Simplify your support experience and make HP your first call for hardware or software questions.
<http://h20195.www2.hp.com/V2/GetDocument.aspx?docname=4AA4-8876ENW&cc=us&lc=en>

Basic Care **Delivers minimum recommended support service level****Foundation Care NBD, three-year Care Pack Service**

HP Foundation Care Next Business Day connects you to HP during business hours for assistance on resolving issues – features next business day hardware onsite response if needed and software call back within two hours. Collaborative software support is included and provides troubleshooting assistance on industry leading software running on your server. Simplify your support experience and make HP your first call for hardware or software questions.

Related Services **HP Datacenter Care service**

HP Datacenter Care helps you improve IT stability and security, increase the value of IT, and enable agility and innovation. It is a structured framework of repeatable, tested, and globally available services “building blocks.” You can deploy, operate, and evolve your datacenter wherever you are on your IT journey. With HP Datacenter Care, you benefit from a personalized relationship with HP via a single point of accountability for HP and others' products. For more information, visit www.hp.com/services/datacentercare

Service and Support

HP ProLiant Server Hardware Installation

Provides for the basic hardware installation of HP branded servers, storage devices and networking options to assist you in bringing your new hardware into operation in a timely and professional manner.

<http://h20195.www2.hp.com/V2/GetPDF.aspx/5981-9356EN.pdf>

Factory Express for Servers and storage

HP Factory Express offers configuration, customization, integration and deployment services for HP servers and storage products. Customers can choose how their factory solutions are built, tested, integrated, shipped and deployed. For more information on Factory Express services for your specific server model please contact your sales representative or go to: <http://www.hp.com/go/factory-express>.

Data Privacy Services

Protect your data through better media management. HP Data privacy services help manage and protect sensitive data to reduce the risk of unauthorized access to private information and help meet compliance requirements. Our retention services allow you to keep drives and other devices upon failure, our removal services provide convenient data sanitization and our recovery services allow you to safely retire IT assets and capture any remaining value from the hardware.

www.hp.com/services/dataprivacy

Additional HP Care Pack services can be found at: <http://www.hp.com/go/cpc>

Get connected to HP to improve your support experience

Prevent problems with innovative, automated monitoring tools and proactive services. Combining Proactive Care Services with our remote support technology such as Insight Online provides you with expert advice and personalized, cloud-based automated IT support, helping to prevent unplanned down time and solve problems quickly. For more information, visit:

www.hp.com/go/proactiveinsightexperience

Parts and Materials

HP will provide HP-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product quick-specs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by HP due to malfunction.

For more information

To learn more on HP ProLiant servers and HP BladeSystem servers, please contact your HP sales representative or HP Authorized Channel Partner. Or visit: <http://www.hp.com/services/proliant>

Configuration Information - Factory Integrated Models

NOTE: This section lists some of the steps required to configure a Factory Integrated Model. To ensure only valid configurations are ordered, HP recommends the use of an HP approved configurator. Contact your local sales representative for information on configurable product offerings and requirements.

NOTE: Configure-to-order (CTO) servers must start with a CTO Chassis.

NOTE: FIO indicates that this option is only available as a factory installable option.

Step 1: Base Configuration (choose one from each list unless otherwise noted)

HP Chassis	<p>NOTE: Support for 12 LFF hard drives is available for special large volume configurations. Please contact your HP representative for details.</p> <p>HP t2500 12 LFF Configure-to-order Chassis 718404-B21</p> <p>HP t2500 24 SFF Configure-to-order Chassis 737776-B21</p>
CTO Server	<p>HP ProLiant SL210t Gen8 1U Node Configure-to-order Server 718406-B21</p> <p>NOTE: If customer desires a 4 Node configuration, quantity 4 of P/N: 718406-B21 should be ordered.</p> <p>HP ProLiant SL210t Gen8 2U Node Configure-to-order Server 718407-B21</p> <p>NOTE: If customer desires a 2 Node configuration, quantity 2 of P/N: 718407-B21 should be ordered.</p>
HP Rail Kits	<p>HP DL2000 Hardware Rail Kit 611428-B21</p>
HP Power Supplies	<p>NOTE: Mixing of power supplies in the same server is not supported. All power supplies must be of the same output and efficiency rating. If non-matched power supplies are inserted, you will get errors, and operation will fail.</p> <p>NOTE: Prior to making a power supply selection it is highly recommended that the HP Power Advisor is run to determine the right size power supply for your server configuration. The HP Power Advisor is located at: www.hp.com/go/hppoweradvisor</p> <p>HP Common Slot Titanium Power Supply Kits</p> <p>NOTE: The following Power Supplies offer 96% efficient with support for Intelligent Power Discovery.</p> <p>HP 750W Common Slot Titanium Hot Plug Power Supply Kit 697581-B21</p> <p>HP Common Slot Platinum Plus Power Supply Kits</p> <p>NOTE: The following Power Supplies offer 94% Efficiency with support for Intelligent Power Discovery.</p> <p>HP 750W Common Slot Platinum Plus Hot Plug Power Supply Kit 656363-B21</p> <p>HP 1200W Common Slot Platinum Plus Hot Plug Power Supply Kit 656364-B21</p> <p>HP 1500W Common Slot Platinum Plus Hot Plug Power Supply Kit 684532-B21</p> <p>NOTE: The HP 1500W Ht Plg Pwr Supply Kit requires the removal of the back door on a 1000mm depth rack or the use of a 1200mm depth rack.</p> <p>HP Common Slot 380VDC Power Supplies</p> <p>NOTE: 94% efficiency.</p> <p>HP 1200W Common Slot 380VDC Hot Plug Power Supply Kit 684539-B21</p> <p>HP Common Slot 277VAC Power Supplies</p> <p>NOTE: 94% efficiency.</p> <p>HP 1200W Common Slot 277VAC Hot Plug Power Supply Kit 717359-B21</p> <p>NOTE: The 1200W Common Slot 277VAC and 380VDC Hot Plug Power Supply Kits do not include a power cord. Please refer to the HP Common Slot Power Supply QuickSpecs for details on cable options available for these and other HP power supplies.</p> <p>HP Common Slot 380VDC Power Supplies</p> <p>NOTE: 94% efficiency.</p>

Configuration Information - Factory Integrated Models

HP 1200W Common Slot 380VDC Hot Plug Power Supply Kit	684539-B21
NOTE: Power Specification and Technical Content for supported power supplies can be found at: http://h18000.www1.hp.com/products/quickspecs/14209_div/14209_div.html

Step 2: Choose Required Node Options (only one of the following from each list unless otherwise noted)**HP Processors****NOTE:** If two processors are desired, select one xxxxxx-L21 and one xxxxxx-B21**Entry Processors - E5-2600 v2 series Processors****NOTE:** All support up to 1333MHz memory speeds.

HP SL210t Gen8 Intel® Xeon® E5-2609v2 (2.5GHz/4-core/10MB/80W) FIO Processor Kit 721413-L21

Base Processors - E5-2600 v2 series Processors**NOTE:** All support up to 1600MHz DDR3 memory speeds.

HP SL210t Gen8 Intel® Xeon® E5-2640v2 (2.0GHz/8-core/20MB/95W) FIO Processor Kit 721407-L21

HP SL210t Gen8 Intel® Xeon® E5-2620v2 (2.1GHz/6-core/15MB/80W) FIO Processor Kit 721411-L21

HP SL210t Gen8 Intel® Xeon® E5-2650Lv2 (1.7GHz/10-core/25MB/70W) FIO Processor Kit 721422-L21

HP SL210t Gen8 Intel® Xeon® E5-2630v2 (2.6GHz/6-core/15MB/80W) FIO Processor Kit 721409-L21

HP SL210t Gen8 Intel® Xeon® E5-2630Lv2 (2.4GHz/6-core/15MB/60W) FIO Processor Kit 721424-L21

Performance Processors - E5-2600 v2 series Processors**NOTE:** All support up to 1866MHz DDR3 memory speeds.

HP SL210t Gen8 Intel® Xeon® E5-2697v2 (2.7GHz/12-core/30MB/130W) FIO Processor Kit 721426-L21

HP SL210t Gen8 Intel® Xeon® E5-2695v2 (2.4GHz/12-core/30MB/115W) FIO Processor Kit 721428-L21

HP SL210t Gen8 Intel® Xeon® E5-2690v2 (3.0GHz/10-core/25MB/130W) FIO Processor Kit 721397-L21

HP SL210t Gen8 Intel® Xeon® E5-2680v2 (2.8GHz/10-core/25MB/115W) FIO Processor Kit 721399-L21

HP SL210t Gen8 Intel® Xeon® E5-2650v2 (2.6GHz/8-core/20MB/95W) FIO Processor Kit 721405-L21

HP SL210t Gen8 Intel® Xeon® E5-2660v2 (2.2GHz/10-core/25MB/95W) FIO Processor Kit 721403-L21

HP Memory**NOTE:** HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at:
http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html**NOTE:** LRDIMM, RDIMM, and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support LRDIMM, RDIMM and UDIMMs.**NOTE:** If both xxxxxx-L21 and xxxxxx-B21 processors are selected per CTO Server above, a minimum of two memory kits must be selected.**Registered DIMMs (RDIMMs)****NOTE:** The following memory is supported by the E5-2600 v2 series Processors.

HP 4GB (1x4GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit 713981-B21

HP 4GB (1x4GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit 708637-B21

HP 8GB (1x8GB) Dual Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low 713983-B21

Configuration Information - Factory Integrated Models

Voltage Memory Kit		
HP 8GB (1x8GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit		731765-B21

HP Power Supplies

NOTE: Mixing of power supplies in the same server is not supported. All power supplies must be of the same output and efficiency rating. If non-matched power supplies are inserted, you will get errors, and operation will fail.

NOTE: Prior to making a power supply selection it is highly recommended that the HP Power Advisor is run to determine the right size power supply for your server configuration. The HP Power Advisor is located at: www.hp.com/go/hppoweradvisor

HP Common Slot Platinum Plus Power Supply Kits

NOTE: The following Power Supplies offer 94% Efficiency with support for Intelligent Power Discovery.

HP 750W Common Slot Platinum Plus Hot Plug Power Supply Kit	656363-B21
HP 1200W Common Slot Platinum Plus Hot Plug Power Supply Kit	656364-B21
HP 1500W Common Slot Platinum Plus Hot Plug Power Supply Kit	684532-B21

NOTE: The HP 1500W Ht Plg Pwr Supply Kit requires the removal of the back door on a 1000mm depth rack or the use of a 1200mm depth rack.

HP Common Slot Platinum Plus Power Supply Kits

NOTE: The following Power Supplies offer 94% Efficiency with support for Intelligent Power Discovery.

HP 750W Common Slot Titanium Hot Plug Power Supply Kit	697581-B21
--	------------

HP Common Slot 277VAC Power Supplies

NOTE: 94% efficiency.

HP 1200W Common Slot 277VAC Hot Plug Power Supply Kit	717359-B21
---	------------

NOTE: The 1200W Common Slot 277VAC and 380VDC Hot Plug Power Supply Kits do not include a power cord. Please refer to the HP Common Slot Power Supply quickspec for details on cable options available for these and other HP power supplies.

HP Common Slot 380VDC Power Supplies

NOTE: 94% efficiency.

HP 1200W Common Slot 380VDC Hot Plug Power Supply Kit	684539-B21
---	------------

NOTE: Power Specification and Technical Content for supported power supplies can be found at:

http://h18000.www1.hp.com/products/quickspecs/14209_div/14209_div.html

Additional Options

NOTE: Some options may not be integrated at the factory. To ensure only valid configurations are ordered, HP recommends the use of an HP approved configurator. Contact your local sales representative for additional information.

HP SL Advanced Power Manager	<p>The SL Advanced Power Manager is an optional rack level solution for the SL210t which enables server-level DC (or hardware) power on and off and server-level monitoring. In addition, the SL APM will automatically discover SL hardware components which are connected into the SL APM solution.</p> <p>The SL APM does not replace rack PDUs, but is designed to enable the utilization of basic, low cost, rack PDUs while providing the functionality of 'switched' PDUs (which provide hardware power on/off of individual servers by turning off the AC power to the power supplies of a given server). Because the SL servers share power supplies to optimize power efficiency, using 'switched' PDUs to turn off all the power supplies in the chassis will result in the loss of all server nodes in that chassis. The SL APM solves this by allowing server node-level hardware power on/off of the DC power to the individual server node motherboards.</p> <p>SL-APM support the SL Dynamic power capping feature for chassis and Rack levels</p>

Memory

HP ProLiant SL210t Gen8 Server

NOTE: Memory configurations show Maximum Memory population.

Maximum Memory

Up to 256GB, using PC3-14900R DDR3 Registered (RDIMM) memory, operating at 1866MHz when fully populated at 1 DIMMs per Channel in 16 slots

Up to 128GB, using PC3-14900E DDR3 Unbuffered (UDIMM) memory, operating at 1866MHz when fully populated at 1 DIMMs per Channel in 16 slots

Up to 512GB, using PC3-14900L DDR3 Load Reduced Low (LRDIMM) memory, operating at 1866MHz when fully populated at 1 DIMMs per Channel in 16 slots

NOTE: RDIMMs and UDIMMs cannot be in the same system so the maximum RDIMM memory configuration can only be achieved with BTO models by replacing all of the UDIMMs.

NOTE: Chart does not represent all possible memory configurations.

DDR3 memory population guidelines

For detailed memory configuration rules and guidelines, please use the Online DDR3 Memory Configuration Tool:

www.hp.com/go/ddr3memory-configurator

- Some DIMM installation guidelines are summarized below:
- Memory DIMM blanks are required in any empty DIMM slots for proper cooling. If DIMMs are removed or the memory configuration is changed, all DIMM slots must be populated with either a blank or a DIMM.
- For servers with sixteen (16) memory slots
- There are four (4) channels per processor; eight (8) channels per server
- There are four (4) DIMM slots for two memory channels and one (2) DIMM slots for one memory channel; sixteen (16) total slots
- Memory channel 2 and 4 consists of the four (4) DIMM slots that are closest to the processor
- Memory channels 1 and 3 consist of the four(4) DIMM slots that are furthest from the processor
- DIMM slots that are white should be populated first
- Do not mix Unbuffered memory (UDIMMs) with Registered memory (RDIMMs)
- Do not install DIMMs if the corresponding processor is not installed
- If only one processor is installed in a 2CPU system, only half of the DIMM slots are available
- To maximize performance, balance the total memory capacity between all installed processors
- It is not required, but it is recommended to load the channels similarly if possible
- You can only have up to eight (8) ranks installed per channel
- You can only install two quad-rank DIMMs per channel
- You can only install one UDIMMs per channel; if available, the second slot in the channel must remain empty
- Populate DIMMs from heaviest load (quad-rank) to lightest load (single-rank) within a channel
- Heaviest load (DIMM with most ranks) within a channel goes furthest from the chipset
- Low Voltage DIMMs can only be used with Intel Xeon 5600 series processors.
- For memory mirroring mode Channels 1 and 2 are populated identically
- For lock-step mode, channel 3 must be unpopulated. DIMMs in channels 1 and 2 will be installed in pairs. The paired slots will be 1,4; 2,5; 3,6 on a 3DPC system or 1,4; 2,5; on a 2DPC system
- If mixing DIMM voltage is a requirement, please note that the DIMMs will run at 1.5V since all 1.35V are capable of supporting 1.5V operations.

QuickSpecs

HP SL2500 Scalable System

Memory

DIMM Type	Registered DIMMS (RDIMMs)											Low Reduced DIMMs (LRDIMMs)	Unbuffered with ECC DIMMs (UDIMMs)					
DIMM Rank	Single Rank (1R)					Dual Rank (2R)						Quad Rank (4R)	Single Rank (1R)		Dual Rank (2R)			
DIMM Capacity	4GB	4GB	8GB	8GB	8GB	8GB	8GB	8GB	16GB	16GB	16GB	32GB	2GB	2GB	4GB	4GB	8GB	8GB
DIMM Native Speed (MHz)	1600	1866	1600	1866	1600	1600	1600	1866	1600	1600	1866	1866	1600	1866	1600	1866	1600	1866
Voltage	LV	Std	Std	Std	LV	LV	Std	Std	LV	Std	Std	Std	LV	Std	LV	Std	LV	Std
SLOTS THAT CAN BE POPULATED																		
16 slot servers	16	16	16	16	16	16	16	16	16	16	16	16	16	16	16	16	16	16
MAXIMUM CAPACITY (GB)																		
Capacity	64	64	128	128	128	128	128	256	256	256	512	32	32	64	64	128	128	
POPULATED DIMM SPEED (MHz)																		
1 DIMM Per Channel	1600	1866	1600	1866	1600	1600	1866	1600	1600	1866	1866	1600	1866	1600	1866	1600	1866	
2 DIMM Per Channel	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	1600	
NOTES:																		
<ul style="list-style-type: none"> Depending on the memory configuration and processor model, the memory speed may run at 1866MHz, 1600MHz, 1333MHz, or 1066MHz. Please see Memory Population Table or the Online Memory Configuration Tool at: www.hp.com/go/ddr3memory-configurator PC3 14900 DIMMs have a maximum speed of 1866MHz. Mixing DIMM speeds is allowed, but the system processor speed rules always override the DIMM capabilities If you do mix DIMM speeds, the memory bus will default to the minimum clock rate of all DIMMs in the system - even if the slower DIMM is on the other processor If you install 1x 1600MHz DIMM in channel 1 and 1x 1866MHz DIMM in channel 2, the maximum speed will be 1600MHz. If you install 1x 1066MHz DIMM in channel 1 and 5x 1866MHz DIMMs with 1 DIMM Per Channel (DPC) in each of the other channels, the maximum speed will be 1600MHz If you install 2DPC in one channel (if applicable) and 1DPC in all other channels, you run at 1866MHz Maximum memory speed will also depend on the processor installed References to the above MHz speeds are for the various speeds of DDR3 DIMMs; 1333 refers to DDR3-1333, etc.

	5	H	5	H	

DDR3 memory options part number decoder

Following are memory options available from HP:

HP Memory

NOTE: HP memory from previous generation servers are not qualified or warranted with this HP ProLiant Server. HP SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen8. For additional information, please see the HP SmartMemory QuickSpecs at: http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html

NOTE: LRDIMM, RDIMM, and UDIMMs are all distinct memory technologies and cannot be mixed within a server. The majority of ProLiant Gen8 servers support LRDIMM, RDIMM and UDIMMs.

Registered DIMMs (RDIMMs)

NOTE: The following memory is supported by the E5-2600 v2 series Processors.

HP 4GB (1x4GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit 713981-B21

HP 4GB (1x4GB) Single Rank x4 PC3-14900R (DDR3-1866) Registered CAS-13 Memory Kit 708637-B21

HP 8GB (1x8GB) Dual Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit 713983-B21

Memory

HP 8GB (1x8GB) Single Rank x4 PC3L-12800R (DDR3-1600) Registered CAS-11 Low Voltage Memory Kit	731765-B21

Power Cord		AF556A

Server Power Cords

One 6' Highline (IEC-IEC) power cord ships standard

NOTE: ProLiant SL servers are primarily connected to PDU's in data center racks so they ship standard with only a PDU power cord (416151-B21).

NOTE: Japan BTO and CTO configurations get the 6' 4165151-291 power cord in addition. China BTO and CTO configurations get the 6' 416151-AA1 power cord in addition.

NOTE: If customers require a local power cord, they can check the power cord matrix for the appropriate cord. Please see the following power cord matrix:

<http://www.hp.com/go/powercordmatrix>.

	Power Supply Output (per power supply)	Rated Steady-State Power 653.10W (at 100 VAC), 653.08W (at 200 VAC)
	System Inlet Temperature	Operating 50° to 95° F (10° to 35° C) at sea level with an altitude derating of 1.8°F per every 1000 ft (1.0°C per every 304.8 m) above sea level to a maximum of 10,000 ft (3048 m), no direct sustained sunlight. Maximum rate of change is 18°F/hr (10°C/hr). The upper limit may be limited by the type and number of options installed. System performance may be reduced if operating with a fan fault or above 86°F (30°C). Non-operating 40° to 140° F (-40° to 60° C) Maximum rate of change is 36°F/hr (20°C/hr).
	Relative Humidity (non-condensing)	Operating 10% to 85% relative humidity (Rh), 82.4°F (28°C) maximum wet bulb temperature, non-condensing. Non-operating 10% to 95% relative humidity (Rh), 101.7°F (38.7°C) maximum wet bulb temperature, non-condensing.
	Altitude	Operating 10,000 ft (3048 m). This value may be limited by the type and number of options installed. Maximum allowable altitude change rate is 1500 ft/min (457 m/min). Non-operating 30,000 ft (9144 m). Maximum allowable altitude change rate is 1500 ft/min (457 m/min).
	Acoustic Noise	Listed are the declared A-Weighted sound power levels (LWAd) and declared average bystander position A-Weighted sound pressure levels (LpAm) when the product is operating in a 23°C ambient environment. Noise emissions were measured in accordance with ISO 7779 (ECMA 74) and declared in accordance with ISO 9296 (ECMA 109). The listed sound levels apply to minimally populated shipping configurations. Additional options may result in increased

Technical Specifications

	sound levels.		
	Node type	1U	2U
	Idle		
	<i>LWAd</i>	6.4 B	6.5 B
	<i>LpAm</i>	47 dBA	48 dBA

Emissions Classification (EMC)	FCC Rating	Class A	
	Normative Standards	CISPR 22; EN55022; EN55024; FCC CFR 47, Pt 15; ICES-003; CNS13438; GB9254; K22;K24; EN 61000-3-2; EN 61000-3-3; EN 60950-1; IEC 60950-1	

NOTE: Product conformance to cited product specifications is based on sample (type) testing, evaluation, or assessment. This product or family of products is eligible to bear the appropriate compliance logos and statements.

HP Dynamic Smart Array B120i Controller	Dimensions	Embedded
	Disk Drive Interface - Transfer rate	Up to 6Gb/s SATA (Serial ATA)
	Connectors	6 internal SATA connectors
	Server Interface	x4 PCIe 2.0
	SATA Speed	6Gb/s SATA links
	Cache Memory	Zero Memory RAID has no cache memory
	Logical Drives Supported	Up to 8 logical volumes (6 physical drives)
	Host Memory Addressing	64-bit, supporting greater than 4GB server memory space
	Hot Plug Support	Yes
	RAID Support	RAID 0 (Striping), RAID 1 (Mirroring) RAID 1+0 (Striping & Mirroring)

Embedded NC361i PCIe Gigabit Server Adapter	Network Interface	Integrated 10/100/1000BASE-T Transceiver Combines a triple-speed IEEE 802.3TM - Compliant Media Access Controller (MAC) with a triple-speed Ethernet transceiver.	
	Data Transfer Method	Compliant to x4 PCIe Specification	
	Controller	Intel® 82576	
	Network Transfer Rate	10Base-T (Half-Duplex)	10 Mb/s
		10Base-T (Full-Duplex)	20 Mb/s
		100Base-TX (Half-Duplex)	100 Mb/s
		100Base-TX (Full-Duplex)	200 Mb/s
		1000Base-TX (Half and Full-Duplex)	2000Mb/s
	Connector	RJ-45 connector	
	Cable Support	Performs all the physical layer functions for 10BASE-T, 100BASE-T, and 1000BASE-T Theme on standard Category 5 UTP	

Environment-friendly Products and Approach	End-of-life Management and Recycling	Hewlett-Packard offers end-of-life HP product return, trade-in, and recycling programs in many geographic areas. For trade-in information,
---	---	--

Technical Specifications

please go to: <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.

QuickSpecs

Summary of Changes

Date	Version History	Action	Description of Change:
5-Dec-2014	From Version 12 to 13	Changed	Update DIMMs slot and configuration diagrams
1-Nov-2014	From Version 11 to 12	Changed	Changes made in Service and Support sections.
11-Jul-2014	From Version 10 to 11	Changed	Changes were made in North America and Canada only.
09-Jun-2014	From Version 9 to 10	Changed	Basic Care, Hard Drives, Insight Software, Storage Controllers, Storage Options, Rail Kits, USB and SD Options, and Care Pack Services were revised.
31-Mar-2014	From Version 7 to 9	Changed	HP Computation and Graphics Accelerators was added / Hard Drives and HP Insight Software were revised / HP Basic and Remote Monitoring Power Distribution Unit product descriptions were revised
18-Feb-2014	From Version 6 to 7	Changed	Changed What's New to read: Support for the SL210t Gen8 2U server
09-Dec-2013	From Version 5 to 6	Changed	Changes were made throughout Configuration Information, Core Options, and Additional Options.
11-Oct-2013	From Version 4 to 5	Changed	Changes were made throughout Configuration Information, Core Options, and Additional Options.
02-Oct-2013	From Version 3 to 4	Changed	Changes made to Standard Features - Storage Controller
20-Sep-2013	From Version 2 to 3	Changed	HP Dynamic Smart Array B120i Controller in Technical Specifications was revised.
13-Sep-2013	From Version 1 to 2	Changed	Mentions of G8 were changed to Gen8 Memory, Hard Drives, Networking, Storage Controllers, Storage Options, HP Power Distribution Units, Intelligent Power Distribution Units, and Rack Options were revised HP Care Pack Services was removed from Additional Options
