

Overview

HPE Virtual Connect 16Gb 24-port Fibre Channel Module for c-Class BladeSystem

The HPE Virtual Connect 16Gb 24-port Fibre Channel Module for c-Class BladeSystem is a new class of blade interconnect that simplifies server connections by cleanly separating the server enclosure from the SAN. It simplifies the process of connecting servers to fibre channel networks by reducing cables and your SAN switch management domain, and by allowing you to change servers in just minutes.

You can reduce costs and simplify connections to SANs, consolidate your network connections and enable administrators to add, replace and recover server resources on-the-fly. Being standards-based it looks like a pass-thru device to the fibre channel network, yet provides all the key benefits of integrated switching including high performance 16Gb uplinks to the SAN. The integrated design frees up rack space, reduces power and cooling requirements, and reduces cables and small form-factor pluggable transmitters. Enhanced N-port trunking support with external Brocade switches provides higher bandwidth to enable demanding applications and high density server virtualization.

The HPE Virtual Connect 16Gb 24-port Fibre Channel Module is protected by HPE Services 3-Years Next Business Day 9x5 Hardware Support.

Models

HPE Virtual Connect 16Gb 24-port Fibre Channel Module for c-Class BladeSystem

751465-B21

HPE Virtual Connect 16Gb 24-port Fibre Channel TAA Module for c-Class BladeSystem

778720-B21

Supported Products

Compatibility The HPE Virtual Connect 16Gb 24-port Fibre Channel Module requires Virtual Connect Firmware v4.40 and supports the following hardware.

HPE BladeSystem ProLiant and Integrity Servers HPE ProLiant Servers:

- Gen9 ProLiant Servers (16Gb and 8G support via 16G HBAs): BL460, BL660
- Gen8 ProLiant Servers (16Gb and 8G support via 16G HBAs, 8G support via 8G HBAs): BL460, BL465, BL660
- Gen7 ProLiant Servers (8Gb support via 8G HBAs): BL460c, BL490c, BL465c, BL685, BL620c, BL680c

HPE Integrity Servers:

- HPE Integrity BL860x i2 Server series
- HPE Integrity BL860c i4 Server series
- HPE Integrity BL870c i2 Server series
- HPE Integrity BL870c i4 Server series
- HPE Integrity BL890c i4 Server series

For the latest additional information on required firmware versions and to download firmware upgrades, see the Hewlett Packard Enterprise website: <https://www.hpe.com/us/en/products/servers/smart-update.html>

Fibre Channel Host Bus Adapters (HBA)

- QLogic QMH2672 16Gb FC HBA, Emulex LPe1605 16Gb FC HBA
- QLogic QMH2572 8Gb FC HBA, Emulex LPe1205A 8Gb FC HBA
- QLogic QMH2562 8Gb FC HBA, Emulex LPe1205 8Gb FC HBA, Brocade 804 8Gb FC HBA

HPE ProLiant BL c-Class Server Blade Enclosures HPE BladeSystem c-Class c7000 Enclosure with Onboard Administrator:

- HPE BLc7000 Platinum Enclosure (16G and 8G support)
- HPE BLc7000 Enclosure (8G only support)

NOTE: The HPE BladeSystem c7000 Platinum Enclosure is required to permit 16 Gbps speed on the internal ports. Other HPE BladeSystem c7000 Enclosures will have a maximum speed of 8 Gbps.

NOTE: The Virtual Connect 16Gb 24-port Fibre Channel modules are supported on c7000 enclosures with the following SKUs: 5XXXXX-B21, 6XXXXX-B21, and 7XXXXX-B21. 5XXXXX-XXX has been discontinued, but the module is supported in these deployed enclosures.

NOTE: VC 16Gb 24-port modules are not supported in BladeSystem c3000 enclosures.

For the latest additional information on required firmware versions and to download firmware upgrades, see the Hewlett Packard Enterprise website: <https://www.hpe.com/us/en/products/servers/smart-update.html>

HPE Service Pack for ProLiant Gen 9 Servers: Version 2014.09.0 or greater.

The HPE Service Pack for ProLiant (SPP) with HPE Smart Update Manager (HPE SUM) as the deployment engine provides a comprehensive approach to firmware and system software maintenance. The SPP is a comprehensive collection of firmware and system software components, all tested together as a single solution stack that include drivers, agents, utilities, firmware packages for HPE ProLiant servers, controllers, storage, blades and enclosures, and other options. It is available on all supported HPE ProLiant Gen 9 and Gen 8 servers (HPE ProLiant SL/ML/DL/BL 100, 200, 300, 500, 700, 900 servers, and HPE CloudSystem Matrix) in addition to earlier generation HPE ProLiant servers. The SPP is released with most major HPE ProLiant server releases. To access the latest HPE Service Pack for ProLiant click here:

Mezzanines

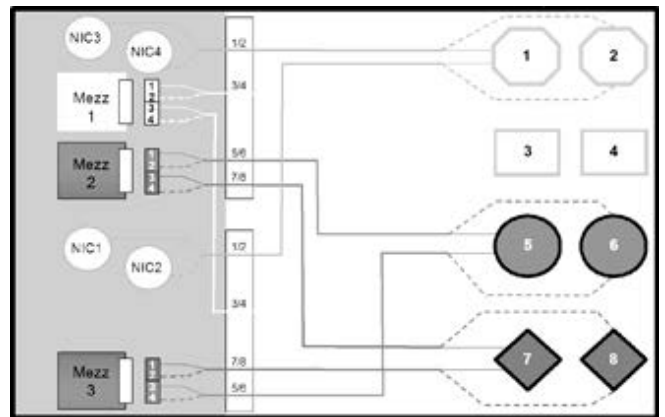

Port Mapping

Port mapping differs slightly between full height and half height server blades due to the support for additional Mezzanine cards on the full height version.

Hewlett Packard Enterprise has simplified the processes of mapping Mezzanine ports to switch ports by providing intelligent management tools via the Onboard Administrator and HPE Insight Manager Software. The Onboard Administrator Guide, Enclosure Setup and Installation Guide provides detailed information on port mapping.

c7000 Half Height Server Blade

c7000 Full Height Server Blade

The following are supported configurations for the HPE Virtual Connect 16Gb 24-Port Fibre Channel Module. Please note that

Supported Products

other interconnect options can be installed in the enclosure, but they do not inherit the benefits of Virtual Connect. Switches and Pass-Thru modules will operate per their default configurations. Any moves, additions, or changes to servers which are connected to non-Virtual Connect modules will require reconfiguration on the LAN and/or SAN. The Virtual Connect Manager will only manage Virtual Connect Modules.

The HPE Virtual Connect 16Gb 24-Port Fibre Channel Module requires a Virtual Connect Ethernet Module installed in the system for management and administration.

Stacking Configuration

Stacking is only supported on Virtual Connect Ethernet Modules. The Virtual Connect Fibre Channel modules are managed via the Virtual Connect Ethernet Modules. The Virtual Connect firmware is dynamically mirrored between modules so all configuration data is updated simultaneously in a stack. Fibre Channel data packets are not transmitted between modules in a stacked configuration.

Standard Features

Product Features Performance

- (8) 4/8/16Gb Auto-negotiating Fibre Channel uplinks connected to external SAN switches
- (2) 16Gb Fibre Channel SFP+ Transceivers included with the Virtual Connect Fibre Channel Module
- (16) 8/16Gb Auto-negotiating Fibre Channel downlink ports provide maximum HBA performance
- HBA Aggregation on uplinks ports using ANSI T11 standards-based N_Port ID Virtualization (NPIV) technology
- Allows up to 255 virtual machines running on the same physical server to access separate storage resources
- Extremely low latency throughput provides switch-like performance.
- FIPS 140-2 support

Management

- Storage management is no longer constrained to a single physical HBA on a server blade
- Managed with the Virtual Connect Ethernet Module
- Does not add to SAN switch domains or require traditional SAN management
- Appears as a pass-thru device to the SAN Manager

Virtual server profiles

- Provisioned storage resource is associated directly to a specific virtual machine - even if the virtual server is re-allocated within the BladeSystem
- Ability to pre-configure server I/O connections
- Ability to move, add, or change servers on the fly
- Once defined, SAN Administrators don't have to be involved in server changes

Trunking

- Support for a single trunk made up of up to eight SAN ports for a total of up to 128 Gbps balanced throughput.
- Trunking of the SAN-facing ports with external Brocade or HPE B-series switches provides a high-bandwidth solution while lowering costs through fewer SFPs and cables.
- N-Port trunking supported in NPIV mode.

NOTE: Trunking is supported by external Brocade SAN switches, and can be configured only on the external Brocade switch, not on the Virtual Connect Fibre Channel module.

Options

- HPE Virtual Connect FlexFabric-20/40 F8 Module for c-Class BladeSystem
- HPE Virtual Connect FlexFabric 10Gb/24-port Module for c-Class BladeSystem
- HPE Virtual Connect Flex-10/10D Module for c-Class BladeSystem
- Virtual Connect Enterprise Manager

Service and Support, HPE Care Pack and Warranty Information

Service and Support

HPE Technology Services for Industry Standard Servers

HPE Technology Services delivers confidence, reduces risk and helps customers realize agility and stability. Connect to HPE to help prevent problems and solve issues faster. Our support technology lets you to tap into the knowledge of millions of devices and thousands of experts to stay informed and in control, anywhere, any time.

Protect your business beyond warranty with HPE Care Pack Services

HPE Care Pack Services enable you to order the right service level, length of coverage and response time as you purchase your new server, giving you full entitlement for the term you select.

Recommended HPE Care Pack Services for your HPE product

Optimized Care

Foundation Care CTR, three-year Care Pack Service

HPE Foundation Care Call-To-Repair Service connects you to Hewlett Packard Enterprise 24 hours a day, seven days a week for assistance on resolving issues -this includes our highest level commitment to repair hardware within six hours after opening your case and respond to software questions within two hours. Hewlett Packard Enterprise is the only leading manufacturer who makes this level of coverage available as a standard service offering for your most valuable servers. Collaborative software support is included and provides troubleshooting assistance on industry leading software running on your server. Simplify your support experience and make HPE your first call for hardware or software questions.

<https://www.hpe.com/h20195/V2/GetDocument.aspx?docname=4AA4-8876ENW&cc=us&lc=en>

Standard Care

Foundation Care 24x7, three-year Care Pack Service

HPE Foundation Care 24x7 connects you to Hewlett Packard Enterprise 24 hours a day, seven days a week for assistance on resolving issues. Hardware onsite response within four hours if needed; collaborative software included in this Care Pack service provides troubleshooting assistance on industry leading software running on your HPE server. Simplify your support experience and make HPE your first call for hardware or software questions.

HPE Installation of ProLiant Add On Options Service

This easy-to-buy, easy-to-use HPE Care Pack service helps ensure that your new Hewlett Packard Enterprise hardware is installed smoothly, efficiently, and with minimal disruption of your IT and business operations

Additional HPE Care Pack services can be found at: <http://ssc.hpe.com/portal/site/ssc/>

Get connected to HPE to improve your support experience

Connecting products to Hewlett Packard Enterprise will help prevent problems with 24x7 monitoring, prefailure alerts, automatic call logging, and parts dispatch. With Connected products, you can have a dashboard to manage your IT anywhere, anytime, from any device.

HPE Support Center

Personalized online support portal with access to information, tools and experts to support Hewlett Packard Enterprise business products. Submit support cases online, chat with HPE experts, access support resources or collaborate with peers. Learn more <http://www.hpe.com/info/hpesc>

The HPE Support Center Mobile App allows you to resolve issues yourself or quickly connect to an agent for live support. Now, you can get access to personalized IT support anywhere, anytime.

Service and Support, HPE Care Pack and Warranty Information

HPE Insight Remote Support and HPE Support Center are available at no additional cost with a HPE warranty, HPE Care Pack or Hewlett Packard Enterprise contractual support agreement. Learn more about Insight Remote Support <http://www.hpe.com/info/insightremotesupport/docs> and Insight Online <http://www.hpe.com/info/insightonline>

NOTE: HPE Support Center Mobile App is subject to local availability.

Parts and materials

Hewlett Packard Enterprise will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product QuickSpecs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

Warranty

Server Blade Interconnect Limited Warranty includes 1 year Parts, 1 year Labor, 1-year on-site support. Additional information regarding worldwide limited warranty and technical support is available at: <http://h17007.www1.hpe.com/us/en/enterprise/servers/warranty/>

Service Coverage

HPE Virtual Connect 16Gb 24-port Fibre Channel Module and HPE Virtual Connect 16Gb 24-Port Fibre Channel TAA Module for c-Class BladeSystem include 3 years 9x5 Next Business Day hardware support. If you have requirements for longer durations of service, quicker response times or more comprehensive services, HPE Care Pack services for the HPE Virtual Connect 16Gb 24-port Fibre Channel Module and HPE Virtual Connect 16Gb 24-Port Fibre Channel TAA Module are available to uplift or extend your coverage.

For more information

To learn more on HPE services, please contact your Hewlett Packard Enterprise sales representative or Hewlett Packard Enterprise Authorized Channel Partner. Or visit: <http://www.hpe.com/services/bladesystem>

Service and Support Offerings

NOTE: Some options, including HPE Virtual Connect 16Gb 24-port Fibre Channel Module and HPE Virtual Connect 16Gb 24-Port Fibre Channel TAA Module for c-Class BladeSystem, are not covered under the c7000 enclosure Care Packs. HPE Virtual Connect 16Gb 24-port Fibre Channel Module and HPE Virtual Connect 16Gb 24-Port Fibre Channel TAA Module for c-Class BladeSystem include 3 years 9x5 Next Business Day support. Care Pack service level support should always be uplifted to match existing BladeSystem service level.

Foundation Care Services

HPE 3 year Foundation Care 24x7 Virtual Connect 16Gb 24-Port Service	U8AL6E
HPE 3 year Foundation Care Call to Repair Virtual Connect 16Gb 24-Port Service	U8AL9E

Product Specifications Software	Industry Standard NPIV Support	The Virtual Connect Fibre Channel module works by aggregating multiple FC HBA ports over a single N-port uplink through the use of N_port_ID virtualization (NPIV). NPIV allows multiple distinguishable identities (multiple port WWNs and port IDs) over a single N-port connection. Most Fibre Channel SAN switch vendors have support for NPIV in their latest firmware release. By conforming to the NPIV standard, SAN equipment interoperability simplified. The Virtual Connect Fibre Channel Module Provides basic 4:1, 8:1, or 16:1 NPIV Fibre Channel concentration.
	Data Center Connectivity	<p>Each Virtual Connect Fibre Channel module supports up to 8 SAN fabrics and is typically connected to a Fibre Channel switch that has been configured to run in NPIV mode. The 8 uplink ports are speed selectable from 16, 8 or 4Gb/s.</p> <p>The setup wizard allows SAN administrators to name the fabric that servers will connect into and set the oversubscription rate. Fibre Channel boot parameters and WWN administration are configurable options that can be integrated into server profiles.</p> <p>In an NPIV environment, there is an initial brief login function between the Virtual Connect Fibre Channel Module and the data center switch. Once completed, all HBA connections appear as though they are directly connected between the server and the SAN switch. The Virtual Connect Fibre Channel Module appears as a pass-thru device to the SAN, yet cables are reduced as much as 16:1.</p>
	Management Features	<p>An HPE Virtual Connect Ethernet Module must be present in order to configure the VC FC Modules. This provides a complete Virtual Connect Environment for the server connections.</p> <p>Simple and intuitive Graphical User Interface (GUI) and Command Line Interface (CLI) for defining, configuring, and managing all elements of the Virtual Connect Domain.</p> <p>Setup Wizards for initial domain installation and configuration and network and SAN configuration.</p> <p>Comprehensive administration, definition, and management of Ethernet Networks,</p>

Technical Specifications

Shared Uplink Sets using VLANs, SAN Fabric management, and Server Profiles

Domain Management of user accounts, enclosure, Virtual Connect domain settings, and firmware updates

The location and status of Virtual Connect Modules in the HPE c-Class Enclosure and Onboard Administrator can be viewed from the Hardware Status page. Including at-a-glance detailed information of the hardware elements via mouse-over pop-up windows.

WWN Address Administration allows local administration of predefined WWN addresses ranges to allow pre-provisioning of SAN volumes.

VC manager runs as a high-availability pair when HPE VC-Ethernet Modules are installed in adjacent bays. All configuration data is stored in flash memory and check-pointed to the standby module. Configurations can also be backed up to a workstation via the GUI and CLI.

Environment-friendly Products and Approach

End-of-life Management and Recycling

Hewlett Packard Enterprise offers end-of-life Hewlett Packard Enterprise product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to: <http://www.hpe.com/info/recycle>. To recycle your product, please go to: <http://www.hpe.com/info/recycle> or contact your nearest Hewlett Packard Enterprise sales office. Products returned to Hewlett Packard Enterprise will be recycled, recovered or disposed of in a responsible manner.

Technical Specifications

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard Enterprise web site at: <http://www.hpe.com/info/recycle>. These instructions may be used by recyclers and other WEEE treatment facilities as well as HPE OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.
