

# Hortonworks Data Platform Developer—Custom YARN Applications (EDU-PRV-DEV- YARN-200) H7G72S

<b>HPE course number</b>	H7G72S
<b>Course length</b>	2 days
<b>Delivery mode</b>	ILT
<b>View schedule, local pricing, and register</b>	<a href="#">View now</a>
<b>View related courses</b>	<a href="#">View now</a>

This 2-day hands-on training course teaches students how to develop custom YARN applications for Apache Hadoop. Students will learn the details of the YARN architecture, the steps involved in writing a YARN application, the details of writing a YARN client and ApplicationMaster, and how to launch Containers. Applications are developed using Eclipse and Gradle connected remotely to a 7-node HDP 2.1 cluster running in a virtual machine that the students can keep for use after the training.

## Why HPE Education Services?

- IDC MarketScape leader 4 years running for IT education and training\*
- Recognized by IDC for leading with global coverage, unmatched technical expertise, and targeted education consulting services\*
- Key partnerships with industry leaders OpenStack®, VMware®, Linux®, Microsoft®, ITIL, PMI, CSA, and (ISC)²
- Complete continuum of training delivery options—self-paced eLearning, custom education consulting, traditional classroom, video on-demand instruction, live virtual instructor-led with hands-on lab, dedicated onsite training
- Simplified purchase option with HPE Training Credits

## Audience

- Software engineers familiar with Java who need to develop YARN applications on Hadoop 2.x by writing custom YARN clients and ApplicationMasters in Java

## Prerequisites

Experienced Java developers who have:

- Attended the H7G67S Hortonworks Data Platform Developer: Java course; or
- Attended the Hortonworks Data Platform Developer: Apache Pig and Hive course; or
- Possess similar Hadoop development knowledge and understand HDFS and the MapReduce framework

## Course objectives

At the completion of the course, students will be able to:

- Explain the architecture of YARN

- Explain the lifecycle of a YARN application
- Write a YARN client application
- Run a YARN application on a Hadoop 2.x Cluster
- Monitor the status of a running YARN application
- View the aggregated logs of a YARN application
- Configure a ContainerLaunchContext
- Define a LocalResource for sharing application files across the cluster
- Write a YARN ApplicationMaster
- Explain the differences between synchronous and asynchronous ApplicationMasters
- Allocate Containers in a cluster
- Launch Containers on NodeManagers

\*Realize Technology Value with Training, IDC Infographic 2037, Sponsored by HPE, January 2016

- Write a custom Container to perform specific business logic
- Explain the job schedulers of the ResourceManager
- Define queues for the Capacity Scheduler

### **Benefits to you**

- This course will provide in depth explanation on how to develop custom YARN applications

## Detailed course outline

---

### Day 1

- Unit 1: The YARN Architecture
- Unit 2: Overview of a YARN Application
- Unit 3: Writing a YARN Client

---

### Day 2

- Unit 4: Writing a YARN ApplicationMaster
- Unit 5: Containers
- Unit 6: Job Scheduling

---

### Hands-On Labs

Students will work through the following lab exercises using the Hortonworks Data Platform 2.1:

- Running a YARN Application
  - Setup a YARN Development Environment
  - Writing a YARN Client
  - Submitting an ApplicationMaster
  - Writing an ApplicationMaster
  - Requesting Containers
  - Running Containers
  - Writing Custom Containers
-
