Architecting Multi-site HP Storage Solutions (H8C04S_00759555)

The training will review, and use case study lab exercises to expand the skills of Storage Architects to consult, design and propose solutions in the HP Converged Storage portfolio. The training enables a Storage Architect to identify and translate business requirements into a multi-site storage solution design that supports deduplication and back-up/recovery solutions for information protection and storage solutions for information retention.

What is new?

The Architecting Multi-site HP Storage Solutions course contains updates for the HP Converged Storage platforms as well as new and updated storage sizing and configuration lab exercises for HP 3PAR StoreServ, HP StoreVirtual and HP StoreOnce product platforms.

Audience

Senior storage architects who lead a team designing storage environments and who desire to leverage HP Converged Storage Systems in multi-site environments. The individual should have an average of 3-5 years experience designing and architecting storage solutions in a multi-vendor environment. This training is important for storage IT professionals of HP channel partners, HP pre-sales employees and enterprise level organizations who need to credibly design and propose tailored storage solutions to most effectively meet enterprise level, or multi-site, business needs with optimum ROI.
