

HP 教育訓練中心課程簡介

Project Cost Estimating (HE544S)

This two-day, in-depth course focuses on approaches to estimating costs and schedules for any project. Understand the various project areas that must be estimated, and the tools and methodologies best suited for the estimates you will prepare. Recognize the importance of effective estimating throughout the project management lifecycle.

適合對象

- This course is intended for project managers interested in best practices that apply to diverse projects in multiple industries. It is especially suited for people seeking project management certification.

先修課程

- Project Management Fundamentals (HC577S)

課程目標

Upon completion of this course, you will be able to:

- Define cost estimating, cost estimating terms, and cost estimating concepts.
- Create and use a solid WBS and RBS to estimate and cost the work.
- Create cost estimates using different estimating techniques.
- Apply a formal process to create a cost estimate for any project.
