- Selected functions (awareness)
- Selected roles (awareness)
- Technology and architecture (awareness)
- Competence and training (awareness)

Course outline

Service Management as a Practice

- Define the concept of a service, and comprehend and explain the concept of service management as a practice.

The ITIL service lifecycle

- Understand the value of the ITIL service lifecycle, how the processes integrate with each other, throughout the lifecycle and explain the objectives, scope and business value for each phase in the lifecycle.

Generic concepts and definitions

- Define some of the key terminology and explain the key concepts of service management.

Key principles and models

- Comprehend and account for the key principles and models of service management and balance some of the opposing forces within service management.

Processes

- Understand how the service management processes contribute to the ITIL® service lifecycle, to explain the purpose, objectives, scope, basic concepts, activities and interfaces of the processes.

Functions

- Explain the role, objectives and organizational structures of the different functions.

Roles

- Account for and be aware of the responsibilities of some of the key roles in service management.

Technology and architecture

- Understand how service automation assists with expediting service management processes.

Competence and training

- Competence and skills for service management.

Mock exam

- Help the candidate to pass the ITIL Foundation exam.
