

# IT4IT™ Awareness H9P64S

This 1-day course introduces IT4IT – a prescriptive standard for providing guidance on how to design, procure, and implement functionality needed to run IT in today’s multi-sourced environments. In addition, the course emphasizes the IT4IT Reference Architecture and the four IT Value Streams associated with the IT4IT Value Chain.

## IT4IT™ Awareness

**Price** USD \$695

**HP course #** H9P64S

**Category** ITIL

**Duration** 1 day

## Audience

- Senior IT management, IT operations staff, IT process owners, business managers, business process owners.
- IT professionals working for organizations that have adopted, or are planning to adopt, the IT4IT standard and need to be able to manage, support and/or operate within such an environment.
- Individuals requiring an understanding of IT4IT and how it can contribute to the success of IT within an IT organization.

## Prerequisites

There are no specific pre-requisites for this training, but knowledge and experience in IT organizational management is helpful.

## Course objectives

On successful completion of this course, candidates will gain knowledge in:

- The expected benefits to be realized from the IT Value Chain model, as described by the IT4IT open standard.
- The four IT Value Stream which compose the IT Value Chain model:
  - Strategy-To-Portfolio
  - Requirements-To-Deploy
  - Request-To-Fulfill
  - Detect-To-Correct.
- The New-Style-of-IT and what IT organizations “must do” to support this new paradigm.
- The two modes of IT operation: Core IT and Fluid IT.
- How IT4IT provides the structure to improve and automate “Core IT” & scale and enable “Fluid IT.”
- How to create a prescriptive, consistent service model backbone (including a common data model and appropriate context), complete with all documentation and required interactions.

- How to complement existing process frameworks and methodologies, (e.g. ITIL®, COBIT®, SAFe® and TOGAF®) by taking the data-focused implementation model perspective of IT4IT, and essentially specifying an information model that can be used across the entire IT value chain.
- How to use the IT4IT open standard to support real world use cases driven by the Digital Economy (e.g. Cloud-sourcing, Agile, DevOps and service brokering).

## Next steps
