

Course overview

Aruba AirWave Wireless Management Suite Installation, Configuration & Use (H0LJ3s)

This hands-on course provides the knowledge and experience required to install and use the AirWave Wireless Management Suite: AirWave Management Platform (AMP), RAPIDS, and Visual RF. Structured labs provide students individual time with the AMP server and a series of exercises that progress from monitoring single-vendor networks to the configuration and reporting of complex, multi-vendor networks. Students also learn how to integrate AirWave products into an existing network. The course is WLAN vendor neutral and assumes a heterogeneous network.

Audience

- Network Administrators who monitor and troubleshoot wireless networks
- Network and System Administrators responsible for installing and configuring network monitoring systems

Prerequisites

- Basic WLAN terminology and concepts
- Knowledge of wired and wireless networking design and operations
- Experience installing network monitoring software
