

Advanced Troubleshooting HOLJ4S

Course Overview

This advanced instructor-led class provides an overview of methodologies and tools for troubleshooting Aruba based networks in an AOS 6.X environment. Labs are designed to inject problems into the student networks in a controlled fashion to demonstrate how various symptoms appear.

Therefore, when problems are seen in a production environment, they will be more quickly identified and remedied.

Price	USD \$3,200
Links to local schedules, pricing and registration	US/Canada
Course title	Advanced Troubleshooting
HP course #	HOLJ4S
Category	Networking
Duration	5 days

Prerequisites

- Knowledge level at the ACMP level
- Students must be comfortable with provisioning profiles for various aspects of the Aruba Controller
- The labs are written as objectives and are not documented in a step by step manner. Therefore, the student must know how to provision a controller without reliance upon detailed lab instructions

Course outline

Day 1

- Troubleshooting Philosophies
- Overview of Troubleshooting tools: Debug & Logs
- AP boot issues

Day 2

- RF issues:Spectrum Analysis
- IPSec
- Remote AP

Day 3

- Client Issues connectivity and authentication
- Captive Portal
- Role Derivation

Day 4

- Infrastructure Issues
- Master-Local Communications
- VRRP
- Radius and DHCP
