

HPE Education Services Poland
Virtual Lab Access Test

Version 2017.09.03

This document contains information how to test access to the HPE Virtual Lab Poland.

Testing Access to the Lab

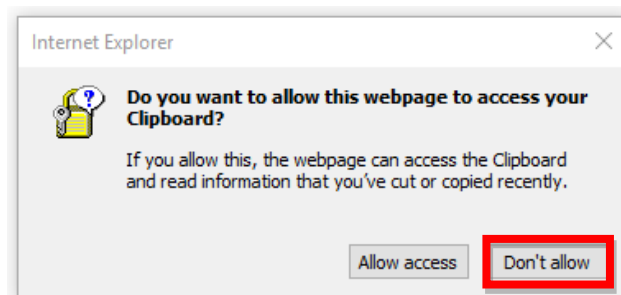

Access the Lab with any Web browser supporting HTML5. Most current browsers support this. Please perform the following steps:

- Open your browser and navigate to <https://h4100.wsw.edunet.hpe.com>

The screenshot shows a login page for the Virtual Lab. At the top is the Hewlett Packard Enterprise logo. Below it, the text "VIRTUAL LAB" is centered. There are two input fields: "Username" and "Password". At the bottom is a dark grey button labeled "Login".

If you see a warning window on accessing your Clipboard (typically for Internet Explorer), select **Don't allow**.

- Login with:
Username: h4020
Password: vlpoland
- A test connection opens, you should see a typical Windows-based system session.
Once connected, the system will immediately initiate an automatic logout.
- Select **Logout** and close the browser session.

Your computer is now set up, tested, and ready for your training event.

Getting Assistance

If you need assistance, please contact the virtual lab Tech Support Team at **Education.Tech.Support.Poland@hpe.com**
