**CCoE** | Canadian Centre  
of Excellence

# Canadian Centre of Excellence at Spectrum now powered with 100% Green Energy

HPE Canada has partnered with **Bullfrog Power** to power our Canadian Centre of Excellence (CCoE) at our Canadian Headquarters with 100% green electricity.

## What is the Canadian Centre of Excellence?

The Canadian Center of Excellence is HPE's executive briefing center for Canada. The center's key focus is to showcase HPE's innovative technology solutions and thought leadership to our customers and partners. Since its inception in summer of 2012, this center has hosted over 500 customer and partner sessions.

## What does it mean that this space is bullfrogpowered?

Bullfrog Power ensures the same amount of energy used by the Canadian Centre of Excellence in a year is put back into the grid from **clean, renewable electricity**.

By choosing green energy, we are reducing HPE's carbon footprint, supporting community-based renewable energy projects in our region and across Canada, and helping to lead the way to a renewably powered future.

Bullfrog's green energy is sourced from a blend of wind and low-impact hydro power sourced from new Canadian renewable energy facilities. HPE's support also helps to bring new renewable energy projects online across Canada.
