Align your workforce productivity strategy to the mobile cloud era

Figure 1: HPE Digital Workplace framework

Connecting people and enabling communities with MS Office 365 is also fundamental to a transformation to a digital workplace that delivers on universal access to people, applications, and data.

HPE Digital Workplace framework focuses on this transformational journey centered on employee productivity and experience. To begin this journey, Hewlett Packard Enterprise offers the Workplace and Mobility Transformation Workshop—a proven interactive workshop and approach that helps you achieve the critical business and IT alignment necessary for any transformational initiative. The output of a full Transformation Workshop allows you to unify your disparate workplace and mobility efforts into a cohesive strategy and plan with actionable next steps, including quick improvements and long-term priorities.

Make the move

If you're looking to streamline capital expenditure (CAPEX) associated with your productivity systems, and take advantage of an operating expenditure (OPEX) approach, while delivering new levels of reliability and performance, then Microsoft® Office 365 can help. When you're ready to move to Microsoft Exchange 2013, SharePoint 2013, or Lync® 2013, you may be asking: what's the best transition path to take? Hewlett Packard Enterprise has an answer based on a proven track record of delivered design and implementation solutions for Microsoft technologies: HPE Migration Service for MS Office 365.

Take a hybrid approach

HPE Migration Service for MS Office 365 gives you the benefits of a cloud-based implementation—an approach that blends the public and private clouds—while retaining full control of sensitive information. It features predictable pricing for faster decision-making. It employs a combination of an onsite and automated offsite delivery methodology that has been proven globally.

We start with an evaluation of project ROI as part of the initial migration assessment. This gives you the flexibility to plan appropriately—and to choose the service package that is best for your business.

Benefit from Hewlett Packard Enterprise's extensive experience with Microsoft solutions

Get proven, long-term support and reliable worldwide delivery
With more than 23,000 Microsoft-trained and 11,000-plus Microsoft-certified professionals, Hewlett Packard Enterprise has one of the largest, most specialized forces of consultants and support professionals for Microsoft environments. Today, Hewlett Packard Enterprise has more than 19 million Microsoft Exchange Server and over one million Microsoft SharePoint Server seats deployed or under management. As Microsoft's largest OEM and Gold Certified Partner, HP (now Hewlett Packard Enterprise) has been named five times as "Microsoft Global Enterprise Partner of the Year."

Subsequently, we take an industrialized approach to your Office 365 migration. Based on a combination of tools and templates derived from our significant experience with Microsoft solutions, we deliver your migration using proven, high-quality methodology. Our onsite consultants work with you, while the HPE offsite team executes the migration, making sure the process is in sync with your plans. We work together with you to build the right solution using an ideal mix of repeatable procedures, templates, and pre-tested components—helping to greatly reduce time and costs.

Choose the service that's right for you
Our experienced consultants provide a comprehensive range of migration services based on your specific needs and at pre-determined pricing. This lets you better evaluate the costs up front, and then make the appropriate choice.

- **Hybrid configuration services**
  - You decide which workloads and user data to keep on premise and which to put in the cloud; we design the technical configuration and migration process to make it happen.

- **Migration services**
  - Pre-migration: We work with your IT leaders to facilitate effective end-user adoption of the new Office 365 environment.
  - Post-migration: We work with you to plan for additional workloads that can benefit from this hybrid cloud approach.

- **Customization services**
  - Regardless of where workloads are hosted, we customize your solution design so that all the key stakeholders can appropriately access necessary information—from any device they choose.

The industrialized delivery model of the HPE Migration Service for MS Office 365 promotes standardization and reuse. As a result, you can reduce time and costs while increasing productivity, predictability, and quality of work.

Estimate your migration investment
We combine our industrialized approach and fixed-price model with known parameters to help you identify and evaluate the approximate costs of the entire transition. Factoring in all of this information, you can then make the appropriate choice from the available options.

Know your resource requirements before you begin
Because you're using our predefined methodology, you don't need to involve all of your IT resources in the migration project. Hewlett Packard Enterprise shares execution and project management, giving you more time to keep your resources focused on strategic areas that are of equal importance to your business.

Count on full lifecycle expertise for your complete hybrid Office 365 solution
Hewlett Packard Enterprise offers a comprehensive range of services to support Microsoft Exchange Server, Microsoft SharePoint Server, or Microsoft Lync Server and all aspects of the Microsoft Office infrastructure—from strategy and design to transition, operation, and continual improvement.

Take advantage of the HPE Readiness Workshop for MS Office 365
Hewlett Packard Enterprise's workshop approach is an excellent way to help you begin to develop a high-level approach to dealing with complex technology transitions. The goal of this one-day HPE Readiness Workshop for MS Office 365 is to arrive at a suitable approach for your organization to implement MS Office 365 successfully, with a highly interactive slide-free format, facilitated by experienced HPE consultants.
