# Accelerate your DevOps journey

Propel your workforce potential with HPE Education Services

**HPE**  
POINTNEXT

The speed of business continues to accelerate, disrupting existing business models and forcing organizations to cut costs and increase innovation to improve their competitiveness. Line-of-Business (LOB) competitiveness relies on new and better application capabilities. Application capabilities are developed by R&D and IT teams, now under pressure to speed development while maintaining high quality. DevOps is the method which answers this need, and enables teams to deliver the applications required for their business to be competitive.

## **Benefit from these training outcomes**

DevOps training from HPE means having well-trained IT staff who can confidently implement nearly continuous application development, integration, and deployment. This facilitates increased productivity, velocity, and quality resulting in improved financial performance and competitiveness for the business.

DevOps training from HPE helps IT teams to accelerate their learning of critical skills for DevOps tools and methods, and to apply them with accelerated benefits to your business.

HPE Education Services offers customers a range of global training and education consulting services designed to help your IT organization realize the business benefits of DevOps.

HPE expects to be there at every step of the way helping ensure that people, processes, and technology elements are aligned—so you can achieve the business goals you seek.

## **Benefit with HPE from real-world DevOps implementation guidance**

HPE Education Services benefits from the rich experience of HPE's own engineering teams, in pioneering DevOps—bringing that expertise to the instruction and course materials based on their real-world practices and techniques.

Every organization applies DevOps in a different way specific to their own organization and current state. The implementation takes skilled people, new processes, and new technologies. HPE helps you achieve the crucial alignment of technologies, people, and processes.

HPE offers industry-leading DevOps, service management, and change management training programs to enable the transformation to a more agile and productive IT organization.

## **Why work with HPE for DevOps training?**

With HPE Education Services, we can help facilitate you in fully utilizing your resources. With over 35 years of experience, we lead the industry<sup>1</sup> when it comes to skills-based IT training, certification training, and training services focused on end-user acceptance during technology and process changes. Our in-depth, award-winning IT training<sup>2</sup> covers nearly all elements of the DevOps transformation including tools, processes, and people.

Our certification and training programs have already helped thousands of IT and security professionals upgrade their skillset and prepare for the future of information technology.

### **Education Consulting and Management of Change (MoC)**

Education Consulting specializes in guiding customers through change. Our guiding strategy is to work with companies to tailor HPE Education Services to satisfy the needs of executives, IT, and the workforce. One size does not fit all, and this is true of business teams as well as individual IT practitioners.

### Education Consulting and Management of Change

- Performance Optimization
- MoC Education Consulting
- Education Needs Advisements
- Skills Gap Analysis
- MoC Project Management
- IT Service Management

DevOps methods require the development of new skills and responsibilities within the IT department. DevOps also needs to fit against and interlock with the responsibilities of other teams within IT. Sometimes gaining agreement and determining practical implementation steps is the hardest part of the project. This is where our Management of Change (MoC) service helps to ease the way. This unique Education Consulting service helps address the people element in your business, with techniques and proven approaches that are designed to take down barriers and enable collaboration among your teams.

Our Education Consultants work with your company to understand the unique business drivers, learning culture, skills, and timelines that exist in your environment. Our team uses this to create a custom training and education approach tailored to custom-fit your unique requirements.

## Additional key reasons to work with HPE Education Services for your DevOps training

- Breadth of DevOps training that covers tools, such as Docker, as well as methodologies
- DevOps business simulations and workshops to bring DevOps principles to life
- Context of DevOps training offered in combination with ITSM training essentials to providing IT practitioners with surrounding skills on IT4IT™, ITIL®, and other key IT processes
- Availability of Education Consultant to work with IT teams to tailor DevOps training, workshops, and tune-ups according to the level of skills in the team
- Recognized as an IDC MarketScape Leader in Cloud<sup>3</sup> and ITIL/ITSM<sup>4</sup> training
- Over 30 years of IT education experience
- More than 90 locations worldwide
- Broad range of delivery options including online instructor-led, self-paced training and pre-built simulation-based courses accessible 24x7

## Key benefits

**Reduce costs:** Effective implementation of DevOps and correctly skilled people helps in improving the speed and quality of software development and deployments, enabling IT to contribute directly to the success and profitability of the organization. Reduce support costs and improve organizational efficiency and productivity.

**Improve competitiveness:** DevOps capability enables faster applications development within your IT team. With faster response, your IT team can better serve your Line-of-Business requirements and improve the competitiveness of your business.

**Create an agile process:** When implemented with HPE Education Services, DevOps can make your organization more agile, making it quicker to respond to changing business requirements and increase your competitiveness.

**Skilled workforce:** IT teams that have the right skills and knowledge rapidly adopt new technology and solutions, enabling you to realize excellent returns on your technology investment.

## Accelerate your transformation into DevOps and Cloud
