

Overview

HPE 6125G Ethernet Blade Switch

The innovative features of HPE Networking products are now available in a 1Gb blade switch designed exclusively for the c-Class BladeSystem enclosure. The HPE 6125G is designed specifically for budget-conscious customers who require 1Gb switching and routing. HPE 6125G basic functionality includes the resiliency of IRF (Intelligent Resilient Networking) stacking and the stability of Comware features previously only available on much higher end switching products. With sixteen 1Gb downlink (server) ports, up to eight 1Gb uplink ports, up to two 10Gb IRF stacking ports, and one 10Gb cross-link port, the HPE 6125G reduces costs while increasing datacenter efficiency and capability. Using IRF, HPE 6125G and HPE 6125G/XG switches can be combined together at the enclosure, rack or datacenter level into a single virtual switch and managed through a single IP address for powerful mixed bandwidth applications. The HPE resilient Comware operating system provides a common level of features, service and security levels from edge to core. And all network elements can be managed through IMC (Intelligent Management Center) providing comprehensive single pane provisioning of the entire network. The HPE 6125G is perfect for remote office applications, clustering, virtual machine applications or wherever IPv6, full layer 3 routing and distributed trunking are required for 1Gb applications. If you're looking for a switch that provides ample performance at a low cost, the 6125G is the optimal choice for any data center

ProLiant BL c-Class Server Blade Enclosures

HPE BladeSystem c3000 Enclosure
HPE BladeSystem c7000 Enclosure

Standard Features

Performance

- Non-blocking architecture
- Wire speed switching and IPv4/IPv6 routing on all ports
- Separate 10Gb Internal cross connect between switches
- Combine up to 10 switches into a single virtual switch
- RJ45 and SFP ports support 1Gb
- Ports 1 and 2 can be used as 1Gb SFP uplinks or as 10Gb IRF connections
- Mix any combination of HPE 6125G and HP6125G/XG in a single IRF domain
- Store and Forward Switching
- Hardware-based wire-speed access control lists (ACLs)

Management

- Remote configuration and management through Web browser or CLI
- Secure Web-based management through HTTPS
- Standards based SNMP management via SNMPv1, v2c and v3
- OOBM via Onboard Administrator
- GUI Management via Intelligent Management Center
- RJ45 console port
- sFlow and RMON network monitoring
- Manager and operator privilege levels
- Command authorization via RADIUS
- Complete session logging for problem resolution
- LLDP Discovery protocol
- IPv6 management
- Dual flash images
- Multiple configuration files
- Syslog
- Network Time Protocol (NTP)

Management

- IEEE 802.1X user authentication
- MAC-based authentication with RADIUS server
- Access Control Lists (ACLs)
- Secure FTP
- STP Root Guard
- DHCP Protection from unauthorized DHCP servers
- IP Source Guard
- Dynamic ARP protection to prevent eavesdropping
- Guest VLAN
- Endpoint Admission Defense (EAD)
- RADIUS/TACACS+
- Secure management via SSHv2 and SNMPv3
- Unicast Reverse Path Forwarding (URPF)

Layer 2 Switching

- 32K MAC addresses
- 4094 VLANs
- IEEE 802.1ad QinQ VLANs
- Jumbo packet support
- GVRP VLAN Registration Protocol
- Port Aggregation
- Spanning Tree Protocol, PVST, MSTP, RSTP, STP Root Guard
- Smart Link fast uplink failure recovery
- IP Multicast Snooping and data-driven IGMP
- Policy Based Routing

Layer 3 Routing

- IPv4 routing protocols - static routes, RIP, OSPF and BGP

Standard Features

- IPv6 routing protocols - static routes, RIPng, OSPFv3 and BGP+
- IPv6 tunneling
- IP Multicast - PIM-SSM, PIM-DM, PIM-SM, IGMP for IPv4 and IPv6
- Equal-Cost Multipath (ECMP)
- Policy-based routing
- DHCP and DHCPv6 client
- VRRP

Quality of Service (QoS)

- Advanced classifier-based QoS - classifies traffic using multiple match criteria based on Layer 2, 3 and 4 information; applies QoS policies such as priority level and rate limit to selected traffic on a per-port or per-VLAN basis
- Traffic policing - supports Committed Access Rate (CAR) and line rate
- Powerful QoS feature - creates traffic classes based on access control lists (ACL), IEEE 802.1p precedence, IP, DSCP or Type of Service (ToS) precedence; supports filter, redirect, mirror or remark; supports the following congestion actions: strict priority (SP) queuing, weighted round robin (WRR), weighted fair queuing (WFQ), and weighted random early discard (WRED)
- Storm restraint - allows limitation of broadcast, multicast, and unknown unicast traffic rate to cut down on unwanted broadcast traffic on the network

Resiliency and High Availability

- Intelligent Resilient Fabric (IRF) - Creates virtual resilient switching fabrics, where two or more switches perform as a single Layer 2 switch and Layer 3 router; Switches do not have to be co-located and can be part of a disaster recovery system; Servers or switches can be attached using standard LACP for automatic load balancing and high availability; Simplifies network operation by eliminating Spanning Tree, ECMP and VRRP
- Device Link Detection Protocol (DLDP) - Monitors Link connectivity and shuts down ports at both ends if unidirectional traffic is detected
- Rapid Ring Protection Protocol (RRPP) - Connects multiple switches in a high-performance ring using standard Ethernet technology; traffic can be rerouted around the ring in less than 50 ms upon failure
- Smart Link - Allows 50 ms failover between links
- Virtual Router Redundancy Protocol (VRRP)

Monitoring and Diagnostics

- OAM (802.3ah) - Detects data link layer problems in the "last mile"; monitors link status between two devices
- CFD (802.1ag) - Connectivity Fault Detection (CFD) provides L2 link OAM mechanism used for link connectivity detection and fault location
- Mirroring - Port mirroring enables traffic on a port to be simultaneously sent to a network analyzer for monitoring; Flow-based mirroring
- sFlow

Security

- FIPS 140-2
- IPsec
- IKE (Internet Key Exchange)
- Self-signed certificate for HTTPS
- Disable password recovery

Service and Support

Service and Support HPE Technology Services

When you buy HPE BladeSystem Options for your HPE BladeSystem, it is also good time to think about services. HPE Technology Services offers you technical consultants and support expertise to solve your most complex infrastructure problems, giving you one call to make, fast answers, and global reach. We help keep your business running, boost availability, and avoid downtime.

Protect your business beyond warranty with HPE Pointnext operational services

HPE Pointnext operational services provide total care and support expertise with committed response choices designed to meet your IT and business needs.

HPE Foundation Care services offer scalable reactive support-packages for Hewlett Packard Enterprise industry-standard servers and software. You can choose the type and level of service that is most suitable for your IT and business needs. If you are running business critical environments, Hewlett Packard Enterprise offers Proactive Care. This service helps you deliver high levels of system availability through proactive service management and advanced technical response.

Recommended HPE Pointnext operational services for your HPE product

Recommended Services **3-Year HPE 24x7 4 hour response, Proactive Care Service***

This service gives you combined reactive and proactive support including rapid access to our Advanced Solution Center to manage and prevent problems and a Technical Support Specialist with a broad level of technical knowledge that will engage with additional technical expertise as needed from the Hewlett Packard Enterprise vast global resources.

<https://www.hpe.com/h20195/v2/getpdf.aspx/4aa3-8855eee.pdf>

HPE Installation of ProLiant Add On Options Service

This easy-to-buy, easy-to-use HPE Care Pack service helps ensure that your new Hewlett Packard Enterprise hardware is installed smoothly, efficiently, and with minimal disruption of your IT and business operations.

Related HPE Pointnext operational services to enhance your HPE product experience

Related Services **3-Year HPE 6 hour Call to Repair Response, Proactive Care***

Combined reactive and proactive support for hardware and software helping optimize your systems and delivering high levels of availability through proactive service management and advanced technical response. Hardware problem resolution to return the hardware in operating condition within 6 hours of the initial service request. A Technical Account Manager, as your single point of contact, will own your call or issue end to end until resolved. <https://www.hpe.com/h20195/v2/getpdf.aspx/4aa3-8855eee.pdf>

Additional Services **HPE Proactive Select Service**

Provides a flexible way to purchase Hewlett Packard Enterprise best-in-class consultancy and technical services. You can buy Proactive Select Service Credits when you purchase your hardware and then use the credits over the next 12 months. <http://h20195.www2.hp.com/V2/GetPDF.aspx/4AA2-3842ENN.pdf>

NOTE: Additional HPE Pointnext operational services can be found at:

<http://h20558.www2.hp.com/portal/site/cpc>

Insight Online/Insight Remote Support

HPE Insight Remote Support provides 24 X 7 remote monitoring, proactive notifications, and problem resolution. This comes at no additional cost with your Hewlett Packard Enterprise solution*. Learn more about Insight Remote Support <http://www.hp.com/go/insightremotesupport> and Insight Online <http://h18013.www1.hp.com/products/servers/management/insight-online/index.html>

NOTE: Insight Remote Support is a prerequisite for HPE Proactive Care referenced in Additional Services above.

Service and Support

HPE Support Center Personalized online support portal with access to information, tools and experts to support Hewlett Packard Enterprise business products. Submit support cases online, chat with Hewlett Packard Enterprise experts, access support resources or collaborate with peers. Learn more <http://www.hp.com/go/hpsc>
The HPE Support Center Mobile App allows you to resolve issues yourself or quickly connect to an agent for live support. Now, you can get access to personalized IT support anywhere, anytime.
HPE Insight Remote Support and HPE Support Center are available at no additional cost with a Hewlett Packard Enterprise warranty, HPE Care Pack or Hewlett Packard Enterprise contractual support agreement.
NOTE: HPE Support Center Mobile App above is subject to local availability.

Parts and materials Hewlett Packard Enterprise will provide HPE-supported replacement parts and materials necessary to maintain the covered hardware product in operating condition, including parts and materials for available and recommended engineering improvements.

Parts and components that have reached their maximum supported lifetime and/or the maximum usage limitations as set forth in the manufacturer's operating manual, product quick-specs, or the technical product data sheet will not be provided, repaired, or replaced as part of these services.

The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction.

Service Coverage HPE Pointnext operational services for the c7000 and c3000 enclosures cover the HPE 6125G Ethernet Blade Switch.

For more information To learn more on HPE BladeSystem services, please contact your Hewlett Packard Enterprise sales representative or Hewlett Packard Enterprise Authorized ServiceONE Channel Partner. Or visit: <http://www.hpe.com/services/bladesystem>

Environment-friendly Products and Approach

End-of-life Management and Recycling

Hewlett Packard Enterprise offers end-of-life Hewlett Packard Enterprise product return, trade-in, and recycling programs in many geographic areas. For trade-in information, please go to <http://www.hp.com/go/green>. To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest Hewlett Packard Enterprise sales office. Products returned to Hewlett Packard Enterprise will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard Enterprise web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as Hewlett Packard Enterprise OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.

Technical Specifications

Summary of Changes

Date	Version History	Action	Description of Change
23-Oct-2017	Version 10	Changed	Care Pack naming and Service and Support- Parts and Materials updated.
08-April-2016	From Version 8 to 9	Changed	Minor changes made on Standard Features, SKU descriptions updated.
17-Dec-2015	From Version 7 to 8	Changed	Overview and Related Options sections were updated.
15-Nov-2014	From Version 6 to 7	Changed	Compatibility section was updated.
21-Oct-2014	From Version 5 to 6	Changed	Service and Support, Service Coverage were revised
18-Apr-2014	From Version 4 to 5	Changed	Related Services was revised.
30-Sep-2013	From Version 3 to 4	Changed	Changes made within the Overview and Related Options sections.
15-Mar-2013	From Version 2 to 3	Changed	Changes made throughout the Standard Features Section- Added Security information Changes made in the Related Options Section- Added new part numbers and descriptions as well as deleted part numbers and descriptions
25-Sep-2012	From Version 1 to 2	Changed	Changes made throughout the QuickSpecs.
