- Complete continuum of training delivery options—self-paced eLearning, custom education consulting, traditional classroom, video on-demand instruction, live virtual instructor-led with hands-on lab, dedicated onsite training
- Simplified purchase option with HPE Training Credits

The HPE Race to Results Service Management simulation is an exciting and interactive workshop, set in the context of the “high octane” world of motor racing. The simulation is a half-day program that provides participants with a high-level overview of service management. By applying ITIL lifecycle concepts, processes and the culture of service management, participants aim to win the racing championship through increased service management maturity that leads to dramatic increases in business and race performance.

Audience

This half-day simulation is ideal for executives who do not have time for longer sessions and would like to be introduced to basic service management concepts. It is also suitable for:

- IT professionals who need to understand service management at a high level.
- Senior managers wishing to review service management within their own organizations.
- Team leaders and process owners, who need to understand the big picture of service management and their part in it

Course objectives

- The objective of the simulation is to give a practical introduction to the essential elements of service management and to give participants the opportunity to experience hands-on how the application of service management can improve business performance.
- For a more comprehensive and in-depth overview of service management, register for the full-day version of the simulation ([HF415S](#)).
